

AICHE JOURNAL

MARCH, 1976 • VOL. 22, NO. 2

The AIChE Journal, a publication of the American Institute of Chemical Engineers, is devoted to fundamental research and developments having immediate or potential value in chemical engineering.

PUBLISHER

F. J. Van Antwerpen

EDITOR

Robert C. Reid

MANAGING EDITOR

Sylvia Fourdrinier

PRODUCTION EDITOR

Maura Mullen

EDITORIAL BOARD

Andreas Acrivos
Charles A. Eckert
James R. Fair
George R. Gavalas
Leon Lapidus
Dan Luss
William H. Manogue
Keith McHenry, Jr.
Arthur B. Metzner
John M. Prausnitz
Dale F. Rudd
Kenneth A. Smith

Publication Office, 215 Canal street, Manchester, New Hampshire. Published in January, March, May, July, September, and November by the American Institute of Chemical Engineers, 345 East 47 Street, New York, New York 10017. All manuscripts should be submitted only to R. C. Reid, Massachusetts Institute of Technology, Room 66-544, Cambridge, Mass. 02139. Statements and opinions in the *AIChE Journal* are those of the contributors, and the American Institute of Chemical Engineers assumes no responsibility for them. Subscription: one year, \$50; special member rate, \$10; additional yearly postage, Canada \$4.00, Pan American Union \$4.00, other foreign \$4.00 (foreign subscriptions payable in advance). Single copies: \$15.00. Single copies more than one year old: \$16.00. Second-class postage paid at New York, N. Y. and additional mailing offices. Copyright 1976 by the American Institute of Chemical Engineers. National headquarters of AIChE is concerned about nondelivery of copies of the *AIChE Journal* and urgently requests subscribers to give prompt notification of any change of address. Sixty days must be allowed for changes to be made in the records.

Postmaster: Please send form 3579 to AIChE Journal, 345 East 47 Street, New York, N. Y. 10017.

AIChE Symposium Series

Recent Fundamental Studies

147. Air: 1. Pollution Control and Clean Energy. The four sections of this book cover research and development programs of EPA; particulates from direct emissions and secondary condensation reactions; the development of clean liquid and gaseous fuels from coal, together with the environmental impact of coal gasification and the economics of coal as a source of power; and miscellaneous topics.

1975. 185 pp. AIChE Members, \$6.50; nonmembers, \$20.

148. Air: 2. Control of NO_x and SO_x Emissions. Advances in pollution-control technology as applied to control of nitrogen and sulfur oxides. Treatment of both stationary and mobile combustion sources; laser technology for detection and measurement of NO_x; sulfur reduction from hydrocarbon feedstocks and refinery products; reduction of atmospheric sulfur compounds from sulfur recovery plants; control of sulfuric acid and sulfur dioxide emissions from manufacturing processes.

1975. 350 pp. AIChE Members, \$10; nonmembers, \$20.

149. Trace Contaminants in the Environment. Fundamental and applied studies on aerosols and air pollution; movements of the important contaminants through the atmosphere, hydrosphere, and lithosphere; effect of trace metals on man and environment; economic and regulatory aspects of trace elements.

1975. 70 pp. AIChE Members, \$5; nonmembers, \$20.

150. Advances in Interfacial Phenomena of Particulate-Solution-Gas Systems; Applications to Flotation Research. Includes studies of flotation techniques, with attention to the role of metal-ion hydrolysis; removal of calcium sulfate from SO₂, of surfactant additives and suspended solids from desalination of brines, and of submicron particulates by high-expansion foams.

1975. 200 pp. AIChE Members, \$7; nonmembers, \$20.

Order from

American Institute of Chemical Engineers
345 East 47 Street
New York, New York 10017

Also available: Standing orders for members. Each book in the two series is mailed on publication and billed at a discount of 10 percent.
