

SUBJECT INDEX

- acycloguanosine, acyclovir (Zovirax), antiviral drug, herpes virus, 203
- acyclovir (Zovirax), acycloguanosine, antiviral drug, herpes virus, 203
- amantadine, effectiveness in humans, influenza, rimantadine, 149
- 5'-amino-2',5'-dideoxy-5-iodouridine (AIU), antiviral, herpes simplex virus, 393
- antibody response, cold-adapted recombinant, genotyping, live influenza vaccine, reactivity, 107
- antigenicity, human and mouse interferons, 167
- anti-influenza, hamsters, ferrets, influenza transcriptase, poly(I) · poly(C), poly(C,S⁴U₁₀), 237
- antipicornavirus, enviroxime, 2-(α -hydroxybenzyl)benzimidazole, LY127123, LY122771-72, 301
- antiviral activity, caps, influenza virus, oligonucleotides, polynucleotides, RNA polymerase inhibition, 97
- antiviral activity, cardiovirus, flavonoids, host resistance, macrophage, mouse, 249
- antiviral activity, cyclic AMP, interferon, 185
- antiviral activity, herpes simplex virus, 5-(1-propenyl)-1- β -D-arabinofuranosyluracil, [E]-5-(1-propenyl)-2'-deoxyuridine, 213
- antiviral agents, dosage and administration, indications, infectious diseases, 73
- antiviral drug, acycloguanosine, acyclovir (Zovirax), herpes virus, 203
- anti-VSV CTLs, G protein, target antigen, vesicular stomatitis virus, 63
- benzimidazoles LY127123, LY122771-72, antipicornavirus, enviroxime, 2-(α -hydroxybenzyl)benzimidazole, 301
- N,N'*-bis(ethylene)-*P* (1-adamantyl)-phosphonic diamide, Rous sarcoma virus, 269
- bovine leukemia virus, ribavirin, 1- β -D-ribofuranosyl-1,2,4-triazole-3-carboxamide, virazole, 47
- 5-bromodeoxyuridine, butyric acid, interferon, lymphoblasts, 275
- 5-bromo-2'-deoxyuridine, polyoma virus, RNA synthesis, 157
- (*E*)-5-(2-bromovinyl)-2'-deoxyuridine (BVDU), African green monkey, simian varicella virus, varicella-zoster virus, 325
- butyric acid, 5-bromodeoxyuridine, interferon, lymphoblasts, 275
- caps, antiviral activity, influenza virus, oligonucleotides, polynucleotides, RNA polymerase inhibition, 97
- cardiovirus, antiviral activity, flavonoids, host resistance, macrophage, mouse, 249
- cell-mediated immunity, host immune defences, mouse mammary tumor virus, 141
- coformycin, coformycin triphosphate, poly(A) polymerase, 383
- coformycin, coformycin triphosphate, poly(A) polymerase, 383
- cold-adapted recombinant, antibody response, genotyping, live influenza vaccine, reactivity, 107
- cold-adapted recombinant live, attenuated viruses, influenza A viruses, 339
- cyclic AMP, antiviral activity, interferon, 185
- 3-deazaguanine, antiviral 9-(*S*)-(2,3-dihydroxypropyl)adenine, 3-deazauridine, reovirus, ribavirin, 315
- 3-deazauridine, antiviral 9-(*S*)-(2,3-dihydroxypropyl)adenine, 3-deazaguanine, reovirus, ribavirin, 315
- 9-(*S*)-(2,3-dihydroxypropyl)adenine, antiviral, 3-deazaguanine, 3-deazauridine, reovirus, ribavirin, 315
- DNA synthesis, foscarnet, herpes simplex virus, isopycnic centrifugation, phosphonoformate, 55
- enviroxime, antipicornavirus, 2-(α -hydroxyben-

- zyl)benzimidazole, LY 127123, LY122771-72, 301
- feedback regulation, lymphokine, suppressor cells, Thy-1 lymphocytes, 37
- flavonoids, antiviral activity, cardiovirus, host resistance, macrophage, mouse, 249
- foscarnet, DNA synthesis, herpes simplex virus, isopycnic centrifugation, phosphonoformate, 55
- genital herpes, herpes simplex virus, mice, phosphonoacetic acid, phosphonoformic acid, 225
- genotyping, antibody response, cold-adapted recombinant, live influenza vaccine, reactogenicity, 107
- G protein, anti-VSV CTLs, target antigen, vesicular stomatitis virus, 63
- hepatitis B, HBsAg, HB vaccine, 13
- hepatitis B surface antigen (HBsAg), hepatitis B, HB vaccine, 13
- hepatitis B (HB) vaccine, HBsAg, hepatitis B, 13
- herpes simplex virus, AIU, antiviral, 393
- herpes simplex virus, antiviral activity, 5-(1-propenyl)-1- β -D-arabinofuranosyluracil, [E]-5-(1-propenyl)-2'-deoxyuridine, 213
- herpes simplex virus, DNA synthesis, foscarnet, isopycnic centrifugation, phosphonoformate, 55
- herpes simplex virus, genital herpes, mice, phosphonoacetic acid, phosphonoformic acid, 225
- herpes virus, acycloguanosine, acyclovir (Zovirax), antiviral drug, 203
- HLA-A,B,C, β_2 -microglobulin, Ia antigens, interferon, 367
- host resistance, antiviral activity, cardiovirus, flavonoids, macrophage, mouse, 249
- Ia antigens, β_2 -microglobulin, HLA-A,B,C, interferon, 367
- immune system, interferon, 179
- inactivated poliovirus vaccine potency, standardisation, 27
- infectious diseases, antiviral agents, dosage and administration, indications, 73
- influenza, amantadine, effectiveness in humans, rimantadine, 149
- influenza A viruses, cold-adapted recombinant, live attenuated viruses, 339
- influenza transcriptase, anti-influenza, hamsters, ferrets, poly(I) · poly(C), poly(C,S⁴U₁₀), 237
- influenza virus, antiviral activity, caps, oligonucleotides, polynucleotides, RNA polymerase inhibition, 97
- interferon, antiviral activity, cyclic AMP, 185
- interferon, butyric acid, 5-bromodeoxyuridine, lymphoblasts, 275
- interferon, human and mouse, antigenicity, 167
- interferon, immune system, 179
- interferon, marmoset, rhesus monkey, vaccinia virus, 281
- interferon, Mengo virus, shut-off, 123
- interferon, β_2 -microglobulin, HLA-A,B,C, Ia antigens, 367
- interferon, rat, antiviral, anticellular, kinetics, 135
- isopycnic centrifugation, DNA synthesis, foscarnet, herpes simplex virus, phosphonoformate, 55
- kinetics, rat interferon, antiviral, anticellular, 135
- live influenza vaccine, antibody response, cold-adapted recombinant, genotyping, reactogenicity, 107
- lymphoblasts, butyric acid, 5-bromodeoxyuridine, interferon, 275
- lymphokine, feedback regulation, suppressor cells, Thy-1 lymphocytes, 37
- macrophage, antiviral activity, cardiovirus, flavonoids, host resistance, mouse, 249
- major histocompatibility complex, (MHC) disease association, vaccinia virus, RhLA, 193
- Mengo virus, interferon, shut-off, 123
- β_2 -microglobulin, HLA-A,B,C, Ia antigens, interferon, 367
- mouse mammary tumor virus, cell-mediated immunity, host immune defences, 141
- natural killer cells, viral infection, 5
- oligonucleotides, antiviral activity, caps, influenza virus, polynucleotides, RNA polymerase

