

Subject index

- acyclovir, antiviral activity, *Oncorhynchus masou* virus, 93
acyclovir, colorimetric assay, drug sensitivity, herpes simplex virus, antiviral agents, neutral red dye, 223
acyclovir, herpes simplex virus, experimental infections, topical therapy, 253
acyclovir, *Oncorhynchus masou* virus, chum salmon, survival tumour suppression, 103
acyclovir (Zovirax), genital herpes, herpes simplex virus, 291
adenine, arabinoside monophosphate, methoxymethyldeoxyuridine monophosphate, combination chemotherapy, antiviral activity, cytotoxicity, 161
adjuvant, encephalomyocarditis virus, dimethyl dioctadecyl ammonium bromide, antibody, delayed type hypersensitivity, 137
African green monkey kidney (Vero) cells, herpes simplex virus, 5-substituted 1- β -D-arabinofuranosyluracils, human embryonic lung fibroblasts, 5-fluoro-1- β -D-arabinofuranosyluracil, 5-trifluoromethyl-1- β -D-arabinofuranosyluracil, 175
alcoholic disinfectants, antiviral disinfection, skin disinfection, suspension test, 25
animal model, genital herpes, antiviral agents, 275
antibody, encephalomyocarditis virus, dimethyl dioctadecyl ammonium bromide, adjuvant, delayed type hypersensitivity, antiherpetic 137 activity, nucleoside analog, mechanism of action, 9-(4-hydroxybutyl)guanine, 77
anti-interferon antibody, rhinovirus isolation, interferon- α_2 , 67
anti-interferon serum, influenza virus infection, interferon, nebulizer, nasal instillation, 59
antiviral activity, Acyclovir, *Oncorhynchus masou* virus, 93
antiviral activity, methoxymethyldeoxyuridine monophosphate, adenine arabinoside monophosphate, combination chemotherapy, cytotoxicity, 161
antiviral agents, colorimetric assay, drug sensitivity, herpes simplex virus, neutral red dye, acyclovir, 223
antiviral agents, diabetes, encephalomyocarditis virus, interferon, 151
antiviral agents, didemns A and B, cutaneous, herpes simplex virus, Semliki Forest virus, 269
antiviral agents, genital herpes, animal model, 275
antiviral disinfection, alcoholic disinfectants, skin disinfection, suspension test, 25
aphidicolin, HSV-1 DNA synthesis, cellular DNA synthesis, foscarnet, 87
bromovinyldeoxyuridine, herpes simplex virus, encephalitis, latency, 7
BrvdUdr, herpes simplex virus, type specificity, dPyTPase, 1
carbocyclic 3-deazaadenosine, ribavirin, (S)-DHPA, 3-deazaadenosine, S-adenosyl-L-homocysteine hydrolase, 17
cat cell lines, feline leukemia virus, human interferon, FeLV, interferon, leukemia virus, 115
cellular DNA synthesis, aphidicolin, HSV-1 DNA synthesis, foscarnet, 87
chemotherapy, tobacco necrosis virus, salicylate, pathogenesis-related protein, 335
chum salmon, Acyclovir, *Oncorhynchus masou* virus, survival tumour suppression, 103
colorimetric assay, drug sensitivity, herpes simplex virus, antiviral agents, neutral red dye, acyclovir, 223
combination chemotherapy, methoxyme-

