

Corrigenda

Enantiomerically Enriched Cyclopropene
Derivatives: Versatile Building Blocks in
Asymmetric Synthesis

The authors of this Review wish to clarify that, although, as reported, the first asymmetric synthesis of chiral cyclopropene derivatives was jointly reported by Doyle, Müller, and co-workers in 1992,^[1] the first example of a chiral cyclopropene was obtained by resolution in 1968 by Breslow and Douek.^[2]
