

Highlights

Actinoid-Nanostrukturen

T. E. Albrecht-Schmitt

Actinoidchemie mit Krümmung:
Nanoröhren und Nanokugeln

Halbleiter-Nanokristalle

A. Eychmüller

Aerogele aus Halbleiter-Nanomaterialien

Aufsätze

Wirt-Gast-Systeme

L. Isaacs et al.

Die Cucurbit[n]uril-Familie

Zuschriften

Nanostrukturen

H. Vogel et al.

Synthesis of Nanoscopic Optical Fibers
Using Lipid Membranes as Templates
(Titelbild)

Thermochrome Polymere

R. L. McCarley et al.

Highly Water-Soluble Thermally
Responsive Poly(thiophene)-Based
Brushes

Asymmetrische Katalyse

X. Zhang et al.

Enantioselective Hydrogenation of
Allylphthalimides: An Efficient Method for
the Synthesis of β -Methyl Chiral Amines

Supramolekulare Chemie

M. Fujita et al.

Ultramacrocyclization through Reversible
Catenation

Koordinationschemie

J. G. Verkade et al.

A Stable Structurally Characterized
Phosphorus-Bound Isocyanide and Its
Thermal and Catalyzed Isomerization to
the Corresponding Cyanide

Wasserstoffbrücken

L.-S. Wang et al.

Observation of Weak C–H...O Hydrogen
Bonding to Unactivated Alkanes

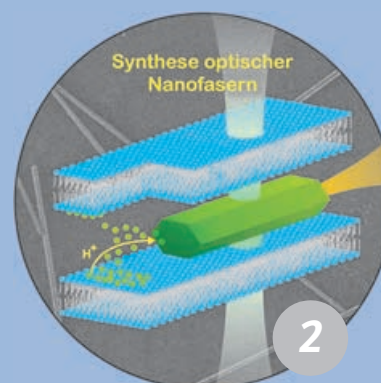

Asymmetrische Katalyse

T. Katsuki et al.

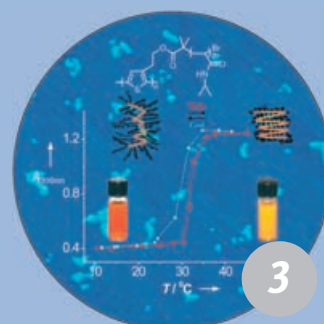

Construction of Pseudo-Heterochiral and
Pseudo-Homochiral Di- μ -oxo-
titanium(Schiff base) Dimers and
Enantioselective Epoxidation Using
Aqueous Hydrogen Peroxide
