

The A.I.Ch.E. Journal, an official publication of the American Institute of Chemical Engineers, is devoted in the main to theoretical developments and research in chemical engineering and allied branches of engineering and science. Manuscripts should be submitted to the New York office.

PUBLISHER

F. J. Van Antwerpen

EDITOR

Harding Bliss

ASSISTANT PUBLISHER

L. T. Dupree

MANAGING EDITOR

ADVISORY BOARD

C. M. Cooper	R. H. Newton
O. E. Dwyer	R. L. Pigford
W. C. Edmister	E. L. Piret
E. R. Gilliland	J. M. Smith
A. N. Hixson	Theodore Vermeulen
H. F. Johnstone	R. R. White
W. R. Marshall, Jr.	R. H. Wilhelm

Publication Office, 215 Canal Street, Manchester, New Hampshire. Published quarterly in March, June, September, and December by the American Institute of Chemical Engineers, 25 West 45 Street, New York 36, New York. Manuscripts and other communications should be sent to the New York office. Correspondence with the editor may be addressed to him at Yale University, 225 Prospect Street, New Haven 11, Connecticut. Statements and opinions in the A.I.Ch.E. Journal are those of the contributors, and the American Institute of Chemical Engineers assumes no responsibility for them. Subscriptions: one year, member \$6.00; nonmember \$12.00; industrial libraries \$25.00; additional yearly postage, Canada 50 cents, Pan American Union \$1.50, other foreign \$2.00 (foreign subscriptions payable in advance). Single copies: \$4.00. Second-class mail. Postage paid at Manchester, New Hampshire. Copyright 1960 by the American Institute of Chemical Engineers. National headquarters of A.I.Ch.E. is concerned about nondelivery of copies of the A.I.Ch.E. Journal and urgently requests subscribers to give prompt notification of any change of address. Sixty days must be allowed for changes to be made in the records.

Conservation and Engineering: III. Food Problems	1
Maximum Stable Droplets in Dispersoids	R. A. Mugele 3
Evaporation from Drops Containing Dissolved Solids	D. H. Charlesworth and W. R. Marshall, Jr. 9
The Application of Boundary-Layer Theory to Power-Law Pseudoplastic Fluids: Similar Solutions	W. R. Schowalter 24
Heat and Mass Transfer in Spray Drying	Jan Dlouhy and W. H. Gauvin 29
The Effect of Dynamic Surface Tension on Nucleate Boiling Coefficients	P. D. Jontz and J. E. Myers 34
Thermodynamic Behavior of Hydrogen-Hydrocarbon Mixtures	R. L. Motard and E. I. Organick 39
The Constant-Volume Heat Capacities of Gaseous Perfluorocyclobutane and Propylene	Noel De Nevers and Joseph J. Martin 43
The Critical Constants of the Elements	David S. Gates and George Thodos 50
Effect of a Cylindrical Boundary on a Fixed Rigid Sphere in a Moving Viscous Fluid	A. M. Fayon and John Happel 55
Centrifugal Filtration Through Beds of Small Spheres	J. B. Bingeman and Jesse Coates 58
Thermal Conductivity of Packed Beds	William Schotte 63
Calculation of Equilibrium Flash Vaporization Curves by an Integration Method	C. O. Bennett, C. J. Brasket, and J. W. Tierney 67
Heat Transfer Characteristics of Porous Rocks	Daizo Kunii and J. M. Smith 71
Hypothetical Standard States and the Thermodynamics of High-Pressure Phase Equilibria	J. M. Prausnitz 78
The Effects of Superheat and Surface Roughness on Boiling Coefficients	H. M. Kurihara and J. E. Myers 83
Detonation Characteristics of Hydrogen-Oxygen Mixtures	Morton P. Moyle, Richard B. Morrison, and Stuart W. Churchill 92
Studies on Heat Transfer Near Wall Surface in Packed Beds	Sakae Yagi and Daizo Kunii 97
Thermodynamic Consistency of Binary Liquid-Vapor Equilibrium Data When One Component Is Above Its Critical Temperature	S. B. Adler, Leo Friend, R. L. Pigford, and G. M. Rosselli 104
Flow Patterns in Agitated Vessels	A. B. Metzner and J. S. Taylor 109
Density Fluctuations in Fluidized Beds	P. K. Baumgarten and R. L. Pigford 115
Mechanics of Particle Bounce	W. E. Ranz, G. R. Talandis, and Bernard Gutterman 124
Compressibility and Vapor Pressure of Methyl Borate	Richard G. Griskey, Walter E. Gorgas, and Lawrence N. Canjar 128
The Motion of Two Spheres Following Each Other in a Viscous Fluid	John Happel and Robert Pfeffer 129
Photographic Study of Solid-Gas Fluidization	Leopoldo Massimilla and J. W. Westwater 134
Mass Transfer in Liquid-Lithium Systems	William N. Gill, Richard P. Vanek, Robert V. Jelinek, and C. S. Grove, Jr. 139
Mass Transfer Inside Drops	A. I. Johnson and A. E. Hamielec 145
Compression of Liquids	
I. Apparatus and Method of Measurement	Arthur K. Doolittle, Ivan Simon, and Raymond M. Cornish 150
II. Critical Evaluation of New <i>n</i> -Alkane Data: <i>n</i> -Heptane to <i>n</i> -Tetracontane	Arthur K. Doolittle and Dortha B. Doolittle 153
III. Temperature and Molecular Weight Dependence of the Hudleston Parameters for the <i>n</i> -Alkanes	Arthur K. Doolittle and Dortha B. Doolittle 157
Temperature Measurements in a Spherical Field: Transfer Coefficients and Corrections for Thermocouples in Boundary Flows	W. W. Short and B. H. Sage 163
On the Separation of Gas Mixtures in a Jet	Earl E. Gose 168
Communications to the Editor	
Japanese Translations	Robert S. Schechter and Eugene H. Wissler 170
Pseudocritical Constants for Gas Mixtures	L. C. Case and H. C. Weber 171
A Distribution Function for Oil Mixtures and Polymers	Otto Redlich 173
Liquid-side Mass Transfer Coefficients in Packed Towers	H. L. Shulman, Stanley Press, and W. G. Whitehouse 174
Abstracts	
Symposium Series	176
Computer Interchange Program	3M
