

The A.I.Ch.E. Journal, an official publication of the American Institute of Chemical Engineers, is devoted in the main to theoretical developments and research in chemical engineering and allied branches of engineering and science. Manuscripts should be submitted to the New York office.

## PUBLISHER

F. J. Van Antwerpen

## EDITOR

Harding Bliss

## MANAGING EDITOR

Sylvia Fourdrinier

## MANUSCRIPT EDITOR

Barbara Z. Goldsamt

## ADVERTISING MANAGER

P. A. Jolcuvar

## ADVISORY BOARD

C. M. Cooper	R. H. Newton
O. E. Dwyer	R. L. Pigford
W. C. Edmister	E. L. Piret
E. R. Gilliland	J. M. Smith
A. N. Hixson	Theodore Vermeulen
H. F. Johnstone	R. R. White
W. R. Marshall, Jr.	R. H. Wilhelm

Publication Office, 215 Canal Street, Manchester, New Hampshire. Published quarterly in March, June, September, and December by the American Institute of Chemical Engineers, 25 West 45 Street, New York 36, New York. Manuscripts and other communications should be sent to the New York office. Correspondence with the editor may be addressed to him at Yale University, 225 Prospect Street, New Haven 11, Connecticut. Statements and opinions in the *A.I.Ch.E. Journal* are those of the contributors, and the American Institute of Chemical Engineers assumes no responsibility for them. Subscriptions: one year, member \$6.00; nonmember \$12.00; industrial libraries \$25.00; additional yearly postage, Canada 50 cents, Pan American Union \$1.50, other foreign \$2.00 (foreign subscriptions payable in advance). Single copies: \$4.00. Second-class mail. Postage paid at Manchester, New Hampshire. Copyright 1961 by the American Institute of Chemical Engineers. National headquarters of A.I.Ch.E. is concerned about nondelivery of copies of the *A.I.Ch.E. Journal* and urgently requests subscribers to give prompt notification of any change of address. Sixty days must be allowed for changes to be made in the records.

Postmaster: Please send form 3579 to A.I.Ch.E. Journal, 25 West 45 Street, New York 36, N. Y.

Engineering Education—A Graduate Program Only? .....	177
A Comparison of Propane and Carbon Dioxide Solvent Flooding Processes <i>L. W. Holm</i>	179
The P. V. T.-Behavior of Diatomic Substances in Their Gaseous and Liquid States <i>Robert Byrne and George Thodos</i>	185
Heats of Mixing: Alcohol-Aromatic Binary Systems at 25°, 35°, and 45°C. <i>Robert V. Mrazek and H. C. Van Ness</i>	190
Mass Transfer Between Isobutanol and Water in Concurrent Flow Through a Packed Column ..... <i>James A. Leacock and Stuart W. Churchill</i>	196
Slow Compression Crushing of Single Particles of Glass <i>William J. Kenny and Edgar L. Piret</i>	199
Deposition of Aerosol Particles in Fibrous Filters .. <i>D. G. Thomas and C. E. Lapple</i>	203
Effect of Mass Transfer on Solid-Catalyzed Reactions: the Dehydrogenation of Cyclohexane to Benzene .. <i>L. G. Barnett, R. E. C. Weaver, and M. M. Gilkeson</i>	211
Mass Transfer with Liquid Lithium in Circular Conduits <i>William N. Gill, Richard P. Vanek, and C. S. Grove, Jr.</i>	216
Boundary-Layer Behavior on Continuous Solid Surfaces: II. The Boundary Layer on a Continuous Flat Surface ..... <i>B. C. Sakiadis</i>	221
Penetration Theory for Gas Absorption Accompanied by a Second Order Chemical Reaction ..... <i>P. L. T. Brian, J. F. Hurley, and E. H. Hasseltine</i>	226
Two-Phase Concurrent Flow in Packed Beds <i>R. P. Larkins, R. R. White, and D. W. Jeffrey</i>	231
The Effect of Vibration on Natural Convective Mass Transfer <i>Robert Lemlich and Martin R. Levy</i>	240
Effectiveness Factors for Porous Catalysts ..... <i>J. O. Mingle and J. M. Smith</i>	243
Effective Thermal Conductivity in Packed Beds <i>C. D. Gopalarathnam, H. E. Hoelscher, and G. S. Laddha</i>	249
Turbulent Convective Heat and Mass Transfer From Accelerating Particles <i>I. S. Pasternak and W. H. Gauvin</i>	254
The Mechanics of Moving Vertical Fluidized Systems: V. Concurrent Cogravity Flow ..... <i>J. A. Quinn, Leon Lapidus, and J. C. Elgin</i>	260
The Thermal Conductivity of Hydrocarbon Gases at Normal Pressures <i>Dragoslav Misic and George Thodos</i>	264
Volumetric Properties of Gas Mixtures at Low Temperatures and High Pressures by the Burnett Method: the Hydrogen-Methane System <i>William H. Mueller, Thomas W. Leland, Jr., and Riki Kobayashi</i>	267
Membrane Selectivity ..... <i>G. B. Wills and E. N. Lightfoot</i>	273
