

Highlights

Tetraalkyl Nickel

H.-F. Klein and P. Kraikivskii

Unexpected Formation of a Molecular Tetraalkyl Nickel Complex from an Olefin/Nickel(0) System

Minireviews

Electron Transfer

J. S. Miller and K. S. Min

Oxidation Leading to Reduction: Redox-Induced Electron Transfer (RIET)

Reviews

Drug Vectors

M. Blanzat, I. Rico-Lattes et al.

Drug Delivery by Soft Matter: Matrix and Vesicular Carriers

Communications

Carotenoids

H.-D. Martin, W. Stahl et al.

3,3'-Dihydroxyisorenieratene, a Natural Carotenoid with Superior Antioxidant and Photoprotective Properties (Cover Picture)

Microstructures

W. Liu, S. Stoyanov et al.

How Rigid Rods Self-Assemble at Curved Surfaces

Nickel Complexes

C. Nuckolls, M. Steigerwald et al.

A Stable Tetraalkyl Complex of Nickel(IV)

Cationic Phosphorus Clusters

J. J. Weigand et al.

Formation of $[\text{Ph}_2\text{P}_5]^+$, $[\text{Ph}_4\text{P}_6]^{2+}$, and $[\text{Ph}_6\text{P}_7]^{3+}$ Cationic Clusters by Consecutive Insertions of $[\text{Ph}_2\text{P}]^+$ into P–P Bonds of the P_4 Tetrahedron

Encapsulated Enzymes

F. Caruso et al.

Triggered Enzymatic Degradation of DNA within Selectively Permeable Polymer Capsule Microreactors

Systems Chemistry

D. G. Blackmond

An Examination of the Role of Autocatalytic Cycles in the Chemistry of Proposed Primordial Reactions

Synthetic Methods

P. Kele, O. S. Wolfbeis et al.

Dual Labeling of Biomolecules by Using Click Chemistry: A Sequential Approach

Issue 2/2009 will be
published on December 29, 2008.
