

Highlights

RNA Aptamers

G. Mayer et al.

Plug and Play with RNA

Chirality

J. M. Ribó

Magnetochiral Effects in Amphiphilic Porphyrin J-aggregates

Essays

Fast DNA Sequencing

S. Balasubramanian

Decoding Genomes at High Speed: Implications for Science and Medicine

Reviews

Biogenesis

A. Eschenmoser

Etiology of Potentially Primordial Biomolecular Structures: From Vitamin B₁₂ to the Nucleic Acids and an Inquiry into the Chemistry of Life's Origin: A Retrospective

Communications

Heteropolyniobates

M. Nyman et al.

Soluble Heteropolyniobates from the Bottom of Group IA (**Cover Picture**)

Concave Nanoparticles

Y. Xia et al.

Silver Nanocrystals with Concave Surfaces and Their Optical and Surface-Enhanced Raman Scattering Properties (**Inside Cover**)

Chirality

K. Okano, M. Fujiki, T. Yamashita et al.

Circularly Polarized Luminescence of Rhodamine B in a Supramolecular Chiral Medium Formed by a Vortex Flow (**Frontispiece**)

Silicon Chemistry

R. A. Mata, H. W. Roesky, M. Scheer, D. Stalke et al.

A Stable Cation of a CSi₃P Five-Membered Ring with a Weakly Coordinating Chloride Anion (**Back Cover**)

Smart Polymers

D. Bléger, M. Maskos, J. P. Rabe, S. Hecht et al.

Light-Orchestrated Macromolecular "Accordions": Reversible Photoinduced Shrinking of Rigid-Rod Polymers

Angew. Chem. Int. Ed. 2011, 50, 12365
