

## Corrigenda

The authors of this Communication have noticed that Equation (2) appears incorrectly in print. The authors apologize for the oversight, but point out that this mistake has no bearing on the discussion of their results as the correct equation [Eq. (2)] was used in their calculations.

$$P_{\text{off}}(\Delta t) = e^{-k_{\text{d}} \Delta t} = e^{-\nu_{\text{off}} \Delta t} \quad (2)$$