- inhibition, 97
- phosphonoacetic acid, genital herpes, herpes simplex virus, mice, phosphonoformic acid, 225
- phosphonoformate, RNA synthesis, herpes simplex virus, isopycnic centrifugation, foscarnet, 55
- phosphonoformic acid, genital herpes, herpes simplex virus, mice, phosphonoacetic acid, 225
- poliovirus vaccine potency, standardisation inactivated, 27
- poly(A) polymerase, coformycin, coformycin triphosphate, 383
- poly(C,S⁴U₁₀), anti-influenza, hamsters, ferrets, influenza transcriptase, poly(I) · poly(C), 237
- poly(I) · poly(C), anti-influenza, hamsters, ferrets, influenza transcriptase, poly(C,S⁴U₁₀), 237
- polynucleotides, antiviral activity, caps, influenza virus, oligonucleotides, RNA polymerase inhibition, 97
- polyoma virus, 5-bromo-2'-deoxyuridine, RNA synthesis, 157
- [E]-5-(1-propenyl)-2'-deoxyuridine, antiviral activity, herpes simplex virus, 5-(1-propenyl)-1-β-D-arabinofuranosyluracil, 213
- 5-(1-propenyl)-β-D-arabinofuranosyluracil, antiviral activity, herpes simplex virus, [E]-5-(1-propenyl)-2'-deoxyuridine, 213
- reactogenicity, antibody response, cold-adapted recombinant, genotyping, live influenza vaccina, 107
- reovirus, 3-deazaguanine, 3-deazauridine, antiviral 9-(S)-(2,3-dihydroxypropyl)adenine, ribavirin, 315
- resistance, age-dependent and non-specific, Sindbis virus, reticuloendothelial cell system, 263
- reticuloendothelial cell system, age-dependent and non-specific resistance, Sindbis virus, 263
- rhesus monkey (RhLA), MHC disease association, vaccinia virus, 193
- ribavirin, antiviral 9-(S)-(2,3-dihydroxypropyl) reovirus, 315
- ribavirin, bovine leukemia virus, 1-β-D-ribofuranosyl-1,2,4-triazole-3-carboxamide, virazole, 47
- ribavirin, Sindbis virus, 287
- 1-β-D-ribofuranosyl-1,2,4-triazole-3-carboxamide, bovine leukemia virus, ribavirin, virazole, 47
- rimantadine, amantadine, effectiveness in humans, influenza, 149
- RNA polymerase inhibition, antiviral activity, caps, influenza virus, oligonucleotides, polynucleotides, 97
- RNA synthesis, 5-bromo-2'-deoxyuridine, polyoma virus, 157
- Rous sarcoma virus, *N,N'*-bis(ethylene)-*P* (1-adamantyl)-phosphonic diamide, 269
- simian varicella virus, African green monkey, BVDU, varicella-zoster virus, 325
- Sindbis virus, age-dependent and non-specific resistance, reticuloendothelial cell system, 263
- Sindbis virus, ribavirin, 287
- standardisation inactivated poliovirus vaccine potency, 27
- suppressor cells, feedback regulation, lymphokine, Thy-1 lymphocytes, 37
- target antigen, anti-VSV CTLs, G protein, vesicular stomatitis virus, 63
- Thy-1 lymphocytes, feedback regulation, lymphokine, suppressor cells, 37
- vaccinia virus, interferon, marmoset, rhesus monkey, 281
- vaccinia virus, MHC disease association, RhLA, 193
- varicella-zoster virus, African green monkey, BVDU, simian varicella virus, 325
- vesicular stomatitis virus, anti-VSV CTLs, G protein, target antigen, 63
- viral infection, natural killer cells, 5
- virazole, bovine leukemia virus, ribavirin, 1-β-D-ribofuranosyl-1,2,4-triazole-3-carboxamide, 47
