

Highlights

Polyoxometalates

M. Ruck and E. Ahmed

Ionothermal Synthesis of Polyoxometalates

Genetic Code

A. G. Beck-Sickinger and N. Budisa

Genetically Encoded Photocrosslinkers as Molecular Probes To Study G-Protein-Coupled Receptors (GPCRs)

Minireviews

Domino Reactions

D. Enders and A. Grossmann

N-Heterocyclic Carbene Catalyzed Domino Reactions

Reviews

Mixed-Valence Compounds

C. Lambert and A. Heckmann

Organic Mixed-Valence Compounds: A Playground for Electrons and Holes

Communications

Artificial Photosynthesis

C. B. Park et al.

Self-Assembled Light-Harvesting Peptide Nanotubes for Mimicking Natural Photosynthesis (**Cover Picture**)

Silver NMR Spectroscopy

Z. Kovacs et al.

Production and NMR Characterization of Hyperpolarized $^{107,109}\text{Ag}$ Complexes (**Inside Cover**)

Asymmetric Hydroamination

K. C. Hultsch et al.

A Chiral Phenoxyamine Magnesium Catalyst for the Enantioselective Hydroamination/Cyclization of Aminoalkenes and Intermolecular Hydroamination of Vinyl Arenes (**Frontispiece**)

Polyoxometalate–cyclodextrin assembly

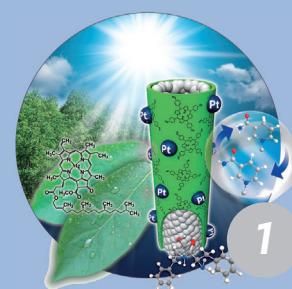

G. Izzet, M. Ménand, M. Sollogoub, A. Proust et al.

Cyclodextrin-Induced Auto-Healing of Hybrid Polyoxometalates (**Inside Back Cover**)

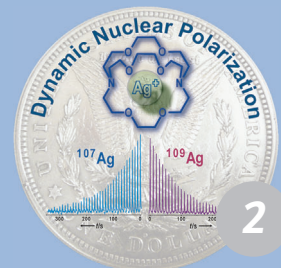

Drug Delivery

S. Lee, X. Chen et al.

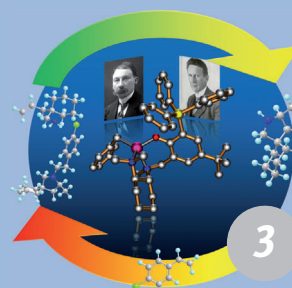

Sticky Nanoparticles: A Platform for siRNA Delivery by a Bis(zinc(II) dipicolylamine)-Functionalized, Self-Assembled Nanoconjugate (**Back Cover**)
