

Angewandte Corrigendum

In this Communication inadvertently a wrong value was given for the redox potential in the caption of Figure 2. The chronoamperometry experiment was performed at -455 mV versus SHE, not at -340 mV versus SHE as reported.

The authors sincerely apologize for this mistake, which does not affect any results or conclusions of this Communication.

Induction of a Proton Gradient across
a Gold-Supported Biomimetic
Membrane by Electroenzymatic H_2
Oxidation
