CORRIGENDUM

In the review by **L. Que, Jr.** and **W. B. Tolman** (*Angew. Chem. Int. Ed.* **2002**, *41*, 1114–1137) it was incorrectly stated that the $\text{Fe}^{\text{III}}\text{Fe}^{\text{IV}}$ complex reported by Lee et al. in ref. [54] has a bis(μ -oxo)diiron structure. In fact, in ref. [54] it is made clear that from the experimental data for the complex the mode of ligation could not be specified. The authors apologize for this mistake.
