

Subject Index

Energy

Alternate Fuels

Thermal Conductivity Measurements of Metal Hydride Compacts Developed for High-Power Reactors T98-020

Hydrogen and Unique Fuels

Thermal Conductivity Measurements of Metal Hydride Compacts Developed for High-Power Reactors T98-020

Rotating Machinery

Test Results of Water and Methanol High-Speed Rotating Heat Pipes T98-055
Local Heat (Mass) Transfer in a Rotating Square Channel with Ejection Holes T98-085

Stirling Engine

Near-Isothermal Regenerator: Complete Thermal Characterization T98-058

Fluid Dynamics

Boundary Layers and Heat Transfer— Laminar

Theory of Local Heat Transfer in Shock/Laminar Boundary-Layer Interactions T98-048
Radiation-Conduction Interaction on Mixed Convection Flow Along a Slender Vertical Cylinder T98-091

Boundary Layers and Heat Transfer— Turbulent

Detailed Heat Transfer Distributions Under an Array of Orthogonal Impinging Jets T98-010
Turbulence Structure of Heat Transfer Through a Three-Dimensional Turbulent Boundary Layer T98-034

Computational Fluid Dynamics

Analogy-Based Method for Solving Compressible and Incompressible Flows T98-033
Augmented Burnett and Bhatnagar-Gross-Krook-Burnett Equations for Hypersonic Flow T98-047
Role of Boundary Conditions in Monte Carlo Simulation of Microelectromechanical Systems T98-062
Statistical Simulation of Nonequilibrium Rarefied Flows with Quasiclassical Vibrational Energy Transfer Models T98-071
Numerical Study of High-Intensity Free-Burning Arc T98-073

Numerical Solution of the Ideal Magnetohydrodynamic Equations for a Supersonic Channel Flow T98-074

Hydrodynamics

High-Accuracy Expressions for Rotational-Vibrational Energies of the O₂, N₂, NO, and CO Molecules T98-007

Hypersonic Flow

Prediction of Ultraviolet Radiation in Nonequilibrium Hypersonic Bow-Shock Waves T98-005
Nitrogen Nonequilibrium Vibrational Distributions and Non-Arrhenius Dissociation Constants in Hypersonic Boundary Layers T98-006
Spectroscopic Emission Measurements Within the Blunt-Body Shock Layer in an Arcjet Flow T98-027
Advanced Model of Nitric Oxide Formation in Hypersonic Flows T98-030
Augmented Burnett and Bhatnagar-Gross-Krook-Burnett Equations for Hypersonic Flow T98-047
Theory of Local Heat Transfer in Shock/Laminar Boundary-Layer Interactions T98-048
Techniques for Estimating Rotational and Vibrational Temperature in Nitrogen Arcjet Flow T98-066
Measured Shock-Layer Vibrational Populations and Temperatures in Arcjet Nitrogen Flow T98-067
Chemical Rate Constants in Nonequilibrium Flows T98-070
Statistical Simulation of Nonequilibrium Rarefied Flows with Quasiclassical Vibrational Energy Transfer Models T98-071
Air High-Enthalpy Stagnation Point Heat Flux Calculation T98-090

Inlet, Nozzle, Diffuser, and Channel Flows

Role of Boundary Conditions in Monte Carlo Simulation of Microelectromechanical Systems T98-062
Small Cavitating Venturi Performance Characteristics at Low Inlet Subcooling T98-088

Multiphase Flows

Heat Transfer in a Homogeneous Suspension Including Radiation and History Effects T98-044

Plasmadynamics and MHD

Cathode Sheath Voltage Models for Hydrazine Arcjets T98-032
Nonequilibrium Vibrational Distributions of N₂ in Radio-Frequency Parallel-Plate Reactors T98-068

Non-Maxwell Behavior of Electron Energy Distribution Functions in Expanding Nitrogen Arcs T98-069
Numerical Study of High-Intensity Free-Burning Arc T98-073
Numerical Solution of the Ideal Magnetohydrodynamic Equations for a Supersonic Channel Flow T98-074

Rarefied Flows

Prediction of Ultraviolet Radiation in Nonequilibrium Hypersonic Bow-Shock Waves T98-005
Direct Simulation of High-Altitude Ultraviolet Emission from the Hydroxyl Radical T98-031
Role of Boundary Conditions in Monte Carlo Simulation of Microelectromechanical Systems T98-062
Statistical Simulation of Nonequilibrium Rarefied Flows with Quasiclassical Vibrational Energy Transfer Models T98-071

