Chronological Index

T05-001 Application of Pressure-Sensitive Paints to Low-Pressure Range. Tomohide Niimi, Masaki Yoshida, Makoto Kondo, Yusuke Oshima, and Hideo Mori, *Nagoya University, Japan*; Yasuhiro Egami, *National Aerospace Center, Germany*; Keisuke Asai, *National Aerospace Laboratory, Japan*; and Hiroyuki Nishide, *Waseda University, Japan* (**19**, 1, p. 9) Article

T05-002 Impact of Flowfield–Radiation Coupling on Aeroheating for Titan Aerocapture. Michael J. Wright, Deepak Bose, and Joe Olejniczak, *NASA Ames Research Center* (**19**, 1, p. 17) Article based on AIAA Paper 2004-0484

T05-003 Numerical Simulation of Galileo Probe Entry Flowfield with Radiation and Ablation. Shingo Matsuyama, *Japan Aerospace Exploration Agency, Japan*; Naofumi Ohnishi, Akihiro Sasoh, and Keisuke Sawada, *Tohoku University, Japan* (**19**, 1, p. 28) Article

T05-004 Heat Transfer Prediction of Rotating Rectangular Channels Using Reynolds Stress Model. Mohammad S. Al-Qahtani, *King Fahd University of Petroleum and Minerals, Saudi Arabia*; Hamn-Ching Chen and Je-Chin Han, *Texas A&M University* (**19**, 1, p. 36) Design Forum

T05-005 Heat Transfer in Rotating Rectangular Channels with V-Shaped and Angled Ribs. Eungsuk Lee, Lesley M. Wright, and Je-Chin Han, *Texas A&M University* (**19**, 1, p. 48) Article

T05-006 Impingement Heat Transfer Part I: Linearly Stretched Arrays of Holes. Lujia Gao and Srinath V. Ekkad, *Louisiana State University*; and Ronald S. Bunker, *General Electric Global Research and Development Center* (**19**, 1, p. 57) Article

T05-007 Impingement Heat Transfer, Part II: Effect of Streamwise Pressure Gradient. Ryan T. Hebert, Srinath V. Ekkad, and Luijia Gao, *Louisiana State University*; and Ronald S. Bunker, *General Electric Global Research & Development Center* (**19**, 1, p. 66) Article

T05-008 Numerical Investigation of High Reynolds Number Flows over Square and Circular Cylinders. Shih-Chieh Lo, Klaus A. Hoffmann, and Jean-Francois Dietiker, *Wichita State University* (**19**, 1, p. 72) Article

T05-009 Turbulent Film Condensation on an Isothermal Sphere. Hai-Ping Hu, *Tainan Woman's College of Arts and Technology, Taiwan (ROC)*; and Cha'o-Kuang Chen, *National Cheng Kung University, Taiwan (roc)* (**19**, 1, p. 81) Article

T05-010 Quantifying Irreversible Losses for Magnetohydrodynamic Flow Analysis and Design Integration. Jose A. Camberos, David J. Moorhouse, and Charles F. Suchomel, *U.S. Air Force Research Laboratory* (**19,** 1, p. 87) Article based on AIAA Paper 2003-3647

T05-011 Semiconductor Crystal Growth by Modified Vertical Gradient Freezing with Electromagnetic Stirring. Xianghong Wang and Nancy Ma, *North Carolina State University*; David F. Bliss and Gerald W. Iseler, *U.S. Air Force Research Laboratory* (**19**, 1, p. 95) Article

T05-012 Cost-Effective Techniques for Enhancing Heat Transfer Rate in Steam Condensation. Srinivas Vemuri and Kwang Kim, *University of Nevada, Reno*; Byard Wood, *Utah State University*; Arsalan Razani, *University of New Mexico*; and Thomas Bell, *University of Nevada, Reno* (**19**, 1, p. 101) Article

T05-013 Hydrodynamic Study of High Speed Flow and Heat Transfer Through a Microchannel. Reni Raju and Subrata Roy, *Kettering University* (**19**, 1, p. 106) Article based on AIAA Paper 2003-4051

T05-014 Skin-Temperature Prediction of Aircraft Rear Fuselage with Multimode Thermal Model. Shripad P. Mahulikar, Pankaj S. Kolhe and Arvind G. Rao, *Indian Institute of Technology, Bombay, India* (**19**, 1, p. 114) Article

