JOURNAL OF THERMOPHYSICS AND HEAT TRANSFER
Volume 19, No. 4, October–December 2005

2005 *Journal of Thermophysics and Heat Transfer* Index

How to Use the Index

In the Subject Index, pages 600–602, each technical paper is listed under a maximum of three appropriate headings. Note the locating number in boldface type preceding each paper title, and use that number to find the paper in the Chronological Index. The Author Index, page 603, lists all authors associated with a given technical paper. The locating numbers are identical to those in the Subject Index. The Chronological Index, pages 604–606, also lists all papers by their locating numbers. This listing contains titles, authors and their affiliations, and volume, issue number, and page where the paper appeared. It also gives the AIAA paper number, if any, on which the article was based. Comments, Replies, and Errata are listed directly beneath the paper to which they refer. If the paper to which they refer was published prior to 2005, that paper also will appear in both the Subject and Chronological Indexes. Authors of Comments also are listed in the Author Index.

Subject Index

AIRCRAFT TECHNOLOGY, CONVENTIONAL, STOL/VTOL

Aerodynamics

T05-008 Numerical Investigation of High Reynolds Number Flows over Square and Circular Cylinders
T05-072 Numerically Stabilizing Ill-Posed Moving Surface Problems Through Heat Rate Sensors

Stealth

T05-050 Aircraft Plume Infrared Signature in Nonafterburning Mode
T05-014 Skin-Temperature Prediction of Aircraft Rear Fuselage with Multimode Thermal Model

ENERGY

Rotating Machinery

T05-004 Heat Transfer Prediction of Rotating Rectangular Channels Using Reynolds Stress Model

Solar Power

T05-058 Review of Regenerative Adsorption Heat Pumps

Thermoelectric

T05-045 Simulation of Electrical and Thermal Behavior of Conductive Polymer Composites Heating Elements

FLUID DYNAMICS

Boundary Layers and Heat Transfer-Laminar

T05-070 Geometric Approach to Laminar Convection
T05-016 Collision Integrals for Ion-Neutral Interactions of Air and Argon
T05-023 Fluid Flow Around and Heat Transfer From Elliptical Cylinders: Analytical Approach

Boundary-Layer Stability and Transition

T05-018 Influence of Wake Passing Frequency and Elevated Turbulence Intensity on Transition.
T05-019 Transition in Low-Pressure Turbines: Effects of Unsteady Acceleration and Turbulence Intensity

Computational Fluid Dynamics

T05-011 Semiconductor Crystal Growth by Modified Vertical Gradient Freezing with Electromagnetic Stirring
T05-004 Heat Transfer Prediction of Rotating Rectangular Channels Using Reynolds Stress Model
T05-013 Hydrodynamic Study of High Speed Flow and Heat Transfer Through a Microchannel
T05-008 Numerical Investigation of High Reynolds Number Flows over Square and Circular Cylinders
T05-024 Modeling the Floating Zone: Instabilities in the Half Zone and Full Zone
T05-036 Investigation of Soot Combustion in Underexpanded Jet Plume Flows
T05-038 Transport Properties for the Chemical Oxygen-Iodine Laser
T05-049 Numerical Model for Bridgman-Stockbarger Crystal Growth with a Magnetic Field
T05-051 Coupling Heat Transfer and Fluid Flow Solvers for Multidisciplinary Simulations

Hydrodynamics

T05-048 Fluid Flow in Axial Reentrant Grooves with Application to Heat Pipes
T05-023 Fluid Flow Around and Heat Transfer From Elliptical Cylinders: Analytical Approach
T05-022 Alternative Fragmentation Theory for a Melt Droplet

Hypersonic Flow

T05-002 Impact of Flowfield–Radiation Coupling on Aeroheating for Titan Aerocapture
T05-013 Hydrodynamic Study of High Speed Flow and Heat Transfer Through a Microchannel
T05-010 Quantifying Irreversible Losses for Magnetohydrodynamic Flow Analysis and Design Integration
T05-036 Investigation of Soot Combustion in Underexpanded Jet Plume Flows
T05-052 Computation and Experiment of a Nonequilibrium Nozzle Flow of Arc-heated Air
T05-053 Viscous Effects on Cooled Pitot Tubes in Hypersonic Low Reynolds Number Flows
T05-029 Quasi-Classical Trajectory Modeling of OH Production in Direct Simulation Monte Carlo