Reacting Flows and Combustion

Nitrogen Nonequilibrium Vibrational Distributions and Non-Arrhenius Dissociation Constants in Hypersonic Boundary Layers T98-006
Thermal Conductivity Measurements of Metal Hydride Compacts Developed for High-Power Reactors T98-020
Computational Simulation of Emission Spectra from Shock-Layer Flows in an Arcjet Facility T98-026
Techniques for Estimating Rotational and Vibrational Temperature in Nitrogen Arcjet Flow T98-066

Separated Flows

Local Heat (Mass) Transfer in a Rotating Square Channel with Ejection Holes T98-085

Shock Waves and Detonations

Existence of the Bottleneck in Vibrational Relaxation of Diatomic Molecules T97-037

Subsonic Flow

Analogy-Based Method for Solving Compressible and Incompressible Flows T98-033

Transonic Flow

Analogy-Based Method for Solving Compressible and Incompressible Flows T98-033

Unsteady Flows

Heat Transfer in a Homogeneous Suspension Including Radiation and History Effects T98-044

Viscous Non-Boundary-Layer Flows

- Cathode Sheath Voltage Models for Hydrazine Arcjets T98-032
 Theory of Local Heat Transfer in Shock/Laminar Boundary-Layer Interactions T98-048
 Double Diffusion in a Porous Cavity Saturated with Non-Newtonian Fluid T98-061

Interdisciplinary Topics**Analytical and Numerical Methods**

- Vibrational Energy Transfer Rates Using a Forced Harmonic Oscillator Model T98-008
 Unidirectional Infiltration and Solidification/Remelting of Al-Cu Alloy T98-014
 Assessment of Uncertainty in the Determination of Activation Energy for Polymeric Materials T98-076

Lasers and Laser Applications

- Comparison of Atomization Sources for a Field-Deployable Laser Optogalvanic Spectrometry System T98-009
 Surface-Catalyzed Production of NO from Recombination of N and O Atoms T98-072

Launch Vehicle and Missile (LV/M) Technology**Launch Vehicle and Sounding Rocket Systems**

- Delta Clipper-Experimental In-Ground Effect on Base-Heating Environment T98-049

Thermal Protection Systems

- Thermal Management of an Avionics Module Using Solid-Liquid Phase-Change Materials T98-035
 Surface-Catalyzed Production of NO from Recombination of N and O Atoms T98-072
 Gas Permeability of Rigid Fibrous Refractory Insulations T98-077

Propulsion**Airbreathing Propulsion**

- Impingement Cooling in Rotating Two-Pass Rectangular Channels T98-084

Electric and Advanced Space Propulsion

- Cathode Sheath Voltage Models for Hydrazine Arcjets T98-032

Fuels and Propellants, Properties of

- Molecular Dynamics Studies of Properties of Supercritical Fluids T98-046

Solid Rocket Motors and Missile Systems

- Assessment of Uncertainty in the Determination of Activation Energy for Polymeric Materials T98-076

Space Technology**Aerobraking Configurations/****Aerothermodynamics**

- Spectroscopic Emission Measurements Within the Blunt-Body Shock Layer in an Arcjet Flow T98-027

Space Experiments

- Performance of Liquid Metal Heat Pipes During a Space Shuttle Flight T98-036

Spacecraft Power

- Modeling Cyclic Phase Change and Energy Storage in Solar Heat Receivers T98-057

Spacecraft Radiation Protection

- Heat Transfer in Fibrous Insulations: Comparison of Theory and Experiment T98-043

Spacecraft Thermal Management

- Heat Transfer in Fibrous Insulations: Comparison of Theory and Experiment T98-043

Structural Mechanics and Materials**Structural Composite Materials**

- Transient Temperature Analysis of Airplane Carbon Composite Disk Brakes T98-040

Thermophysics and Heat Transfer**Ablation, Pyrolysis, Thermal****Decomposition, and Degradation**

- Assessment of Uncertainty in the Determination of Activation Energy for Polymeric Materials T98-076

Aerothermodynamics/Thermal Protection

- Radiative Properties of Fiber-Reinforced Aerogel: Theory Versus Experiment T98-002
 Detailed Heat Transfer Distributions Under an Array of Orthogonal Impinging Jets T98-010
 Enhancement of Heat Transfer with Swirling Flows Issued into a Divergent Pipe T98-012
 Computational Simulation of Emission Spectra from Shock-Layer Flows in an Arcjet Facility T98-026

- Spectroscopic Emission Measurements Within the Blunt-Body Shock Layer in an Arcjet Flow T98-027

