

Subject index

Volume 42 (1999)

Adenovirus; Ribozyme; Influenza A **42**, 47

Alphaviruses; Antiviral compounds; Nucleotide analogs; Methyltransferase; Guanylyltransferase **42**, 35

Amantadine; Interferon α ; Hepatitis C virus; PBMC **42**, 59

Amphotericin B; Amphotericin B colloidal dispersion; Human immunodeficiency virus (HIV); Liposomes; Sterically stabilized liposomes; Antivirals **42**, 197

Amphotericin B colloidal dispersion; Amphotericin B; Human immunodeficiency virus (HIV); Liposomes; Sterically stabilized liposomes; Antivirals **42**, 197

Animal models; Hepatitis B; Hepatitis C; Hepatitis D; Therapy; Hepatitis **42**, 77

Animal model study; Anti-herpes compound A-5021; Herpes simplex virus (HSV-1, HSV-2) **42**, 139

Anti-herpes compound A-5021; Animal model study; Herpes simplex virus (HSV-1, HSV-2) **42**, 139

Anti-influenza agents; Influenza viruses A and B; Herpes simplex virus types 1 and 2; Cytomegalovirus; Pyrimidine derivatives; Structure–antiviral activity relationships **42**, 121

Antiviral agent; Rhinoviruses; Enteroviruses; Cytochrome P450; Porphyrins **42**, 25

Antiviral; Apolipoprotein A-1; HDL; Lipoproteins; UTI β **42**, 211

Antiviral compounds; Alphaviruses; Nucleotide analogs; Methyltransferase; Guanylyltransferase **42**, 35

Antiviral; HIV; IFN; Epithelial cells **42**, 177

Antivirals; Amphotericin B; Amphotericin B colloidal disper

sion; Human immunodeficiency virus (HIV); Liposomes; Sterically stabilized liposomes **42**, 197

Apolipoprotein A-1; Antiviral; HDL; Lipoproteins; UTI β **42**, 211

Apoptotic cell death; Human keratinocytes; IFN β **42**, 109

AZT/d4T/Phosphate derivatives; Prodrugs; Nucleoside H-phosphonates; Nucleotide; HIV chemotherapy **42**, 189

Carrageenan; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Plant products; Sexually transmitted diseases; Nonoxynol-9; N-9; Cineole; Curcumin; Eugenol **42**, 219

Cineole; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Plant products; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Curcumin; Eugenol **42**, 219

Curcumin; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Plant products; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Cineole; Eugenol **42**, 219

Cytochrome P450; Rhinoviruses; Enteroviruses; Antiviral agent; Porphyrins **42**, 25

Cytomegalovirus; Influenza viruses A and B; Herpes simplex virus types 1 and 2; Anti-influenza agents; Pyrimidine derivatives; Structure–antiviral activity relationships **42**, 121

Enteroviruses; Rhinoviruses; Antiviral agent; Cytochrome P450; Porphyrins **42**, 25

Epidemiology; Influenza; Respiratory viruses; Vaccines **42**, 149

Epithelial cells; HIV; IFN; Antiviral **42**, 177

Eugenol; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Plant prod-

ucts; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Cineole; Curcumin **42**, 219

Genital herpes; Herpes simplex virus; Herpes epidemiology; Herpes treatment **42**, 1

Genital herpes; Herpes simplex virus; Topical microbicides; Vaginal microbicides; Natural products; Plant products; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

Guanylyltransferase; Alphaviruses; Antiviral compounds; Nucleotide analogs; Methyltransferase **42**, 35

HDL; Antiviral; Apolipoprotein A-1; Lipoproteins; UTI β **42**, 211

Hepatitis B; Hepatitis C; Hepatitis D; Animal models; Therapy; Hepatitis **42**, 77

Hepatitis B virus; Human immunodeficiency virus; Lamivudine; Lamivudine withdrawal hepatitis; Resistance; Triple therapy **42**, 71

Hepatitis B virus; Lamivudine; Transgenic mice; Small animal chemotherapeutic model **42**, 97

Hepatitis C; Hepatitis B; Hepatitis D; Animal models; Therapy; Hepatitis **42**, 77

Hepatitis C virus; Amantadine; Interferon α ; PBMC **42**, 59

Hepatitis D; Hepatitis B; Hepatitis C; Animal models; Therapy; Hepatitis **42**, 77

Hepatitis; Hepatitis B; Hepatitis C; Hepatitis D; Animal models; Therapy **42**, 77

Herpes epidemiology; Herpes simplex virus; Genital herpes; Herpes treatment **42**, 1

Herpes simplex virus; Genital herpes; Herpes epidemiology; Herpes treatment **42**, 1

Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Plant products; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

Herpes simplex virus (HSV-1, HSV-2); Animal model study; Anti-herpes compound A-5021 **42**, 139

Herpes simplex virus types 1 and 2; Influenza viruses A and B; PII: S0166-3542(99)00047-9

Cytomegalovirus; Anti-influenza agents; Pyrimidine derivatives; Structure–antiviral activity relationships **42**, 121

Herpes treatment; Herpes simplex virus; Genital herpes; Herpes epidemiology **42**, 1

HIV chemotherapy; AZT/d4T/Phosphate derivatives; Prodrugs; Nucleoside H-phosphonates; Nucleotide **42**, 189

HIV; IFN; Antiviral; Epithelial cells **42**, 177

HIV; Reverse transcriptase; NNRTI quinoxaline; Viral load; Resistance; Mutations **42**, 15

Human immunodeficiency virus; Hepatitis B virus; Lamivudine; Lamivudine withdrawal hepatitis; Resistance; Triple therapy **42**, 71

