Information: American Association for Cancer Research, Meetings Mailing List AACR, Public Ledger Building, 6th & Chestnut Streets, Suite 816, Philadelphia, PA 19106, USA.

1994

21–24 February

Second World Congress on Laryngeal Cancer.

Sydney, Australia

Information: The Secretary, 2nd World Congress Laryngeal Cancer, Conference Action Pty Ltd, PO Box 1231, North Sydney 2059, Australia.

Announcement

17th L H Gray Conference

TUMOUR ASSESSMENT AND RESPONSE TO THERAPY STUDIED BY MRS

University of Kent, Canterbury, UK

13–16 April 1992

Programme will include the following: Drug pharmacokinetics and metabolism, response to therapy, studies of hypoxia, methodology in MRS of tumours, tumour assessment, comparison of human and animal tumours, multi-centre clinical trials.

Organizing committee: J R Griffiths, M O Leach, D G Gadian, M Stubbs (London); P Styles (Oxford); I Stratford (Harwell); R D James, N J F Dodd (Manchester); M A Smith (Leeds); P Workman (Glasgow); C G Steel (Sutton).

For further information contact:

Dr Marion Stubbs, CRC Biomedical Magnetic Resonance Research Group, Division of Biochemistry, St George's Hospital Medical School, Cranmer Terrace, London SW17 0RE, UK. Tel: 081 672 9944 extn 55809. Fax: 081 672 4864.

relation to the aim of the investigation. Data should not be presented in more than one form. All tables and figures must be referred to in the text.

Discussion. This should contain a critical review of the results of the study in the light of relevant work published previously by the author(s) and/or other investigators.

Conclusion. The manuscript should end with a brief conclusion (not more than 200 words).

Acknowledgements. Detail in no more than 50 words those contributions which require acknowledgement but do not justify authorship, acknowledgements of technical help or other assistance. Acknowledgements of financial or material support should appear on the title page.

References

References should be numbered consecutively in the order in which they are first mentioned in the text. Identify references in the text, tables and legends by arabic numerals in parentheses. References cited in tables or in legends to figures should be numbered in accordance with a sequence established by the first identification in the text of the particular table or illustration. The style of the references is that of the *Index Medicus*. Example of correct forms of references are given below.

Yu D, Brasch H, Iven H. No influence of enzyme inhibitors on the hydroxylation of methotrexate in rats. *Cancer Lett* 1989; **48**: 153–6.

Weinstein L, Swartz MN. Pathogenic properties of invading micro-organisms. In: Sodeman WA Jr, Solomon WA, eds. *Pathogenic Physiology: Mechanism of Disease*. Philadelphia: WB Saunders 1947: 457–72.

Artwork

Figures must be numbered and referred to in the text, and their approximate position should be indicated in the margin of the manuscript. The (first) author's name, figure number and, if necessary, an arrow clarifying orientation, should be appended to the reverse of each illustration. Line drawings (including graphs) must be in black ink on white paper, or be sharp photo-prints on glossy paper. The lettering should be large enough to permit photographic reduction. Actual magnification of photo-micrographs should be indicated by a

micronbar or in the legend. Halftone illustrations should be submitted as black and white prints on glossy paper and have as much contrast as possible. Figure legends should be typed on a separate sheet of paper.

A charge of £300 a page is made for 4-colour figures. Inability to meet these costs will not prevent publication of essential colour figures if, in the opinion of the Publishers, the circumstances so merit.

Tables

Tables should be typed in double spacing on separate sheets. Each table should have a brief title and should be numbered in arabic numerals in the order of appearance in the manuscript. Vertical rules should not be used. The position of each table should be indicated in the margin of the manuscript.

Note

All authored papers and comments in *Anti-Cancer Drugs* are the responsibility of the author(s), and do not necessarily reflect the views of the journal and its publisher, nor does their publication in this journal imply any endorsement.

If the paper to be published concerns work on humans, it must comply with the principles of the declaration of Helsinki (1964). The approval of an ethical committee must then be stated on the manuscript. The editors reserve the right to reject a paper with questionable ethical justification.

Proofs, reprints and copyright

Authors will be sent page proofs for correction before publication by fax wherever possible. Authors must inform the Publisher of any correction within 48 hours. If authors fail to do so proof-reading will be carried out by the Editorial Office.

A form for ordering reprints will be sent to authors of accepted manuscripts and should be returned directly to the Publisher. Manuscripts are accepted for publication on the understanding that exclusive copyright in the paper is assigned to the Publisher. However, this does not limit the freedom of the author(s) to use material in the paper in any other published works.
