

## Corrigendum

In the Supporting Information for this Communication there was some ambiguity in the way that two  $^1\text{H}$  NMR spectra were assigned. Upon inspection, the authors noticed that two peaks marked as l and m for Poly(GEMA)<sub>RAFT</sub> and P2 were wrongly labeled.

Therefore, these spectra have been now been correctly assigned and are available online.

The authors apologize for this oversight and emphasize that the changes have no impact on the identity and behavior of the polymers.

Sweet Talking Double Hydrophilic Block Copolymer Vesicles