T05-015 Analysis of Rocket Plume Base Heating by Using Backward Monte-Carlo Method. He-Ping Tan, Yong Shuai, and Shi-Kui Dong, *Harbin Institute of Technology, China (PRC)* (**19**, 1, p. 125) Technical Note

T05-016 Collision Integrals for Ion-Neutral Interactions of Air and Argon. Michael J. Wright and Eugene Levin, *NASA Ames Research Center* (**19**, 1, p. 127) Technical Note

T05-017 Loop Heat Pipe for Spacecraft Thermal Control, Part 2: Ambient Condition Tests. Michelle L. Parker and Bruce L. Drolen, *Boeing Satellite Systems*; and Portonovo S. Ayyaswamy, *University of Pennsylvania* (**19**, 2, p. 129) Article

T05-018 Influence of Wake Passing Frequency and Elevated Turbulence Intensity on Transition. Richard W. Kaszeta, *Creare Inc.*; Terrence W. Simon and Nan Jiang, *University of Minnesota*; and Federico Ottaviani, *Foster Wheeler Italian S.p.A, Italy* (**19**, 2, p. 137) Article based on AIAA Paper 2003-3633

T05-019 Transition in Low-Pressure Turbines: Effects of Unsteady Acceleration and Turbulence Intensity. Nan Jiang and Terrence W. Simon, *University of Minnesota* (**19**, 2, p. 148) Article based on AIAA Paper 2003-3630

T05-020 Jet Impingement Heat Transfer in Rotating Channels with Staggered Extraction Flow. James A. Parsons, *Mississippi State University*; and Je-Chin Han, *Texas A&M University* (**19**, 2, p. 156) Article

T05-021 Post-CHF Axial- and Swirl-Flow Heat Transfer in Small Horizontal Tubes. Munther M. Salim, *General Motors Corporation*; and David M. France, *University of Illinois at Chicago* (**19**, 2, p. 163) Article

T05-022 Alternative Fragmentation Theory for a Melt Droplet. Hakan Papuccuoglu, *Faurecia Japan, Japan*; and Fahir Borak, *Yepe University, Turkey* (**19**, 2, p. 172) Article

T05-023 Fluid Flow Around and Heat Transfer From Elliptical Cylinders: Analytical Approach. Waqar A. Khan, Richard J. Culham, and Michael M. Yovanovich, *University of Waterloo, Canada* (**19**, 2, p. 178) Article based on AIAA Paper 2004-2272

T05-024 Modeling the Floating Zone: Instabilities in the Half Zone and Full Zone. Brent C. Houchens and John S. Walker, *University of Illinois at Urbana–Champaign* (**19**, 2, p. 186) Article based on AIAA Paper 2003-1313

T05-025 Convection and Solidification in Constant and Oscillating Thermal Gradients: Measurements and Simulations. Yan Shu and Ben Q. Li, *Washington State University*; and H. C. de Groh, *NASA John H. Glenn Research Center at Lewis Field* (**19**, 2, p. 199) Article

T05-026 Adaptive-Weighting Input-Estimation Approach to Nonlinear Inverse Heat-Conduction Problems. Huai-Min Wang, Tsung-Chien Chen, Pan-Chio Tuan, and Shi-Gan Den, *National Defense University, Taiwan (ROC)* (**19**, 2, p. 209) Article

T05-027 Direct and Inverse Solutions of the Hyperbolic Heat Conduction Problems. Ching-yu Yang, *National Kaohsiung University of Applied Sciences, Taiwan (ROC)* (**19**, 2, p. 217) Article

T05-028 Radiative Characteristics of Beds of Spheres Containing an Absorbing and Scattering Medium. Rémi Coquard, *Centre Scientifique et Technique du Batiment, France*; and Dominique Baillis, *Centre Thermique de Lyon, France* (**19**, 2, p. 226) Article

T05-029 Quasi-Classical Trajectory Modeling of OH Production in Direct Simulation Monte Carlo. Takashi Ozawa, Dmitry Fedosov, Deborah A. Levin, *Pennsylvania State University*; and Sergey F. Gimelshein, *University of Southern California* (**19**, 2, p. 235) Article