- Thermal Energy Accommodation from Oxygen Atoms Recombination on Metallic Surfaces T98-029

- Advanced Model of Nitric Oxide Formation in Hypersonic Flows T98-030

- Temperature Distributions in Channel Walls with Translucent Thermal Barrier Coatings T98-042

- Augmented Burnett and Bhatnagar-Gross-Krook-Burnett Equations for Hypersonic Flow T98-047

- Delta Clipper-Experimental In-Ground Effect on Base-Heating Environment T98-049

- Parametric Study of Actively Cooled Aircraft Structure T98-050

- Evaluation of Estimation Methods for High Unsteady Heat Fluxes from Surface Measurements T98-079

- Air High-Enthalpy Stagnation Point Heat Flux Calculation T98-090

Boiling/Condensation

- Condensation in Rotating Stepped Wall Heat Pipes with Hysteretic Annular Flow T98-013

- Immersion Cooling of a Simulated Electronic Chip Protruding into a Flow Channel T98-056

Computational Heat Transfer

- Conjugate Forced Convection Heat Transfer in Tubes with Obstruction T98-016

- Shape Identification Problem in Estimating Geometry of Multiple Cavities T98-037

- Monte Carlo Simulation of Radiation in Scattering Volumes with Line Structure T98-038

- Finite Volume Method for Radiative Heat Transfer Using Unstructured Meshes T98-045

- Delta Clipper-Experimental In-Ground Effect on Base-Heating Environment T98-049

- Generalized Boundary Integral Equation for Transient Heat Conduction in Heterogeneous Media T98-052

- Numerical Study of High-Intensity Free-Burning Arc T98-073

- Heat Transfer Analysis of a Plug-Type Heat Flux Gauge T98-078

- Predicting Interfacial Contact Conductance and Gap Formation of Investment Cast Alloy 718 T98-081

- Radiative Heat Transfer in a Body-Fitted Axisymmetric Cylindrical Enclosure T98-086

- Air High-Enthalpy Stagnation Point Heat Flux Calculation T98-090

Cryonics

- Thermal Design of High- T_c Superconductor Radiometers T98-003

- Near-Isothermal Regenerator: Complete Thermal Characterization T98-058

Heat Transfer Analysis and Modeling of a Cryogenic Laser Radiometer T98-083

Electronics Cooling

Thermal Management of an Avionics Module Using Solid-Liquid Phase-Change Materials T98-035

Immersion Cooling of a Simulated Electronic Chip Protruding into a Flow Channel T98-056

Thermal Contact Conductance of Elastomeric Gaskets T98-065

Forced Convection

Detailed Heat Transfer Distributions Under an Array of Orthogonal Impinging Jets T98-010

Heat/Mass Transfer in a Rotating Two-Pass Channel with Transverse Ribs T98-011

Enhancement of Heat Transfer with Swirling Flows Issued into a Divergent Pipe T98-012

Vaporization of Binary Fuel Mixture Droplets in a Thermal Wind Tunnel T98-015

Conjugate Forced Convection Heat Transfer in Tubes with Obstruction T98-016

Effect of Rib Profiles on Turbulent Channel Flow Heat Transfer T98-017

Thermal Conductivity and Gaseous Microscale Transport T98-021

Turbulence Structure of Heat Transfer Through a Three-Dimensional Turbulent Boundary Layer T98-034

Heat (Mass) Transfer in a Rotating Channel with Ribs of Various Sizes on Two Walls T98-064

Impingement Cooling in Rotating Two-Pass Rectangular Channels T98-084

Local Heat (Mass) Transfer in a Rotating Square Channel with Ejection Holes T98-085

Heat Conduction

Review of the Thermal Conductivity of Graphite-Reinforced Metal Matrix Composites T98-001

Conjugate Forced Convection Heat Transfer in Tubes with Obstruction T98-016

Review of the Thermal Conductivity of Thin Films T98-019

Shape Identification Problem in Estimating Geometry of Multiple Cavities T98-037

Analysis of Transient Heat Transfer in a Cylindrical Pin Fin T98-039

Parametric Study of Actively Cooled Aircraft Structure T98-050

Thermal Property of a Two-Dimensional Partially Conducting Grate T98-051

Generalized Boundary Integral Equation for Transient Heat Conduction in Heterogeneous Media T98-052

Thermal Contact Conductance for Aluminum and Stainless-Steel Contacts T98-053

Parametric Heat Transfer Study of Bolted Joints T98-054

Thermal Contact Conductance of Elastomeric Gaskets T98-065

Evaluation of Estimation Methods for High Unsteady Heat Fluxes from Surface Measurements T98-079