Human immunodeficiency virus (HIV); Amphotericin B; Amphotericin B colloidal dispersion; Liposomes; Sterically stabilized liposomes; Antivirals **42**, 197

Human keratinocytes; Apoptotic cell death; IFN β **42**, 109

IFN β ; Apoptotic cell death; Human keratinocytes **42**, 109

IFN; HIV; Antiviral; Epithelial cells **42**, 177

Influenza A; Ribozyme; Adenovirus **42**, 47

Influenza; Respiratory viruses; Epidemiology; Vaccines **42**, 149

Influenza viruses A and B; Herpes simplex virus types 1 and 2; Cytomegalovirus; Anti-influenza agents; Pyrimidine derivatives; Structure–antiviral activity relationships **42**, 121

Interferon α ; Amantadine; Hepatitis C virus; PBMC **42**, 59

Lamivudine; Hepatitis B virus; Human immunodeficiency virus; Lamivudine withdrawal hepatitis; Resistance; Triple therapy **42**, 71

Lamivudine; Hepatitis B virus; Transgenic mice; Small animal chemotherapeutic model **42**, 97

Lamivudine withdrawal hepatitis; Hepatitis B virus; Human immunodeficiency virus; Lamivudine; Resistance; Triple therapy **42**, 71

Lipoproteins; Antiviral; Apolipoprotein A-1; HDL; UTI β **42**, 211

Liposomes; Amphotericin B; Amphotericin B colloidal dispersion; Human immunodeficiency virus (HIV); Sterically stabilized liposomes; Antivirals **42**, 197

Methyltransferase; Alphaviruses; Antiviral compounds; Nucleotide analogs; Guanylyltransferase **42**, 35

Mutations; HIV; Reverse transcriptase; NNRTI quinoxaline; Viral load; Resistance **42**, 15

Natural products; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Plant products; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

N-9; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Plant products; Sexually transmitted diseases; Nonoxynol-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

NNRTI quinoxaline; HIV; Reverse transcriptase; Viral load; Resistance; Mutations **42**, 15

Nonoxynol-9; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Plant products; Sexually transmitted diseases; N-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

Nucleoside H-phosphonates; AZT/d4T/Phosphate derivatives; Prodrugs; Nucleotide; HIV chemotherapy **42**, 189

Nucleotide analogs; Alphaviruses; Antiviral compounds; Methyltransferase; Guanylyltransferase **42**, 35

Nucleotide; AZT/d4T/Phosphate derivatives; Prodrugs; Nucleoside H-phosphonates; HIV chemotherapy **42**, 189

PBMC; Amantadine; Interferon α ; Hepatitis C virus **42**, 59

Plant products; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

Porphyrins; Rhinoviruses; Enteroviruses; Antiviral agent; Cytochrome P450 **42**, 25

Prodrugs; AZT/d4T/Phosphate derivatives; Nucleoside H-phosphonates; Nucleotide; HIV chemotherapy **42**, 189

Pyrimidine derivatives; Influenza viruses A and B; Herpes simplex virus types 1 and 2; Cytomegalovirus; Anti-influenza PII: S0166-3542(99)00047-9

agents; Structure–antiviral activity relationships **42**, 121

Resistance; Hepatitis B virus; Human immunodeficiency virus; Lamivudine; Lamivudine withdrawal hepatitis; Triple therapy **42**, 71

Resistance; HIV; Reverse transcriptase; NNRTI quinoxaline; Viral load; Mutations **42**, 15

Respiratory viruses; Influenza; Epidemiology; Vaccines **42**, 149

Reverse transcriptase; HIV; NNRTI quinoxaline; Viral load; Resistance; Mutations **42**, 15

Rhinoviruses; Enteroviruses; Antiviral agent; Cytochrome P450; Porphyrins **42**, 25

Ribozyme; Influenza A; Adenovirus **42**, 47

Sexually transmitted diseases; Herpes simplex virus; Genital herpes; Topical microbicides; Vaginal microbicides; Natural products; Plant products; Nonoxynol-9; N-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

Small animal chemotherapeutic model; Lamivudine; Hepatitis B virus; Transgenic mice **42**, 97

Sterically stabilized liposomes; Amphotericin B; Amphotericin B colloidal dispersion; Human immunodeficiency virus (HIV); Liposomes; Antivirals **42**, 197

Structure–antiviral activity relationships; Influenza viruses A and B; Herpes simplex virus types 1 and 2; Cytomegalovirus; Anti-influenza agents; Pyrimidine derivatives **42**, 121

Therapy; Hepatitis B; Hepatitis C; Hepatitis D; Animal models; Hepatitis **42**, 77

Topical microbicides; Herpes simplex virus; Genital herpes; Vaginal microbicides; Natural products; Plant products; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

Transgenic mice; Lamivudine; Hepatitis B virus; Small animal chemotherapeutic model **42**, 97

Triple therapy; Hepatitis B virus; Human immunodeficiency virus; Lamivudine; Lamivudine withdrawal hepatitis; Resistance **42**, 71

UT1 β ; Antiviral; Apolipoprotein A-1; HDL; Lipoproteins **42**, 211

Vaccines; Influenza; Respiratory viruses; Epidemiology **42**, 149

Vaginal microbicides; Herpes simplex virus; Genital herpes; Topical microbicides; Natural products; Plant products; Sexually transmitted diseases; Nonoxynol-9; N-9; Carrageenan; ally

transmitted diseases; Nonoxynol-9; N-9; Carrageenan; Cineole; Curcumin; Eugenol **42**, 219

Viral load; HIV; Reverse transcriptase; NNRTI quinoxaline; Resistance; Mutations **42**, 15
