
Letters to the editor

Letters received from readers in response to articles and ideas published in ANS are regularly featured, providing an opportunity for constructive critique, discussion, disagreements, and comment intended to stimulate the development of nursing science. Unless otherwise stated, we assume that letters addressed to the editor are

intended for publication with your name and affiliation. As many letters as possible are published. When space is limited and we cannot publish all letters received, we select letters reflecting the range of opinions and ideas received. If a letter merits a response from an ANS author or Open Forum participant, we will obtain a reply and publish letters.

CORRECTION

In the April 1982 issue of ANS (4:3) on Nursing and Culture an error was made in the title "Pragmatic survivalism: behavior patterns effecting low level wellness among minority group members." The word effecting was inadvertently changed to affecting which misconstrued the author's intent.