Inverse Estimation of Mix-Typed Boundary Conditions in Heat Conduction Problems T98-080

Thermal Lagging in Random Media T98-082

Combined Conduction and Radiation Heat Transfer in a Cylindrical Medium T98-089

Heat Pipes

Condensation in Rotating Stepped Wall Heat Pipes with Hysteretic Annular Flow T98-013

Performance of Liquid Metal Heat Pipes During a Space Shuttle Flight T98-036

Test Results of Water and Methanol High-Speed Rotating Heat Pipes T98-055

Laser Interaction

Comparison of Atomization Sources for a Field-Deployable Laser Optogalvanic Spectrometry System T98-009

Experimental Investigation of the Multiple Scattering of a Polarized Laser Beam T98-023

Melting/Solidification

Unidirectional Infiltration and Solidification/Remelting of Al-Cu Alloy T98-014

Thermal Management of an Avionics Module Using Solid-Liquid Phase-Change Materials T98-035

Modeling Cyclic Phase Change and Energy Storage in Solar Heat Receivers T98-057

Predicting Interfacial Contact Conductance and Gap Formation of Investment Cast Alloy 718 T98-081

Mixed Convection

Comprehensive Study of Convex-Louver and Wavy Fin-and-Tube Heat Exchangers T98-059

Effects of Buoyancy on Electrohydrodynamic-Enhanced Forced Convection in a Horizontal Channel T98-060

Radiation-Conduction Interaction on Mixed Convection Flow Along a Slender Vertical Cylinder T98-091

Natural Convection

Vaporization of Binary Fuel Mixture Droplets in a Thermal Wind Tunnel T98-015

Exact Determination of Transient Cooling in Small Bodies by Nonlinear Natural Convection T98-041

Double Diffusion in a Porous Cavity Saturated with Non-Newtonian Fluid T98-061

Re-Examination of Double Diffusive Natural Convection from Horizontal Surfaces in Porous Media T98-063

Nonintrusive Diagnostics

Comparison of Atomization Sources for a Field-Deployable Laser Optogalvanic Spectrometry System T98-009

Techniques for Estimating Rotational and Vibrational Temperature in Nitrogen Arcjet Flow T98-066

Measured Shock-Layer Vibrational Populations and Temperatures in Arcjet Nitrogen Flow T98-067

Radiation in Participating Media

Radiative Properties of Fiber-Reinforced Aerogel: Theory Versus Experiment T98-002

Experimental Investigation of the Multiple Scattering of a Polarized Laser Beam T98-023

Experimental and Numerical Study of Nonequilibrium Ultraviolet NO and N₂ Emission in Shock Layer T98-025

Direct Simulation of High-Altitude Ultraviolet Emission from the Hydroxyl Radical T98-031

Monte Carlo Simulation of Radiation in Scattering Volumes with Line Structure T98-038

Temperature Distributions in Channel Walls with Translucent Thermal Barrier Coatings T98-042

Heat Transfer in Fibrous Insulations: Comparison of Theory and Experiment T98-043

Finite Volume Method for Radiative Heat Transfer Using Unstructured Meshes T98-045

Radiative Heat Transfer in a Body-Fitted Axisymmetric Cylindrical Enclosure T98-086

Combined Conduction and Radiation Heat Transfer in a Cylindrical Medium T98-089

Radiation-Conduction Interaction on Mixed Convection Flow Along a Slender Vertical Cylinder T98-091

Radiation Interchange Between Surfaces

Thermal Design of High-T_c Superconductor Radiometers T98-003

View-Factor Evaluation by Quadrature over Triangles T98-018

Microscale Thermal Characterization for Two Adjacent Dielectric Thin Films T98-022

Combustion and Heat Transfer Interaction in a Pore-Scale Refractory Tube Burner T98-024

Thermal Control

Thermal Conductivity and Gaseous Microscale Transport T98-021

Thermal Contact Conductance for Aluminum and Stainless-Steel Contacts T98-053

Parametric Heat Transfer Study of Bolted Joints T98-054

Thermal Contact Conductance of Elastomeric Gaskets T98-065

Thermal Lagging in Random Media

T98-082

Thermal Modeling and Analysis

Review of the Thermal Conductivity of Graphite-Reinforced Metal Matrix Composites

