Lactic Acid Bacteria and Their Uses in Animal Feeding to Improve Food Safety

Mindy M. Brashears, Alejandro Amezcuita, and Divya Jaroni

I. Microbial Antagonism	2
II. Lactic Acid Bacteria	3
III. Antimicrobial Substances Produced by Lactic Acid Bacteria . .	4
IV. Interactions of LAB in the Gastrointestinal Tract	7
V. Use of Lactic Acid Bacteria for <i>In Vivo</i> Reduction of Food-Borne Pathogens.	9
VI. Selection Criteria for Lactic Acid Bacteria to be Used as Direct-Fed Microbials	9
VII. Use of Direct-Fed Microbials in Farm Animals.	14
VIII. Possible <i>In Vivo</i> Mechanisms of Action	21
IX. Conclusion	24
References	25

Mycotoxins in Fruits: Microbiology, Occurrence, and Changes during Fruit Processing

S. Drusch and J. Aumann

I. Introduction	33
II. Mold Spoilage of Fruits	37
III. Potential for Mycotoxin Formation and Occurrence of Mycotoxins in Fruits.	43

IV. Mycotoxins in Fruit Products and Impact of Processing on
Mycotoxin Concentration 50

V. Impact on Human Nutrition. 66

References 71

Human Protozoan Parasites in Molluscan Shellfish

Thaddeus K. Graczyk, Leena Tamang, and Halshka Graczyk

I. Seafood in the American Diet 79

II. Bias in Reporting of Molluscan Shellfish–Vectored Illnesses . . 83

III. Association of Human Waterborne Parasites and
Molluscan Shellfish. 83

IV. Methods Used for Identification of Human Protozoan
Parasites in Molluscan Shellfish 91

V. Why Are the Shellfish Consumption–Caused Illnesses not
Anticipated to Decline? 92

VI. Conclusions 93

Acknowledgments 95

References 95

**Regulation of Human Immune and Inflammatory Responses
by Dietary Fatty Acids**

Darshan S. Kelley, Neil E. Hubbard, and Kent L. Erickson

I. Introduction 101

II. Immune System and Its Response 103

III. Allergy and Inflammation 104

IV. Dietary Lipids 106

V. Effects of Dietary Fatty Acids on Immune and
Inflammatory Responses. 109

Acknowledgments 133

References 133

Bacteria Important during Winemaking

James P. Osborne and Charles G. Edwards

I. Introduction	140
II. <i>Acetobacter</i> and <i>Gluconobacter</i>	141
III. <i>Lactobacillus</i>	144
IV. <i>Oenococcus</i>	146
V. <i>Pediococcus</i>	151
VI. Identification of Bacteria in Wine	153
VII. Public Health Concerns	153
VIII. Interactions between Bacteria and Other Wine Microorganisms	155
IX. Summary and Conclusions.	164
References	165

Biosynthesis of Conjugated Linoleic Acid in Ruminants and Humans

Donald L. Palmquist, Adam L. Lock, Kevin J. Shingfield,
and Dale E. Bauman

I. Introduction	180
II. Ruminal Synthesis of CLA	184
III. CLA Synthesis by Non-Ruminal Organisms	198
IV. Endogenous Synthesis of CLA	199
V. Concluding Summary	208
References	208

Safety Issues Associated with Herbal Ingredients

Memory Elvin-Lewis

I. Introduction	220
II. What Is an Herb?	222
III. Source of Herbal Ingredients	222
IV. Regulatory Aspects	226
V. What Is an Herbal Remedy?.	237
VI. Adulterations.	242

VII. Pharmacokinetic Behavior of Plant-Derived Drugs	250
VIII. Problematic Herbs and Their Adverse Effects	251
IX. Inadvertent Overdosing	255
X. Herbal Drug Transmission <i>In Utero</i> or Through Mother's Milk	256
XI. Herbal Use in Children	257
XII. Allergic Reactions	258
XIII. Dental Products	261
XIV. Ocular Side Effects from Herbal Medicines and Vitamin Supplements	262
XV. Problems Associated with Long-Term Use	263
XVI. Effects on Internal Organs	264
XVII. Diabetes	273
XVIII. Use of Psychoactives	274
XIX. Effects of Slimming Agents	275
XX. Effects of Immune Stimulants	277
XXI. Perioperative Use of Herbs and Surgery.	278
XXII. Drug and Herbal Interactions	279
XXIII. Summary and Conclusion	288
Appendix	291
References	293
Index	315