- thyldeoxyuridine monophosphate, adenine arabinoside monophosphate, antiviral activity, cytotoxicity, 161
- computer-assisted, interferon- α , IFLrA, 2-5A synthetase, 2-D gels, trisomy 21, 303
- cutaneous, didemnins A and B, herpes simplex virus, Semliki Forest virus, antiviral agents, 269
- cytomegalovirus, rat, interferon, 315
- cytotoxicity, methoxymethyldeoxyuridine monophosphate, adenine arabinoside monophosphate, combination chemotherapy, antiviral activity, 161
- 3-deazaadenosine, carbocyclic 3-deazaadenosine, ribavirin, (S)-DHPA, S-adenosyl-L-homocystein hydrolase, 17
- delayed type hypersensitivity, encephalomyocarditis virus, dimethyl dioctadecyl ammonium bromide, adjuvant, antibody, 137
- diabetes, encephalomyocarditis virus, interferon, antiviral agents, 151
- didemnins A and B, cutaneous herpes simplex virus, Semliki Forest virus, antiviral agents, 269
- dimethyl dioctadecyl ammonium bromide, encephalomyocarditis virus, adjuvant, antibody, delayed type hypersensitivity, 137
- Distamycin-A, plant virus chemotherapy, tomato spotted wilt virus, pyrazino-pyrazine derivative, 109
- dPyTPase, herpes simplex virus, type specificity, BrvdUdr, 1
- drug sensitivity, colorimetric assay, herpes simplex virus, antiviral agents, neutral red dye, acyclovir, 223
- encephalitis, herpes simplex virus, latency, bromovinyldeoxyuridine, 7
- encephalomyocarditis virus, diabetes, interferon, antiviral agents, 151
- encephalomyocarditis virus, dimethyl dioctadecyl ammonium bromide, adjuvant, antibody, delayed type hypersensitivity, 137
- Epstein-Barr virus, 2'-5'-oligoadenylate, interferon, lymphoblastoid cell lines, 195
- experimental infections, herpes simplex virus, topical therapy, acyclovir, 253
- feline leukemia virus, human interferon, cat cell lines, FeLV, interferon, leukemia virus, 115
- FeLV, feline leukemia virus, human interferon, cat cell lines, interferon, leukemia virus, 115
- flavans, rhinovirus, inhibition, vapour phase, 235
- 5-fluoro-1- β -D-arabinofuranosyluracil, herpes simplex virus strains, 5-substituted 1- β -D-arabinofuranosyluracils, human embryonic lung fibroblasts, African green monkey kidney (Vero) cells, 5-formyl-1- β -D-arabinofuranosyluracil, 5-trifluoromethyl-1- β -D-arabinofuranosyluracil, 175
- 5-formyl-1- β -D-arabinofuranosyluracil, herpes simplex virus strains, 5-substituted 1- β -D-arabinofuranosyluracils, human embryonic lung fibroblasts, African green monkey kidney (Vero) cells, 5-fluoro-1- β -D-arabinofuranosyluracil, 5-trifluoromethyl-1- β -D-arabinofuranosyluracil, 175
- foscarnet, aphidicolin, HSV-1 DNA synthesis, cellular DNA synthesis, 87
- 2-D gels, interferon- α , IFLrA, 2-5A synthetase, computer-assisted, trisomy 21, 303
- genital herpes, acyclovir (Zovirax), herpes simplex virus, 291
- genital herpes, antiviral agents, animal model, 275
- hamster, virulence assessment, influenza virus, 241
- hemodialysis, hepatitis B vaccine, renal transplant, 43
- hepatitis B vaccine, hemodialysis, renal transplant, 43
- herpes simplex virus, acyclovir (Zovirax), genital herpes, 291
- herpes simplex virus, colorimetric assay, drug sensitivity, antiviral agents, neutral red dye, acyclovir, 223
- herpes simplex virus, didemnins A and B, cutaneous, Semliki Forest virus, antiviral agents, 269
- herpes simplex virus, encephalitis, latency, bromovinyldeoxyuridine, 7
- herpes simplex virus, experimental infections, topical therapy, acyclovir, 253

