

On the Principles of Printing Sub-micrometer 3D Structures from Dielectric-Liquid-Based Colloids

N. C. Schirmer, S. Ströhle, M. K. Tiwari, and D. Poulikakos*

Adv. Funct. Mater. **2011**, 21, 388.

DOI: 10.1002/adfm.201001426

Two corrections in the above manuscript should be noted:

The estimated velocity value $O(10^{-3} \text{ m s}^{-1})$ reported in line 2 of page 390 was not measured directly. A discussion about a revised theoretical estimate of the velocity is provided in the Supporting Information. The value of the electrical conductivity reported in the Section 2.1 is not accurate, as established using a new and more precise measurement setup. The detailed repercussions of these corrections are clearly discussed in the Supporting Information.
