

Highlights

Heterogeneous Catalysis

J. M. Thomas and J.-C. Hernandez-Garrido

Probing Solid Catalysts Under Operating Conditions: Electrons or X-rays?

Single-Molecule Studies

M. Heilemann

Light at the End of the Tunnel

Conducting Oligomers

H. Meier

High Electrical Conductance of Single Molecules—A Challenge in the Series of Conjugated Oligomers

Minireviews

Biopolymers

M. d'Ischia, P. Meredith, T. Sarna et al.

Chemical and Structural Diversity in Eumelanins: Unexplored Bio-Optoelectronic Materials

Reviews

Supramolecular Chemistry

H.-J. Schneider

Binding Mechanisms in Supramolecular Complexes

Communications

OLEDs

K. Meerholz et al.

Photoprogrammable Organic Light-Emitting Diodes (Cover Picture)

Chirality

K.-H. Ernst et al.

Switching the Chirality of Single Adsorbate Complexes

Emulsions

W. Richtering et al.

The Colloidal Suprastructure of Smart Microgels at Oil–Water Interfaces

Boron Heterocycles

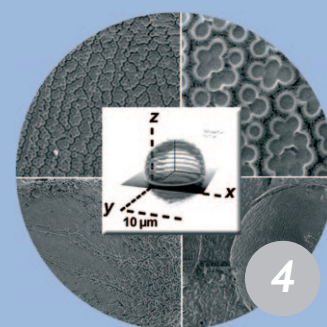

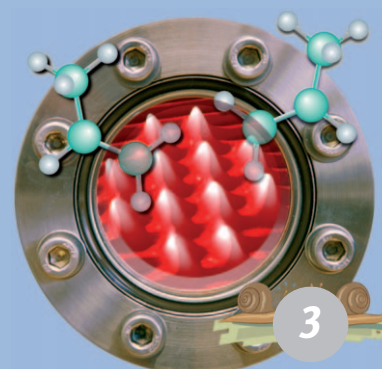

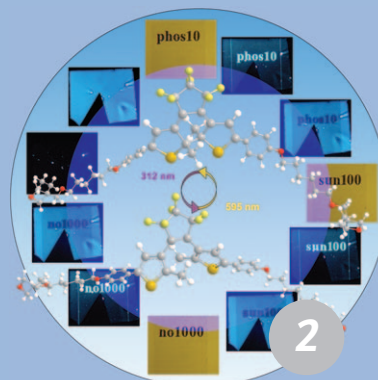

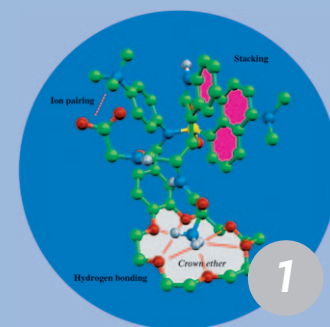

W. E. Piers et al.

9-Boraanthracene Derivatives Stabilized by N-Heterocyclic Carbenes

Heterogeneous Catalysis

K.-i. Shimizu et al.

Direct C–C Cross-Coupling of Secondary and Primary Alcohols Catalyzed by a γ -Alumina-Supported Silver Subnanocluster

Issue 22/2009 will be
published on May 18, 2009.
