

Highlights

Bond Activation

C. Marschner

Hafnium: Stepping into the Limelight!

Molecular Machines

T. Kolter

The Fatty Acid Factory of Yeasts

Essays

History of Science

L. Jaenicke

Centenary of the Award of a Nobel Prize to Eduard Buchner, the Father of Biochemistry in a Test Tube and Thus of Experimental Molecular Bioscience

Reviews

Green Metathesis Reactions

H. Clavier, K. Grela, A. Kirschning,
M. Mauduit and S. P. Nolan

Sustainable Concepts in Olefin Metathesis

Communications

Unusual Bond Activations

U. Rosenthal, E. D. Jemmis et al.

Tandem Si–C and C–H Activation for Decamethylhafnocene and Bis(trimethylsilyl)acetylene
(Cover Picture)

Nanolithography

E. Delamarche et al.

Facile Preparation of Complex Protein Architectures with Sub-100-nm Resolution on Surfaces

Two-Dimensional Oligomers

S. De Feyter, S. Höger et al.

Molecularly Defined Shape-Persistent 2D Oligomers: The Covalent-Template Approach to Molecular Spoked Wheels

Hydrated Proton

H.-D. Meyer et al.

Dynamics and Infrared Spectroscopy of the Protonated Water Dimer

C–H Activation

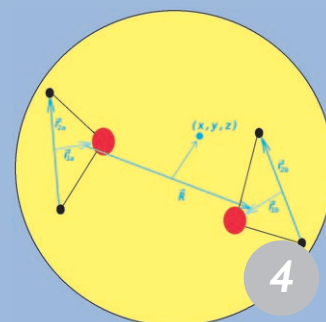

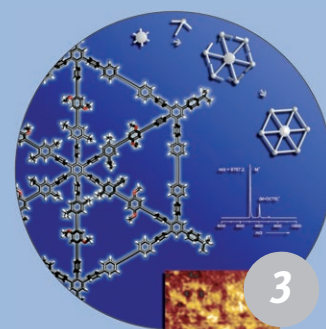

K. J. Szabó and V. J. Olsson

Selective One-Pot Carbon–Carbon Bond Formation by Catalytic Boronation of Unactivated Cycloalkenes and Subsequent Coupling

Rotaxane Synthesis

H. L. Anderson et al.

Solid-Phase Synthesis of Oligo(phenylene ethynylene) Rotaxanes

Issue 36/2007 will be
published on September 9, 2007.
