American Cyanamid, a subsidiary of American Home Products Corporation, has the following positions available at the Agricultural Products Division's largest manufacturing complex in Hannibal, Missouri:

**Process Engineer**

Responsible for tracking, yield improvements, troubleshooting, and cost reduction plant-wide. Strong interpersonal and leadership skills will be needed for current assignments and future career growth. A BS in Chemical Engineering and a minimum of three years experience required with continuous and batch specialty chemical processing as a production/process engineer at a manufacturing plant site or in piloting work; some experience with DCS desired, preferably Honeywell TDC 3000. Must be willing to relocate.

**Project Engineer**

Develop scope, recommend and select hardware, develop designs, prepare capital cost estimates, prepare bids, oversee installation, and assist in start-up of capital projects. Interact with process engineers, production supervisors, operators, maintenance, and others on an individual and/or team basis to accomplish project objectives. Manage multiple projects in various plant areas. A BS in Chemical Engineering and a minimum of three years experience required with continuous and batch specialty chemical processing; some experience with DCS desired, preferably Honeywell TDC 3000. Must be willing to relocate.

While only 90 minutes from St. Louis, our progressive work environment in the heart of America's farmlands offers numerous opportunities for career development as well as competitive salaries and excellent benefits. For immediate consideration, please send resume (state your specific job interest, salary history, and requirements) to:
