

The A.I.Ch.E. Journal, an official publication of the American Institute of Chemical Engineers, is devoted in the main to theoretical developments and research in chemical engineering and allied branches of engineering and science.

PUBLISHER

F. J. Van Antwerpen

EDITOR

Harding Bliss

MANAGING EDITOR

Sylvia Fourdriner

ADVERTISING MANAGER

William Chenoweth

MANUSCRIPT EDITOR

Mary Louise Byrd

ADVISORY BOARD

C. M. Cooper	R. H. Newton
O. E. Dwyer	R. L. Pigford
W. C. Edmister	E. L. Piret
E. R. Gilliland	J. M. Smith
A. N. Hixson	Theodore Vermeulen
W. R. Marshall, Jr.	R. R. White
	R. H. Wilhelm

Publication Office, 215 Canal Street, Manchester, New Hampshire. Published in January, March, May, July, September, and November by the American Institute of Chemical Engineers, 345 East 47 Street, New York, New York, 10017. All manuscripts should be submitted only to the New York Office. Correspondence with the editor may be addressed to him at Yale University, 225 Prospect Street, New Haven 11, Connecticut. Statements and opinions in the A.I.Ch.E. Journal are those of the contributors, and the American Institute of Chemical Engineers assumes no responsibility for them. Subscription: one year, member \$6.00; non-member \$25.00; additional yearly postage, Canada 75 cents, Pan American Union \$1.50, other foreign \$2.00 (foreign subscriptions payable in advance). Single copies: \$6.00. Second-class mail. Postage paid at Manchester, New Hampshire. Copyright 1966 by the American Institute of Chemical Engineers. National headquarters of A.I.Ch.E. is concerned about nondelivery of copies of the A.I.Ch.E. Journal and urgently requests subscribers to give prompt notification of any change of address. Sixty days must be allowed for changes to be made in the records.

Postmaster: Please send form 3579 to A.I.Ch.E. Journal, 345 East 47 Street, New York, N. Y. 10017.

Books	834
Laboratory Instruction	835
Effect of Axial Diffusion of Vorticity on Flow Development in Circular Conduits: Part I. Numerical Solutions J. S. Vrentas, J. L. Duda, and K. G. Barger	837
Catalytic Oxidation of Hydrogen—Intrapellet Heat and Mass Transfer J. A. Maymo and J. M. Smith	845
Shape of Liquid Drops Moving in Liquid Media R. M. Wellek, A. K. Agrawal, and A. H. P. Skelland	854
Constitutive Equations for Viscoelastic Fluids for Short Deformation Periods and for Rapidly Changing Flows: Significance of the Deborah Number A. B. Metzner, J. L. White, and M. M. Denn	863
Mass Transfer in Supported Froths .. Walter L. Workman and Seymour Calvert	867
Optimality and Computational Feasibility in Transient Control: Part I. A Modified Criterion for Optimality W. O. Paradis and D. D. Perlmutter	876
Optimality and Computational Feasibility in Transient Control: Part II. Feedback Control of a Distributed Parameter Process W. O. Paradis and D. D. Perlmutter	883
Generalized Couette Flow of an Ellis Fluid Y. D. Wadhwa	890
The Effect of Monomolecular Films on the Rate of Gas Absorption into a Quiescent Liquid R. E. Plevan and J. A. Quinn	894
Measurement of Phase Equilibria at High Pressures by Tracer-Pulse Chromatography D. L. Peterson, Friedrich Helfferich, and Robert J. Carr	903
Laminar Dispersion in Capillaries: Part II. Effect of Inlet Boundary Conditions and Turner Type of System Capacitance William N. Gill and V. Ananthakrishnan	906
Laminar Dispersion in Capillaries: Part III. Experiments in Horizontal Tubes Including Observations on Natural Convection Effects N. S. Reehsinghani, William N. Gill, and Allen J. Barduhn	916
Longitudinal Dispersion Mechanisms in Packed Beds R. E. Babcock, D. W. Green, and R. H. Perry	922
Theoretical Study of Bubble Dynamics in Purely Viscous Fluids Wen-Jei Yang and Hsu-Chieh Yeh	927
Viscosities of Methane and Propane at Low Temperatures and High Pressures E. T. S. Huang, G. W. Swift, and Fred Kurata	932
Prediction of Thermodynamic Properties of Dense Gas Mixtures Containing One or More of the Quantum Gases R. D. Gunn, P. L. Chueh, and J. M. Prausnitz	937
Statistical Models for Surface Renewal in Heat and Mass Transfer: Part I. Dependence of Average Transport Coefficients on Age Distribution L. B. Koppel, R. D. Patel, and J. T. Holmes	941