- herpes simplex virus, inbred mouse strains, NK cells, interferon, natural resistance, 325
- herpes simplex virus strains, 5-substituted 1- β -D-arabinofuranosyluracils, human embryonic lung fibroblasts, African green monkey kidney (Vero) cells, 5-formyl-1- β -D-arabinofuranosyluracil, 5-fluoro-1- β -D-arabinofuranosyluracil, 5-trifluoromethyl-1- β -D-arabinofuranosyluracil, 175
- herpes simplex virus, type specificity, BrvUdr, dPyTPase, 1
- HSV-1 DNA synthesis, aphidicolin, cellular DNA synthesis, foscarnet, 87
- human embryonic lung fibroblasts, herpes simplex virus strains, 5-substituted 1- β -D-arabinofuranosyluracils, African green monkey kidney (Vero) cells, 5-formyl-1- β -D-arabinofuranosyluracil, 5-fluoro-1- β -D-arabinofuranosyluracil, 5-trifluoromethyl-1- β -D-arabinofuranosyluracil, 175
- human interferon, feline leukemia virus, cat cell lines, FeLV, interferon, leukemia virus, 115
- 9-(4-hydroxybutyl)guanine, antiherpetic activity, nucleoside analog, mechanism of action, 77
- IFLrA, interferon- α , 2-5A synthetase, 2-D gels, computer-assisted, trisomy 21, 303
- inbred mouse strains, herpes simplex virus, NK cells, interferon, natural resistance, 325
- influenza virus infection, interferon, anti-interferon serum, nebulizer, nasal instillation, 59
- influenza virus, virulence assessment, hamster, 241
- inhibition, rhinovirus, flavans, vapour phase, 235
- interferon- α , IFLrA, 2-5A synthetase, 2-D gels, computer-assisted, trisomy 21, 303
- interferon- α_2 , rhinovirus isolation, anti-interferon antibody, 67
- interferon, cytomegalovirus, rat, 315
- interferon, diabetes, encephalomyocarditis virus, antiviral agents, 151
- interferon, feline leukemia virus, human interferon, cat cell lines, FeLV, leukemia virus, 115
- interferon, herpes simplex virus, inbred mouse strains, NK cells, natural resistance, 325
- interferon, influenza virus infection, anti-interferon serum nebulizer, nasal instillation, 59
- interferon, murine leukemia virus, procaine, oxyphenylbutazone, prostaglandins, membrane fluidity, 189
- interferon, 2'-5'-oligoadenylate, Epstein-Barr virus, lymphoblastoid cell lines, 195
- interferon, prophylaxis, rhinoviruses infection, volunteer studies, 121
- interferon, renal catabolism, kidney, 53
- kidney, interferon, renal catabolism, 53
- latency, herpes simplex virus, encephalitis, bromovinyldeoxyuridine, 7
- leukemia virus, feline leukemia virus, human interferon, cat cell lines, FeLV, interferon, 115
- lymphoblastoid cell lines, 2'-5'-oligoadenylate, Epstein-Barr virus, interferon, 195
- mechanism of action, antiherpetic activity, nucleoside analog, 9-(4-hydroxybutyl)guanine, 77
- membrane fluidity, interferon, murine leukemia virus, procaine, oxyphenylbutazone, prostaglandins, 189
- methoxymethyldeoxyuridine monophosphate, adenine arabinoside monophosphate, combination chemotherapy, antiviral activity, cytotoxicity, 161
- murine leukemia virus, interferon, procaine, oxyphenylbutazone, prostaglandins, membrane fluidity, 189
- nasal instillation, influenza virus infection, interferon, anti-interferon, nebulizer, 59
- natural resistance, herpes simplex virus, inbred mouse strains, NK cells, interferon, 325
- nebulizer, influenza virus infection, interferon, anti-interferon serum, nasal instillation, 59
- neutral red dye, colorimetric assay, drug sensitivity, herpes simplex virus, antiviral agents, acyclovir, 223

NK cells, herpes simplex virus, inbred mouse strains, interferon, natural resistance, 325
nucleoside analog, antiherpetic activity, mechanism of action, 9-(4-hydroxybutyl) guanine, 77

2'-5'-oligoadenylate, Epstein-Barr virus, interferon, lymphoblastoid cell lines, 195
Oncorhynchus masou virus, Acyclovir, antiviral activity, 93

