

Corrigendum

The authors of this Communication have recognized an error in Equation (2). The correct Equation (2) is therefore as follows:

$$\chi_M = \frac{1}{k_B(T-\theta)} \frac{2 N_A g^2 \mu_B^2}{3 + \exp\left(-\frac{2J}{k_B T}\right)} \quad (2)$$

Moreover, in the right-hand column on page 923, the optimized value for the exchange coupling J should be corrected to $J = 11.2 \text{ cm}^{-1}$ ($= 16.0 \text{ K}$), and Ref. [3] cited in this paragraph should be Ref. [6].

A Spiro-Fused Triarylamminium Radical
Cation with a Triplet Ground State
