

Highlights

Coordination Chemistry

M. Nakamura

Is Cyanide Really a Strong-Field Ligand?

Transition-Metal Complexes

A. L. Balch

Dynamic Crystals: Visually Detected Mechanochemical Changes in the Luminescence of Gold and Other Transition-Metal Complexes

Ionic Interactions

S. L. Craig

From Ionic Liquids to Supramolecular Polymers

Essays

Homochirality

D. G. Blackmond

“If Pigs Could Fly” Chemistry: A Tutorial on the Principle of Microscopic Reversibility

Minireviews

Cross-Coupling

M. Lautens and A. Rudolph

Secondary Alkyl Halides in Transition-Metal-Catalyzed Cross-Coupling Reactions

Reviews

Aptamers

G. Mayer

The Chemical Biology of Aptamers

Communications

Separation Techniques

D. T. Chiu et al.

Compartmentalization of Chemically Separated Components into Droplets (Cover Picture)

RNA Technologies

J. S. Hartig et al.

Artificial Ribozyme Switches Containing Natural Riboswitch Aptamer Domains

Molecules in Outer Space

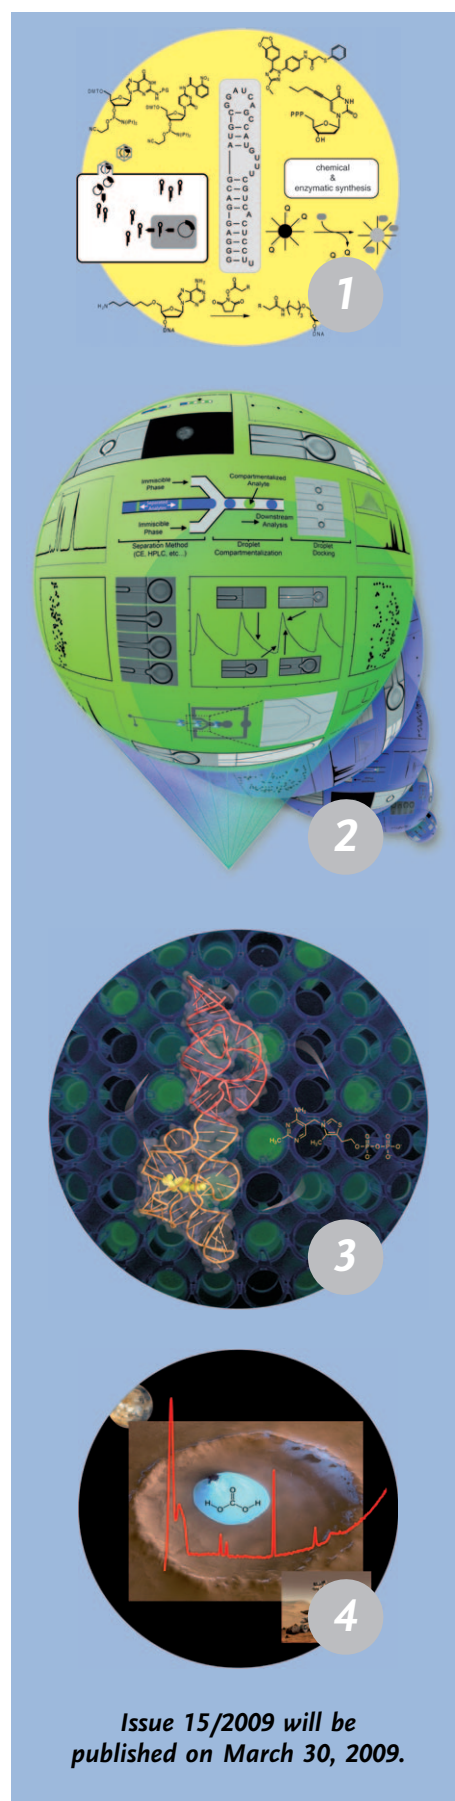

T. Loerting et al.

Raman Spectroscopic Study of the Phase Transition of Amorphous to Crystalline β -Carbonic Acid

Asymmetric Catalysis

Y. Uozumi et al.

Asymmetric Suzuki–Miyaura Coupling in Water with a Chiral Palladium Catalyst Supported on an Amphiphilic Resin

Issue 15/2009 will be
published on March 30, 2009.