Inlet, Nozzle, Diffuser, and Channel Flows

T05-052 Computation and Experiment of a Nonequilibrium Nozzle Flow of Arc-heated Air
T05-040 Numerical Simulation of Low-Speed Gas Flows in a Microfluidic System

Jets, Wakes, and Viscid-Inviscid Flow Interactions

T05-019 Transition in Low-Pressure Turbines: Effects of Unsteady Acceleration and Turbulence Intensity
T05-018 Influence of Wake Passing Frequency and Elevated Turbulence Intensity on Transition

Multiphase Flows

T05-009 Turbulent Film Condensation on an Isothermal Sphere
T05-036 Investigation of Soot Combustion in Underexpanded Jet Plume Flows

Plasmadynamics and MHD

T05-069 Transient Radiative Heat Transfer from a Plasma Produced by a Capillary Discharge
T05-010 Quantifying Irreversible Losses for Magnetohydrodynamic Flow Analysis and Design Integration

Rarefied Flows

T05-001 Application of Pressure-Sensitive Paints to Low-Pressure Range
T05-040 Numerical Simulation of Low-Speed Gas Flows in a Microfluidic System
T05-029 Quasi-Classical Trajectory Modeling of OH Production in Direct Simulation Monte Carlo
T05-039 Evaluation of Macroscopic Properties in the Direct Simulation Monte Carlo Method

Reacting Flows and Combustion

T05-035 Combustion of Moving Droplets and Suspended Droplets: Transient Numerical Results
T05-051 Coupling Heat Transfer and Fluid Flow Solvers for Multidisciplinary Simulations

Shock Waves and Detonations

T05-022 Alternative Fragmentation Theory for a Melt Droplet

Subsonic Flow

T05-040 Numerical Simulation of Low-Speed Gas Flows in a Microfluidic System

Unsteady Flows

T05-057 Enhanced Heat-Source Cooling by Flow Pulsation and Porous Block

Vortices

T05-008 Numerical Investigation of High Reynolds Number Flows over Square and Circular Cylinders

GUIDANCE, CONTROL, AND DYNAMICS TECHNOLOGY

Optimization Techniques

T05-064 Identify the Interfacial Configurations in a Multiple Region Domain Problem

INTERDISCIPLINARY TOPICS

Analytical and Numerical Methods

T05-039 Evaluation of Macroscopic Properties in the Direct Simulation Monte Carlo Method
T05-074 Analytical Solution for Hyperbolic Heat Conduction in a Hollow Sphere

Atmospheric and Space Sciences

T05-073 Thermodynamic Properties of the Low Martian Atmosphere

Lasers and Laser Applications

T05-038 Transport Properties for the Chemical Oxygen-Iodine Laser

Sensor Systems

T05-001 Application of Pressure-Sensitive Paints to Low-Pressure Range

LAUNCH VEHICLE AND MISSILE (LV/M) TECHNOLOGY

Propulsion and Propellant Systems

T05-056 Direct, Continuous Condensation of Steam in Flowing Water

PROPULSION

Engine Cooling and Heat Transfer

T05-020 Jet Impingement Heat Transfer in Rotating Channels with Staggered Extraction Flow
T05-006 Impingement Heat Transfer Part I: Linearly Stretched Arrays of Holes

Gas Turbine Engines

T05-007 Impingement Heat Transfer, Part II: Effect of Streamwise Pressure Gradient
T05-020 Jet Impingement Heat Transfer in Rotating Channels with Staggered Extraction Flow
T05-018 Influence of Wake Passing Frequency and Elevated Turbulence Intensity on Transition.
T05-019 Transition in Low-Pressure Turbines: Effects of Unsteady Acceleration and Turbulence Intensity

Ignition

T05-033 Radiative Ignition and Extinction Dynamics of Energetic Solids

Solid Rocket Motors

T05-033 Radiative Ignition and Extinction Dynamics of Energetic Solids

Turbomachinery

T05-005 Heat Transfer in Rotating Rectangular Channels with V-Shaped and Angled Ribs
T05-056 Direct, Continuous Condensation of Steam in Flowing Water