T98-001

Thermal Design of High- T_c Superconductor Radiometers

T98-003

Unidirectional Infiltration and Solidification/Remelting of Al-Cu Alloy

T98-014

Review of the Thermal Conductivity of Thin Films

T98-019

Combustion and Heat Transfer Interaction in a Pore-Scale Refractory Tube Burner

T98-024

Transient Temperature Analysis of Airplane Carbon Composite Disk Brakes

T98-040

Exact Determination of Transient Cooling in Small Bodies by Nonlinear Natural Convection

T98-041

Heat Transfer in a Homogeneous Suspension Including Radiation and History Effects

T98-044

Parametric Study of Actively Cooled Aircraft Structure

T98-050

Generalized Boundary Integral Equation for Transient Heat Conduction in Heterogeneous Media

T98-052

Thermal Contact Conductance for Aluminum and Stainless-Steel Contacts

T98-053

Parametric Heat Transfer Study of Bolted Joints

T98-054

Test Results of Water and Methanol High-Speed Rotating Heat Pipes

T98-055

Modeling Cyclic Phase Change and Energy Storage in Solar Heat Receivers

T98-057

Near-Isothermal Regenerator: Complete Thermal Characterization

T98-058

Effects of Buoyancy on Electrohydrodynamic-Enhanced Forced Convection in a Horizontal Channel

T98-060

Double Diffusion in a Porous Cavity Saturated with Non-Newtonian Fluid

T98-061

Heat Transfer Analysis of a Plug-Type Heat Flux Gauge

T98-078

Evaluation of Estimation Methods for High Unsteady Heat Fluxes from Surface Measurements

T98-079

Predicting Interfacial Contact Conductance and Gap Formation of Investment Cast Alloy 718

T98-081

Thermal Lagging in Random Media

T98-082

Heat Transfer Analysis and Modeling of a Cryogenic Laser Radiometer

T98-083

Radiative Heat Transfer in a Body-Fitted Axisymmetric Cylindrical Enclosure

T98-086

Thermochemistry and Chemical Kinetics

Existence of the Bottleneck in Vibrational Relaxation of Diatomic Molecules

T97-037

Development of a Monte Carlo Overlay Method with Application to Spacecraft Glow

T98-004

Prediction of Ultraviolet Radiation in Nonequilibrium Hypersonic Bow-Shock Waves

T98-005

Nitrogen Nonequilibrium Vibrational Distributions and Non-Arrhenius Dissociation Constants in Hypersonic Boundary Layers

T98-006

High-Accuracy Expressions for Rotational-Vibrational Energies of the O_2 , N_2 , NO, and CO Molecules

T98-007

Vibrational Energy Transfer Rates Using a Forced Harmonic Oscillator Model

T98-008

Combustion and Heat Transfer Interaction in a Pore-Scale Refractory Tube Burner

T98-024

Experimental and Numerical Study of Nonequilibrium Ultraviolet NO and N_2^+ Emission in Shock Layer

T98-025

Computational Simulation of Emission Spectra from Shock-Layer Flows in an Arcjet Facility

T98-026

Thermal Energy Accommodation from Oxygen Atoms Recombination on Metallic Surfaces

T98-029

Advanced Model of Nitric Oxide Formation in Hypersonic Flows

T98-030

Direct Simulation of High-Altitude Ultraviolet Emission from the Hydroxyl Radical

T98-031

Measured Shock-Layer Vibrational Populations and Temperatures in Arcjet Nitrogen Flow

T98-067

Nonequilibrium Vibrational Distributions of N_2 in Radio-Frequency Parallel-Plate Reactors

T98-068

Non-Maxwell Behavior of Electron Energy Distribution Functions in Expanding Nitrogen Arcs

T98-069

Chemical Rate Constants in Nonequilibrium Flows

T98-070

Surface-Catalyzed Production of NO from Recombination of N and O Atoms

T98-072

Thermophysical Properties

Review of the Thermal Conductivity of Graphite-Reinforced Metal Matrix Composites

T98-001

High-Accuracy Expressions for Rotational-Vibrational Energies of the O_2 , N_2 , NO, and CO Molecules

T98-007

Review of the Thermal Conductivity of Thin Films

T98-019

Thermal Conductivity and Gaseous Microscale Transport

T98-021

Investigation of High-Enthalpy Air Plasma Flow with Electrostatic Probes

T98-028

Transient Temperature Analysis of Airplane Carbon Composite Disk Brakes

T98-040

Molecular Dynamics Studies of Properties of Supercritical Fluids

T98-046

Transport Properties of Hydrogen

T98-075

Gas Permeability of Rigid Fibrous Refractory Insulations

T98-077

Acoustically Levitated Droplet Viscosity Measurement

T98-087