T05-030 Integral Solutions of Droplet Freezing Problems in Hypersonic Melting Ablation. Tse-Fou Zien, *U.S. Naval Surface Warfare Center* (**19**, 2, p. 245) Technical Note based on AIAA Paper 2004-0167

T05-031 Mist Transpiration Cooling System Using Open-Cellular Porous Materials. Kouichi Kamiuto, Jun Andou, Takeshi Miyanaga, and Scuichi Taniyama, *Oita University, Japan* (**19**, 2, p. 250) Technical Note

T05-032 Corrections Based on Two-Dimensional Fin Analysis of Tip Conditions. Dwight C. Look and Arvind Krishnan, *University of Missouri–Rolla* (**19**, 2, p. 251) Technical Note

T05-033 Radiative Ignition and Extinction Dynamics of Energetic Solids. J. W. Weber, M. Q. Brewster, and K. C. Tang, *University of Illinois* (**19**, 3, p. 257) Article

T05-034 Experimental and Numerical Study of Pyrolysis Gas Pressure in Ablating Test Piece. Toshiyuki Suzuki, *Japan Aerospace Exploration Agency, Japan*; Keisuke Sawada, *Tohoku University, Japan*; Tetsuya Yamada and Yoshifumi Inatani, *Japan Aerospace Exploration Agency, Japan* (**19**, 3, p. 266) Article based on AIAA Paper 2003-4045

T05-035 Combustion of Moving Droplets and Suspended Droplets: Transient Numerical Results. Daniel N. Pope, Damon Howard, Kun Lu, and George Gogos, *University of Nebraska-Lincoln* (**19**, 3, p. 273) Article

T05-036 Investigation of Soot Combustion in Underexpanded Jet Plume Flows. Kamal Viswanath, Kenneth S. Brentner, Deborah A. Levin, and S. F. Gimelshein, *Pennsylvania State University* (**19**, 3, p. 282) Article based on AIAA Paper 2004-1350

T05-037 Absorption Spectroscopy for Temperature Measurement Behind Shock Waves at Super-Orbital Velocity. Atsushi Matsuda, *University of Tokyo, Japan*; Kazuhisa Fujita, *The Institute of Space Technology and Aeronautics, Japan*; Shunichi Sato and Takashi Abe, *The Institute of Space and Astronautical Science, Japan* (**19**, 3, p. 294) Article based on AIAA Paper 2003-3784

T05-038 Transport Properties for the Chemical Oxygen-Iodine Laser. Drew A. Copeland, *The Boeing Company* (**19**, 3, p. 300) Article based on AIAA Paper 2004-2261

T05-039 Evaluation of Macroscopic Properties in the Direct Simulation Monte Carlo Method. Quanhua Sun and Iain D. Boyd, *University of Michigan* (**19**, 3, p. 329) Article

T05-040 Numerical Simulation of Low-Speed Gas Flows in a Microfluidic System. Chan H. Chung, *Daegu University, South Korea* (**19**, 3, p. 336) Article based on AIAA Paper 2004-2675

T05-041 Estimation of Microwave Radiation Intensity from a Multilayered Cloud Model. V. Swaminathan, *Indian Institute of Technology, India*; R. M. Gairola, *Science Applications Centre, India*; C. Balaji and S. P. Venkateshan, *Indian Institute of Technology, India* (**19**, 3, p. 343) Article

T05-042 Reverse Monte Carlo Simulations of Light Pulse Propagation Within Three-Dimensional Media. Xiaodong Lu and Pei-feng Hsu, *Florida Institute of Technology* (**19**, 3, p. 353) Article based on AIAA Paper 2004-2680

T05-043 Partially Coherent Spectral Transmittance of Dielectric Thin Films with Rough Surfaces. Bong Jae Lee, Vinh P. Khuu, and Zhuomin Zhang, *Georgia Institute of Technology* (**19**, 3, p. 360) Article based on AIAA Paper 2004-2466

T05-044 Design of Experiments for Thermal Characterization of Metallic Foam. Paul E. Crittenden and Kevin D. Cole, *University of Nebraska* (**19**, 3, p. 367) Article

