

The A.I.Ch.E. Journal, an official publication of the American Institute of Chemical Engineers, is devoted in the main to theoretical developments and research in chemical engineering and allied branches of engineering and science. Manuscripts should be submitted to the New York office.

PUBLISHER

F. J. Van Antwerpen

EDITOR

Harding Bliss

MANAGING EDITOR

Sylvia Fourdrinier

MANUSCRIPT EDITOR

Barbara Z. Goldsamt

ADVISORY BOARD

C. M. Cooper	R. H. Newton
O. E. Dwyer	R. L. Pigford
W. C. Edmister	E. L. Piret
E. R. Gilliland	J. M. Smith
A. N. Hixson	Theodore Vermeulen
W. R. Marshall, Jr.	R. R. White
	R. H. Wilhelm

Publication Office, 215 Canal Street, Manchester, New Hampshire. Published in March, May, July, September, and November by the American Institute of Chemical Engineers, 345 East 47 Street, New York 17, New York. Manuscripts and other communications should be sent to the New York office. Correspondence with the editor may be addressed to him at Yale University, 225 Prospect Street, New Haven 11, Connecticut. Statements and opinions in the A.I.Ch.E. Journal are those of the contributors, and the American Institute of Chemical Engineers assumes no responsibility for them. Subscriptions: one year, member \$6.00; nonmember \$25.00; additional yearly postage, Canada 50 cents, Pan American Union \$1.50, other foreign \$2.00 (foreign subscriptions payable in advance). Single copies: \$6.00. Second-class mail. Postage paid at Manchester, New Hampshire. Copyright 1962 by the American Institute of Chemical Engineers. National headquarters of A.I.Ch.E. is concerned about nondelivery of copies of the A.I.Ch.E. Journal and urgently requests subscribers to give prompt notification of any change of address. Sixty days must be allowed for changes to be made in the records.

Postmaster: Please send form 3579 to A.I.Ch.E. Journal, 345 East 47 Street, New York 17, N. Y.

Dynamic Objectives: II. The Importance of Design	435
Reduction of Iron Oxide in Gas-Conveyed Systems <i>N. J. Themelis and W. H. Gauvin</i>	437
The Role of Porosity in Filtration: Part V. Porosity Variation in Filter Cakes <i>F. M. Tiller and Harrison Cooper</i>	445
Rate Studies of the Decomposition of Ammonia and Methane in a Plasma Jet <i>M. P. Freeman and J. F. Skrivan</i>	450
Prediction of Vapor-Liquid Equilibrium for Polar-Nonpolar Binary Systems <i>R. N. Finch and Matthew Van Winkle</i>	455
A Theoretical Correlation of Spray-Dryer Performance	F. A. Gluckert 460
The Laminar-Turbulent Transition in Nonisothermal Flow of Pseudoplastic Fluids in Tubes	Richard W. Hanks and E. B. Christiansen 467
Maximum Stable Drop Size in Turbulent Flow	C. A. Sleicher, Jr. 471
Low Temperature Ortho-Para Hydrogen Conversion-Kinetic Studies <i>Noriaki Wakao, P. W. Selwood, and J. M. Smith</i>	478
Prediction of Vapor-Liquid Equilibria from the Corresponding States Principle <i>Thomas W. Leland, Jr., Patsy S. Chappellear, and Bernard W. Gamson</i>	482
Particle-Size Effects in the Compression of Powders <i>Coy L. Huffine and Charles F. Bonilla</i>	490
Adsorption of Methane and Hydrogen on Packed Beds of Activated Carbon <i>John J. Geser and Lawrence N. Canjar</i>	494
Ignition Limits for Pilot-Stabilized High-Velocity, Turbulent, Butane-Air Mixtures at Low Pressure	Richard G. Griskey and David H. Archer 498
A Thermodynamic Correlation of Nonpolar Gas Solubilities in Polar, Nonassociated Liquids	Lewis Chinsun Yen and J. J. McKetta, Jr. 501
Liquid Phase Activity Coefficients and Standard State Hypothetical Liquid Fugacities for Hydrocarbons <i>Dwight S. Hoffman, J. Reed Welker, Rowland E. Felt, and James H. Weber</i>	508
A Theoretical Investigation of Natural Convection Effects in Forced Horizontal Flows	William N. Gill and Eduardo del Casal 513