Oncorhynchus masou virus, Acyclovir, chum salmon, survival tumour suppression 103
oxyphenylbutazone, interferon, murine leukemia virus, procaine, prostaglandins, membrane fluidity, 189

pathogenesis-related protein, tobacco necrosis virus, salicylate, chemotherapy, 335
plant virus chemotherapy, tomato spotted wilt virus, Distamycin-A, pyrazino-pyrazine derivative, 109

porcine transmissible gastroenteritis, viral subunit, vaccine, TGE, 211

procaine, interferon, murine leukemia virus, oxyphenylbutazone, prostaglandins, membrane fluidity, 189

prophylaxis, interferon, rhinoviruses infection, volunteer studies, 121

prostaglandins, interferon, murine leukemia virus, procaine, oxyphenylbutazone, membrane fluidity, 189

pyrazino-pyrazine derivative, plant virus chemotherapy, tomato spotted wilt virus, Distamycin-A, 109

rat, cytomegalovirus, interferon, 315

renal catabolism, interferon, kidney, 53

renal transplant, hepatitis B vaccine, hemodialysis, 43

rhinoviruses infection, interferon, prophylaxis, volunteer studies, 121

rhinovirus, inhibition, flavans, vapour phase, 235

rhinovirus isolation, interferon- α_2 , anti-interferon antibody, 67

ribavirin, carbocyclic 3-deazaadenosine, (S)-DHPA, 3-deazaadenosine, S-adenosyl-L-homocysteine hydrolase, 17

S-adenosyl-L-homocysteine hydrolase, car-

bocyclic 3-deazaadenosine, ribavirin, (S)-DHPA, 3-deazaadenosine, 17

salicylate, tobacco necrosis virus, chemotherapy, pathogenesis-related protein, 335
(S)-DHPA, carbocyclic 3-deazaadenosine, ribavirin, S-adenosyl-L-homocysteine hydrolase, 17

Simliki Forest virus, didemnins A and B, cutaneous, herpes simplex virus, antiviral agents, 269

skin disinfection, antiviral disinfection, alcoholic disinfectants, suspension test, 25

5-substituted 1- β -D-arabinofuranosyluracils, herpes simplex virus strains, human embryonic lung fibroblasts, African green monkey kidney (Vero) cells, 5-formyl-1- β -D-arabinofuranosyluracil, 5-fluoro-1- β -D-arabinofuranosyluracil, 5-trifluoromethyl-1- β -D-arabinofuranosyluracil, 175

survival tumour suppression, Acyclovir, *Oncorhynchus masou* virus, chum salmon, 103

suspension test, antiviral disinfection, alcoholic disinfectants, skin disinfection, 25

2-5A synthetase, interferon- α , IFLrA, 2-D gels, computer-assisted, trisomy 21, 303

TGE, porcine transmissible gastroenteritis, viral subunit, vaccine, 211

tobacco necrosis virus, salicylate, chemotherapy, pathogenesis-related protein, 335

tomato spotted wilt virus, plant virus chemotherapy, Distamycin-A, pyrazino-pyrazine derivative, 109

topical therapy, herpes simplex virus, experimental infections, acyclovir, 253

5-trifluoromethyl-1- β -D-arabinofuranosyluracil, herpes simplex virus strains, 5-substituted 1- β -D-arabinofuranosyluracils, human embryonic lung fibroblasts, African green monkey kidney (Vero) cells, 5-formyl-1- β -D-arabinofuranosyluracil, 5-fluoro-1- β -D-arabinofuranosyluracil, 175

trisomy 21, interferon- α , IFLrA, 2-5A synthetase, 2-D gels, computer-assisted, 303

type specificity, herpes simplex virus, BrvUdr, dPyTPase, 1

vaccine, porcine transmissible gastroenteritis, viral subunit, TGE, 211

vapour phase, rhinovirus, inhibition, flavans, 235

viral subunit, porcine transmissible gastro-
enteritis, vaccine, TGE, 211
virulence assessment, influenza virus, ham-
ster, 241

volunteer studies, interferon, prophylaxis,
rhinoviruses infection, 121