T05-045 Simulation of Electrical and Thermal Behavior of Conductive Polymer Composites Heating Elements. Guillaume Droval, Patrick Glouannec, Jean-François Feller, and Patrick Salagnac, *Université de Bretagne Sud, France* (**19**, 3, p. 375) Article

T05-046 Modeling Transient Conduction in Enclosed Regions Between Isothermal Boundaries of Arbitrary Shape. Peter M. Teertstra, M. Michael Yovanovich, and J. Richard Culham, *University of Waterloo, Canada* (**19**, 3, p. 382) Article based on AIAA Paper 2000-2582

T05-047 Estimation of Multiple Heat Sources in Two-Dimensional Heat Conduction Problems. Ching-yu Yang, *National Kaohisung University of Applied Sciences, Taiwan (ROC)* (**19**, 3, p. 388) Article

T05-048 Fluid Flow in Axial Reentrant Grooves with Application to Heat Pipes. Scott K. Thomas and Vikrant C. Damle, *Wright State University* (**19**, 3, p. 395) Article based on AIAA Paper 2004-2177

T05-049 Numerical Model for Bridgman-Stockbarger Crystal Growth with a Magnetic Field. Xianghong Wang and Nancy Ma, *North Carolina State University* (**19**, 3, p. 406) Article

T05-050 Aircraft Plume Infrared Signature in Nonafterburning Mode. Shripad P. Mahulikar, G. A. Rao, Shrikrishna K. Sane, and Anil G. Marathe, *Indian Institute of Technology Bombay, India* (**19**, 3, p. 413) Technical Note

T05-051 Coupling Heat Transfer and Fluid Flow Solvers for Multidisciplinary Simulations. Qingyun Liu, Edward A. Luke, and Pasquale Cinnella, *Mississippi State University* (**19**, 4, p. 417) Article based on AIAA Paper 2004-0996

T05-052 Computation and Experiment of a Nonequilibrium Nozzle Flow of Arc-heated Air. Ken-ichi Abe, Tsuyoshi Kameyama, and Hisashi Kihara, *Kyushu University, Japan*; Michio Nishida, *Sojo University, Japan*; Katsuhiro Ito and Hideyuki Tanno, *Space Propulsion Research Center, Japan Aerospace Exploration Agency, Japan* (**19**, 4, p. 428) Article

T05-053 Viscous Effects on Cooled Pitot Tubes in Hypersonic Low Reynolds Number Flows. George R. Inger, *Iowa State University* (**19**, 4, p. 435) Article based on AIAA Paper 2004-2682

T05-054 Numerical Model for Spray-Wall Impaction and Heat Transfer at Atmospheric Conditions. Roy J. Issa, *West Texas A&M University*; and Shi-Chune Yao, *Carnegie Mellon University* (**19**, 4, p. 441) Article

T05-055 Heat Transfer on Flat Surface Impinged by an Underexpanded Sonic Jet. Man Sun Yu, *Yonsei University, South Korea*; Byung Gi Kim, *LG Cable Ltd., South Korea*; and Hyung Hee Cho, *Yonsei University, South Korea* (**19**, 4, p. 448) Article based on AIAA Paper 2004-490

T05-056 Direct, Continuous Condensation of Steam in Flowing Water. Jim A. Clark and Ryan W. Brandt, *Pratt & Whitney Space Propulsion* (**19**, 4, p. 455) Article based on AIAA Paper 2004-4003

T05-057 Enhanced Heat-Source Cooling by Flow Pulsation and Porous Block. Po-Chuan Huang, Shy-Her Nian, and Chao-Fu Yang, *National Taipei University of Technology, Taiwan (ROC)* (**19**, 4, p. 460) Article

T05-058 Review of Regenerative Adsorption Heat Pumps. Michael A. Lambert and Benjamin J. Jones, *San Diego State University* (**19**, 4, p. 471) Article based on AIAA Paper 2003-0514

T05-059 Two-Phase Zero-Gravity Pressure Drop Predictions from Single-Phase One-g Data. Kenneth Marsden, *Argonne National Laboratory-West*; Cable Kurwitz and Frederick R. Best, *Texas A&M University* (**19**, 4, p. 486) Article

