ADVANCED FUNCTIONAL MATERIALS

The background of the cover is a light-colored wooden surface with a vertical grain. A metal spiral binding is visible at the top left. A piece of white paper with a hand-drawn diagram of a circle and intersecting lines is placed on the right side. A brass compass is positioned vertically on the right. A molecular model, consisting of black, red, and orange spheres connected by silver rods, is arranged in a zig-zag pattern across the center. A single green sphere lies on the wood at the bottom center.
