

# AIChE JOURNAL

SEPTEMBER 1977 • VOL. 23, NO. 5

The AIChE Journal, a publication of the American Institute of Chemical Engineers, is devoted to fundamental research and developments having immediate or potential value in chemical engineering.

## PUBLISHER

F. J. Van Antwerpen

## EDITOR

Robert H. Kadlec

## MANAGING EDITOR

Sylvia Fourdrinier

## PRODUCTION EDITOR

Maura Mullen

## EDITORIAL BOARD

Andreas Acrivos  
Charles A. Eckert  
R. Dale Biggs  
K. C. Chao  
James M. Douglas  
James R. Fair  
George R. Gavallas  
Dan Luss  
William H. Manogue  
Keith McHenry, Jr.  
Arthur B. Metzner  
Kenneth A. Smith

Publication Office, 215 Canal Street, Manchester, New Hampshire. Published in January, March, May, July, September, and November by the American Institute of Chemical Engineers, 345 East 47 Street, New York, New York 10017. Manuscripts should be submitted to Robert H. Kadlec, Editorial Offices, Room 3036, East Engineering Building, The University of Michigan, Ann Arbor, Michigan 48109. Statements and opinions in the *AIChE Journal* are those of the contributors, and the American Institute of Chemical Engineers assumes no responsibility for them. Subscription: one year, \$60; special member rate, \$10; additional yearly postage, Canada \$4.00, Pan American Union \$4.00, other foreign \$4.00 (foreign subscriptions payable in advance). Single copies: \$16.00. Single copies more than one year old: \$17.00. Second-class postage paid at New York, N. Y. and additional mailing offices. Copyright 1977 by the American Institute of Chemical Engineers. National headquarters of AIChE is concerned about nondelivery of copies of the *AIChE Journal* and urgently requests subscribers to give prompt notification of any change of address. Sixty days must be allowed for changes to be made in the records.

Postmaster: Please send form 3579 to *AIChE Journal*, 345 East 47 Street, New York, N. Y. 10017.

## AIChE Symposium Series

### Recent Studies

**161. Fluidization Theories and Applications.** Part I of this volume presents current research works on theories and fundamentals beginning with an assessment of fluidized bed modeling. Part II details applications including particulate collection, nuclear processing, gasification, combustion, and methanation.

**1977. 124 pp. AIChE members, \$5; nonmembers, \$20.**

**162. Energy and Resource Recovery from Industrial and Municipal Solid Wastes.** The papers in this volume deal with waste utilization. They update the complete range of solid waste and energy resource recovery through 1976.

**1977. 223 pp. AIChE members, \$5.50; nonmembers, \$20.**

**163. Water Removal Processes: Drying and Concentration of Foods and Other Materials.** Subjects covered in this volume include the underlying principles of drying processes and also dryer design, novel drying processes, and methods of increasing energy efficiency and of alleviating environmental impact.

**1977. 205 pp. AIChE members, \$6.50; nonmembers, \$20.**

**164. Nuclear, Solar and Process Heat Transfer—St. Louis—1976.** This volume contains papers presented at the 16th National Heat Transfer Conference. They reflect the present trend toward more humanistic applications of heat transfer by containing, in addition to the usual fundamental studies and data useful in industrial technology, several studies on energy conservation.

**1977. 294 pp. AIChE members, \$6.50; nonmembers, \$20.**

Order from

American Institute of Chemical Engineers  
345 East 47 Street  
New York, New York 10017

Also available: standing orders for members. Each book in the series is mailed on publication and billed at discount of 10 percent.
