Reversion of the P-glycoprotein-mediated multidrug resistance of cancer cells by FK-506 derivatives

B Jachez, D Boesch, MA Grasberger and F Loor

The legend to Figure 1 should read as follows:

Figure 1. Structure of SDZ 280–629. SDZ 280–629 (empirical formula: $C_{44}H_{67}NO_{11}$; molecular weight: 786.02) is 10-desoxy- Δ^{10} -derivative of FK 506 (according to the atom numbering in European Patent 184162).