T05-060 Analysis of Supercritical Startup of Cryogenic Heat Pipes with Parasitic Heat Loads. Paulo Couto, *Federal University of Rio de Janeiro, Brazil*; Jay M. Ochterbeck, *Clemson University*; and Marcia B. Mantelli, *Federal University of Santa Catarina, Brazil* (**19**, 4, p. 497) Article based on AIAA Paper 2002-3095

T05-061 Investigation on Startup Behaviors of a Loop Heat Pipe. Hongxing Zhang and Guiping Lin, *Beihang University, China (PRC)*; Ting Ding, Wei Yao, and Xingguo Shao, *Beijing Institute of Spacecraft System Engineering, China (PRC)*; R. G. Sudakov and Y. F. Maidanik, *Russian Academy of Sciences, Russia* (**19**, 4, p. 509) Article

T05-062 Experimental Study of a Reversible Loop Heat Pipe. Bonghun Kim, *Daegu University, South Korea*; and G. P. Peterson, *Rensselaer Polytechnic Institute* (**19**, 4, p. 519) Article

T05-063 Conduction Shape Factor Models for Three-Dimensional Enclosures. Peter M. Teertstra, M. Michael Yovanovich, and J. Richard Culham, *University of Waterloo, Canada* (**19**, 4, p. 527) Article based on AIAA Paper 2003-159

T05-064 Identify the Interfacial Configurations in a Multiple Region Domain Problem. Cheng-Hung Huang and Chen-Chung Shih, *National Cheng Kung University, Taiwan (ROC)* (**19**, 4, p. 533) Article

T05-065 Model of Tellurium- and Zinc-Doped Indium Antimonide Solidification in Space. Alexei Churilov and Aleksandar G. Ostrogorsky, *Rensselaer Polytechnic Institute* (**19**, 4, p. 542) Article based on AIAA Paper 2004-1309

T05-066 Validity of Hybrid Models for the Bidirectional Reflectance of Coated Rough Surfaces. Q. Z. Zhu, H. J. Lee, and Z. M. Zhang, *Georgia Institute of Technology* (**19**, 4, p. 548) Article based on AIAA Paper 2004-2679

T05-067 Modeling Radiative Properties of Silicon with Coatings and Comparison with Reflectance Measurements. Bong Jae Lee and Zhuomin Zhang, *Georgia Institute of Technology*; Edward A. Early, David P. DeWitt, and Benjamin K. Tsai, *National Institute of Standards and Technology* (**19**, 4, p. 558) Article

T05-068 Recombination Coefficients and Spectral Emissivity of Silicon Carbide-Based Thermal Protection Materials. Sergej Pidan, Monika Auweter-Kurtz, Georg Herdrich, and Markus Fertig, *University of Stuttgart, Germany* (**19**, 4, p. 566) Article based on AIAA Paper 2004-2274

T05-069 Transient Radiative Heat Transfer from a Plasma Produced by a Capillary Discharge. Malay K. Das, Stefan T. Thynell, Jianquan Li, and Thomas A. Litzinger, *Pennsylvania State University* (**19**, 4, p. 572) Article

T05-070 Geometric Approach to Laminar Convection. Volfango Bertola, *The University of Edinburgh, Great Britain*; and Emilio Cafaro, *Politecnico di Torino, Italy* (**19**, 4, p. 581) Technical Note

T05-071 Heat-Transfer Coefficient for a Long Fin Cooled by Convection and Radiation. Donald W. Mueller and Hosni I. Abu-Mulaweh, *Indiana University-Purdue University Fort Wayne* (**19**, 4, p. 583) Technical Note based on AIAA Paper 2005-0957

T05-072 Numerically Stabilizing Ill-Posed Moving Surface Problems Through Heat Rate Sensors. Jay I. Frankel, *University of Tennessee*; and Jack L. Lawless, *Redwood Scientific Inc.* (**19**, 4, p. 587) Technical Note

T05-073 Thermodynamic Properties of the Low Martian Atmosphere. H. F. Nelson, *University of Missouri–Rolla* (**19**, 4, p. 592) Technical Note

T05-074 Analytical Solution for Hyperbolic Heat Conduction in a Hollow Sphere. Fangming Jiang, *University of Aveiro, Portugal*; and Antonio Sousa, *University of New Brunswick, Canada* (**19**, 4, p. 595) Technical Note