SPACE TECHNOLOGY

Spacecraft Thermal Management

T05-058 Review of Regenerative Adsorption Heat Pumps
T05-017 Loop Heat Pipe for Spacecraft Thermal Control, Part 2: Ambient Condition Tests
T05-062 Experimental Study of a Reversible Loop Heat Pipe

THERMOPHYSICS AND HEAT TRANSFER

Ablation, Pyrolysis, Thermal Decomposition and Degradation

T05-030 Integral Solutions of Droplet Freezing Problems in Hypersonic Melting Ablation
T05-069 Transient Radiative Heat Transfer from a Plasma Produced by a Capillary Discharge
T05-034 Experimental and Numerical Study of Pyrolysis Gas Pressure in Ablating Test Piece

Aerothermodynamics/Thermal Protection

T05-034 Experimental and Numerical Study of Pyrolysis Gas Pressure in Ablating Test Piece
T05-072 Numerically Stabilizing Ill-Posed Moving Surface Problems Through Heat Rate Sensors
T05-037 Absorption Spectroscopy for Temperature Measurement Behind Shock Waves at Super-Orbital Velocity
T05-016 Collision Integrals for Ion-Neutral Interactions of Air and Argon
T05-044 Design of Experiments for Thermal Characterization of Metallic Foam
T05-007 Impingement Heat Transfer, Part II: Effect of Streamwise Pressure Gradient
T05-006 Impingement Heat Transfer Part I: Linearly Stretched Arrays of Holes
T05-003 Numerical Simulation of Galileo Probe Entry Flowfield with Radiation and Ablation
T05-002 Impact of Flowfield–Radiation Coupling on Aeroheating for Titan Aerocapture
T05-068 Recombination Coefficients and Spectral Emissivity of Silicon Carbide-Based Thermal Protection Materials
T05-055 Heat Transfer on Flat Surface Impinged by an Underexpanded Sonic Jet
T05-031 Mist Transpiration Cooling System Using Open-Cellular Porous Materials

Boiling/Condensation

T05-056 Direct, Continuous Condensation of Steam in Flowing Water
T05-059 Two-Phase Zero-Gravity Pressure Drop Predictions from Single-Phase One-g Data
T05-012 Cost-Effective Techniques for Enhancing Heat Transfer Rate in Steam Condensation
T05-021 Post-CHF Axial- and Swirl-Flow Heat Transfer in Small Horizontal Tubes

Computational Heat Transfer

T05-009 Turbulent Film Condensation on an Isothermal Sphere
T05-024 Modeling the Floating Zone: Instabilities in the Half Zone and Full Zone
T05-025 Convection and Solidification in Constant and Oscillating Thermal Gradients: Measurements and Simulations
T05-013 Hydrodynamic Study of High Speed Flow and Heat Transfer Through a Microchannel
T05-011 Semiconductor Crystal Growth by Modified Vertical Gradient Freezing with Electromagnetic Stirring
T05-003 Numerical Simulation of Galileo Probe Entry Flowfield with Radiation and Ablation
T05-004 Heat Transfer Prediction of Rotating Rectangular Channels Using Reynolds Stress Model
T05-014 Skin-Temperature Prediction of Aircraft Rear Fuselage with Multimode Thermal Model
T05-035 Combustion of Moving Droplets and Suspended Droplets: Transient Numerical Results
T05-042 Reverse Monte Carlo Simulations of Light Pulse Propagation within Three-Dimensional Media
T05-050 Aircraft Plume Infrared Signature in Nonafterburning Mode
T05-053 Viscous Effects on Cooled Pitot Tubes in Hypersonic Low Reynolds Number Flows
T05-064 Identify the Interfacial Configurations in a Multiple Region Domain Problem
T05-066 Validity of Hybrid Models for the Bidirectional Reflectance of Coated Rough Surfaces
T05-057 Enhanced Heat-Source Cooling by Flow Pulsation and Porous Block
T05-065 Model of Tellurium- and Zinc-Doped Indium Antimonide Solidification in Space

T05-051 Coupling Heat Transfer and Fluid Flow Solvers for Multidisciplinary Simulations
T05-054 Numerical Model for Spray-Wall Impaction and Heat Transfer at Atmospheric Conditions

