

Highlights

Molecular Gels

G. John et al.

Flexible Optics: Recent Developments in Molecular Gels

Palladium(II) Catalysis

M. Oestreich et al.

A New Direction in C–H Alkenylation: Silanol as a Helping Hand

Minireviews

Materials Science

A. Ajayaghosh et al.

Self-Assembled Gelators for Organic Electronics

Reviews

Backbone Binding

A. K. Ghosh et al.

Enhancing Protein Backbone Binding—A Fruitful Concept for Combating Drug-Resistant HIV

Communications

DNA Intercalation

T. T. Perkins and D. H. Paik

Dynamics and Multiple Stable Binding Modes of DNA Intercalators Revealed by Single-Molecule Force Spectroscopy **(Cover Picture)**

Photosensitizers

M. K. Nazeeruddin, T. Torres, M. Grätzel et al.

Molecular Engineering of Zinc Phthalocyanines with Phosphinic Acid Anchoring Groups **(Inside Cover)**

Alzheimer's Therapeutics

H.-W. Li, K. K. L. Yung, M. S. Wong et al.

Inhibition of Beta-Amyloid Peptide Aggregation by Multifunctional Carbazole-Based Fluorophores **(Frontispiece)**

Noncovalent Interactions

M. J. Macias, A. Riera et al.

Fine-tuning the π – π Aromatic Interactions in Peptides: Somatostatin Analogues Containing Mesityl Alanine **(Inside Back Cover)**

Hydrogels

K. S. Anseth and C. A. DeForest

Photoreversible Patterning of Biomolecules within Click-Based Hydrogels **(Back Cover)**

C–C Cleavage

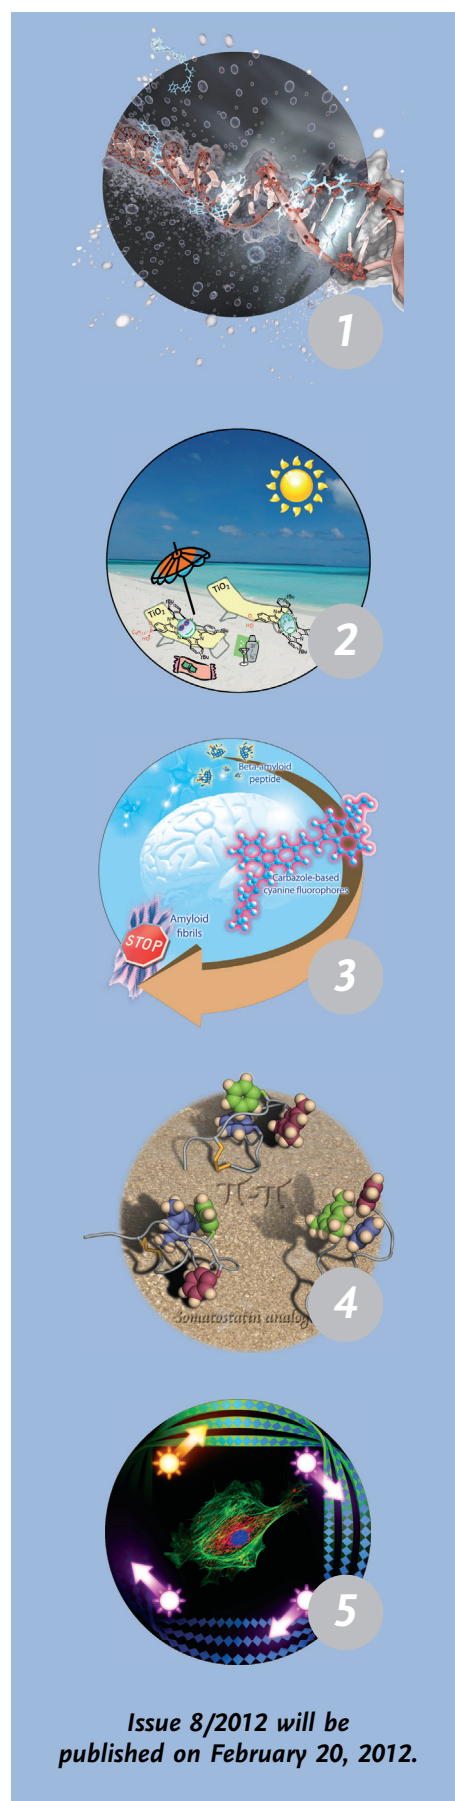

Y. R. Chi et al.

Facile Access to Chiral Ketones through Metal-Free Oxidative C–C Bond Cleavage of Aldehydes by O_2

Caged Compounds

M. Goeldner, A. Specht et al.

Water-Soluble, Donor–Acceptor Biphenyl Derivatives in the 2-(*o*-Nitrophenyl)propyl Series: Highly Efficient Two-Photon Uncaging of the Neurotransmitter γ -Aminobutyric Acid at $\lambda = 800$ nm

Issue 8/2012 will be
published on February 20, 2012.
