

Highlights

Electrostatic Charging

D. J. Lacks

The Unpredictability of Electrostatic Charging

Biofuel Cells

U. Schröder

From In Vitro to In Vivo—Biofuel Cells Are Maturing

Minireviews

Photoredox Catalysis

W.-J. Xiao and J. Xuan

Visible-Light Photoredox Catalysis

Reviews

Ubiquitin Conjugates

A. Brik and L. Spasser

Chemistry and Biology of the Ubiquitin Signal

Communications

Phosphorus Ligands

A. Riera, X. Verdaguer et al.

P-Stereogenic Secondary Iminophosphorane Ligands and Their Rhodium(II) Complexes: Taking Advantage of NH/PH Tautomerism **(Cover Picture)**

Hydrogen Transfer

M. Harmata et al.

C–H Activation in S-Alkenyl Sulfoximines: An Endo 1,5-Hydrogen Migration **(Inside Cover)**

Light Harvesting

J. H. Kim, E. Kim et al.

Nanopatterning of Mesoporous Inorganic Oxide Films for Efficient Light Harvesting of Dye-Sensitized Solar Cells **(Frontispiece)**

Electrochemical Imaging

J. V. Macpherson, P. R. Unwin et al.

Electrochemical Mapping Reveals Direct Correlation between Heterogeneous Electron-Transfer Kinetics and Local Density of States in Diamond Electrodes **(Inside Back Cover)**

Natural Product Synthesis

D. Romo and J. C. P. Reyes

Bioinspired Total Synthesis of Agelastatin A **(Back Cover)**

Flow Chemistry

P. H. Seeberger et al.

Continuous Synthesis and Purification by Direct Coupling of a Flow Reactor with Simulated Moving-Bed Chromatography

Cyclopropanation

J. Hu et al.

Enantioselective Synthesis of Cyclopropanes That Contain Fluorinated Tertiary Stereogenic Carbon Centers: A Chiral α -Fluoro Carbanion Strategy

Issue 28/2012 will be
published on July 9, 2012.