Electronics Cooling

T05-057 Enhanced Heat-Source Cooling by Flow Pulsation and Porous Block

Forced Convection

T05-070 Geometric Approach to Laminar Convection
T05-035 Combustion of Moving Droplets and Suspended Droplets: Transient Numerical Results
T05-020 Jet Impingement Heat Transfer in Rotating Channels with Staggered Extraction Flow
T05-023 Fluid Flow Around and Heat Transfer From Elliptical Cylinders: Analytical Approach
T05-005 Heat Transfer in Rotating Rectangular Channels with V-Shaped and Angled Ribs
T05-006 Impingement Heat Transfer Part I: Linearly Stretched Arrays of Holes
T05-007 Impingement Heat Transfer, Part II: Effect of Streamwise Pressure Gradient
T05-009 Turbulent Film Condensation on an Isothermal Sphere
T05-021 Post-CHF Axial- and Swirl-Flow Heat Transfer in Small Horizontal Tubes
T05-031 Mist Transpiration Cooling System Using Open-Cellular Porous Materials
T05-055 Heat Transfer on Flat Surface Impinged by an Underexpanded Sonic Jet

Heat Conduction

T05-074 Analytical Solution for Hyperbolic Heat Conduction in a Hollow Sphere
T05-026 Adaptive-Weighting Input-Estimation Approach to Nonlinear Inverse Heat-Conduction Problems
T05-027 Direct and Inverse Solutions of the Hyperbolic Heat Conduction Problems
T05-032 Corrections Based on Two-Dimensional Fin Analysis of Tip Conditions
T05-047 Estimation of Multiple Heat Sources in Two-Dimensional Heat Conduction Problems
T05-045 Simulation of Electrical and Thermal Behavior of Conductive Polymer Composites Heating Elements
T05-064 Identify the Interfacial Configurations in a Multiple Region Domain Problem
T05-046 Modeling Transient Conduction in Enclosed Regions Between Isothermal Boundaries of Arbitrary Shape
T05-063 Conduction Shape Factor Models for Three-Dimensional Enclosures
T05-072 Numerically Stabilizing Ill-Posed Moving Surface Problems Through Heat Rate Sensors

Heat Pipes

T05-060 Analysis of Supercritical Startup of Cryogenic Heat Pipes with Parasitic Heat Loads
T05-048 Fluid Flow in Axial Reentrant Grooves with Application to Heat Pipes
T05-062 Experimental Study of a Reversible Loop Heat Pipe
T05-017 Loop Heat Pipe for Spacecraft Thermal Control, Part 2: Ambient Condition Tests
T05-061 Investigation on Startup Behaviors of a Loop Heat Pipe

Laser Interaction

T05-042 Reverse Monte Carlo Simulations of Light Pulse Propagation within Three-Dimensional Media

Melting/Solidification

T05-030 Integral Solutions of Droplet Freezing Problems in Hypersonic Melting Ablation
T05-049 Numerical Model for Bridgman-Stockbarger Crystal Growth with a Magnetic Field
T05-073 Thermodynamic Properties of the Low Martian Atmosphere
T05-024 Modeling the Floating Zone: Instabilities in the Half Zone and Full Zone
T05-025 Convection and Solidification in Constant and Oscillating Thermal Gradients: Measurements and Simulations
T05-011 Semiconductor Crystal Growth by Modified Vertical Gradient Freezing with Electromagnetic Stirring
T05-065 Model of Tellurium- and Zinc-Doped Indium Antimonide Solidification in Space

Natural Convection

T05-025 Convection and Solidification in Constant and Oscillating Thermal Gradients: Measurements and Simulations
T05-049 Numerical Model for Bridgman-Stockbarger Crystal Growth with a Magnetic Field
T05-071 Heat-Transfer Coefficient for a Long Fin Cooled by Convection and Radiation

