

A.I.Ch.E. JOURNAL

CHEMICAL ENGINEERING RESEARCH AND DEVELOPMENT /

JUNE 1958

CONTENTS

Heat Transfer to Water in Turbulent Flow in Internally Heated Annuli	Ralph P. Stein and William Begell
Velocity Profile for Fully Developed Turbulent Flow in a Pipe	Thomas J. Hanratty and Duane L. Flint
Calculation of the Diffusion Coefficient of Dilute Gases and of the Self-diffusion Coefficient of Dense Gases	John C. Slattery and R. Byron Bird
Kinetic Studies of Carbonation Reactions Using Radioactive Tracers	D. M. Himmelblau and A. L. Babb
Wall Effect for the Fall of Single Drops	J. R. Strom and R. C. Kintner
Mathematical Development of Tube Loading in Horizontal Condensers	D. Q. Kern
Mixing of Fluids Flowing Through Beds of Packed Solids	E. A. Ebach and R. R. White
The Role of Porosity in Filtration—Part 3: Variable-pressure-variable-rate Filtration	F. M. Tiller
Prediction of Resistance in Constant-Pressure Cake Filtration	F. A. Kottwitz and D. R. Boylan
Individual Film Coefficients of Mass Transfer in Liquid-liquid Extraction	G. C. Smith and R. B. Beckmann
Momentum and Mass Transfer by Eddy Diffusion in a Wetted-wall Channel	A. M. Dhanak
Viscous Flow in Multiparticle Systems: Slow Motion of Fluids Relative to Beds of Spherical Particles	John Happel
Estimation of the Stage Efficiency of Simple, Agitated Vessels Used in Mixer-settler Extractors	R. E. Treybal
Flow of Two-phase Carbon Dioxide Through Orifices	James C. Hesson and Ralph E. Peck
Heterogeneous Phase Equilibria of the Methane-hydrogen Sulfide System	J. P. Kohn and F. Kurata
Heat Transfer in Film Condensation	Eric Baer and J. M. McKelvey
Gas Absorption Accompanied by a Liquid-phase Chemical Reaction	E. R. Gilliland, R. F. Baddour, and P. L. T. Brian
Effect of Liquid Mixing on the Performance of Bubble Trays	A. S. Foss, J. A. Gerster, and R. L. Pigford
Correlation of Local Velocities in Tubes, Annuli, and Parallel Plates	R. R. Rothfus, J. E. Walker, and G. A. Whan
