## Radiolabeling of arenes ...

... with [ $^{18}\text{F}$ ]fluoride by a transformational method using readily available aryl boronic ester precursors is reported by V. Gouverneur and co-workers in their Communication on page 7751 ff. The picture illustrates, in the confinement of a PET (positron emission tomography) scanner, the annihilation event resulting from positron emission from [ $^{18}\text{F}$ ]fluoro-L-DOPA.
