The reactions of imino boranes and singlet carbenes ...

... display expected as well as unexpected reactivity patterns. In their Communication on page 1662 ff., H. Braunschweig and co-workers report the formation of an iminoborane-carbene Lewis acid-base adduct, an aminoborane-functionalized carbene, and a bicyclic azaborolidine from the reactions of three different carbenes with the same iminoborane.