Radiation in Participating Media

T05-050 Aircraft Plume Infrared Signature in Nonafterburning Mode
T05-042 Reverse Monte Carlo Simulations of Light Pulse Propagation within Three-Dimensional Media
T05-069 Transient Radiative Heat Transfer from a Plasma Produced by a Capillary Discharge
T05-041 Estimation of Microwave Radiation Intensity from a Multilayered Cloud Model
T05-028 Radiative Characteristics of Beds of Spheres Containing an Absorbing and Scattering Medium
T05-003 Numerical Simulation of Galileo Probe Entry Flowfield with Radiation and Ablation
T05-015 Analysis of Rocket Plume Base Heating by Using Backward Monte-Carlo Method

Radiation Interchange Between Surfaces

T05-014 Skin-Temperature Prediction of Aircraft Rear Fuselage with Multimode Thermal Model
T05-043 Partially Coherent Spectral Transmittance of Dielectric Thin Films with Rough Surfaces
T05-071 Heat-Transfer Coefficient for a Long Fin Cooled by Convection and Radiation
T05-067 Modeling Radiative Properties of Silicon with Coatings and Comparison with Reflectance Measurements
T05-066 Validity of Hybrid Models for the Bidirectional Reflectance of Coated Rough Surfaces

Thermal Control

T05-032 Corrections Based on Two-Dimensional Fin Analysis of Tip Conditions
T05-060 Analysis of Supercritical Startup of Cryogenic Heat Pipes with Parasitic Heat Loads
T05-012 Cost-Effective Techniques for Enhancing Heat Transfer Rate in Steam Condensation
T05-058 Review of Regenerative Adsorption Heat Pumps
T05-031 Mist Transpiration Cooling System Using Open-Cellular Porous Materials
T05-059 Two-Phase Zero-Gravity Pressure Drop Predictions from Single-Phase One-g Data

Thermal Modeling and Analysis

T05-059 Two-Phase Zero-Gravity Pressure Drop Predictions from Single-Phase One-g Data
T05-065 Model of Tellurium- and Zinc-Doped Indium Antimonide Solidification in Space
T05-054 Numerical Model for Spray-Wall Impaction and Heat Transfer at Atmospheric Conditions
T05-027 Direct and Inverse Solutions of the Hyperbolic Heat Conduction Problems
T05-022 Alternative Fragmentation Theory for a Melt Droplet
T05-030 Integral Solutions of Droplet Freezing Problems in Hypersonic Melting Ablation
T05-063 Conduction Shape Factor Models for Three-Dimensional Enclosures
T05-046 Modeling Transient Conduction in Enclosed Regions Between Isothermal Boundaries of Arbitrary Shape
T05-052 Computation and Experiment of a Nonequilibrium Nozzle Flow of Arc-heated Air
T05-047 Estimation of Multiple Heat Sources in Two-Dimensional Heat Conduction Problems
T05-045 Simulation of Electrical and Thermal Behavior of Conductive Polymer Composites Heating Elements
T05-067 Modeling Radiative Properties of Silicon with Coatings and Comparison with Reflectance Measurements
T05-062 Experimental Study of a Reversible Loop Heat Pipe

Thermochemistry and Chemical Kinetics

T05-029 Quasi-Classical Trajectory Modeling of OH Production in Direct Simulation Monte Carlo
T05-002 Impact of Flowfield–Radiation Coupling on Aeroheating for Titan Aerocapture
T05-033 Radiative Ignition and Extinction Dynamics of Energetic Solids
T05-068 Recombination Coefficients and Spectral Emissivity of Silicon Carbide-Based Thermal Protection Materials

Thermophysical Properties

T05-068 Recombination Coefficients and Spectral Emissivity of Silicon Carbide-Based Thermal Protection Materials
T05-044 Design of Experiments for Thermal Characterization of Metallic Foam
T05-016 Collision Integrals for Ion-Neutral Interactions of Air and Argon
T05-043 Partially Coherent Spectral Transmittance of Dielectric Thin Films with Rough Surfaces
T05-037 Absorption Spectroscopy for Temperature Measurement Behind Shock Waves at Super-Orbital Velocity
T05-067 Modeling Radiative Properties of Silicon with Coatings and Comparison with Reflectance Measurements
T05-066 Validity of Hybrid Models for the Bidirectional Reflectance of Coated Rough Surfaces
T05-073 Thermodynamic Properties of the Low Martian Atmosphere
T05-038 Transport Properties for the Chemical Oxygen-Iodine Laser
