

Subject index

Volume 43 (1999)

Acridone; HIV-1; PKC; Transcription; Chronic infection **43**, 189

Adsorption inhibitor; Herpes simplex virus; Carrageenans; Antiviral activity; Virucidal activity; Sulfated polysaccharide **43**, 93

Aldara™; Cytokine; Condylomata acuminata; Human papilloma virus; Imiquimod; Interferon **43**, 55

Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

Antiviral activity; Herpes simplex virus; Carrageenans; Adsorption inhibitor; Virucidal activity; Sulfated polysaccharide **43**, 93

Antiviral agents; Anti-herpes simplex virus agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

Antiviral drugs; Drug susceptibility assays; Flow cytometry **43**, 1

Antiviral; *Rozites caperata*; Protein; Herpes simplex virus **43**, 67

Antivirals; EBV; HBV; HCMV; HHV-6; HIV-1; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

Apoptosis; Human herpesvirus 7 (HHV-7); CD4 expression; Giant cells **43**, 23

Atherogenesis; Cytomegalovirus; Atherosclerosis; chronic infection; Latency **43**, 135

Atherosclerosis; Cytomegalovirus; Atherogenesis; chronic infection; Latency **43**, 135

Borneol; Anti-herpes simplex virus agents; Antiviral agents; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

Cadmium; Zinc; Mercury; Inhibition of HIV-1 production **43**, 123

Carrageenans; Herpes simplex virus; Antiviral activity; Adsorption inhibitor; Virucidal activity; Sulfated polysaccharide **43**, 93

CD4 expression; Human herpesvirus 7 (HHV-7); Giant cells; Apoptosis **43**, 23

Cell infection; Resveratrol; Herpes; Virus **43**, 145

C31G; Human immunodeficiency virus; N-9; SDS; Vaginal microbicide; MAGI assay **43**, 157

chronic infection; Cytomegalovirus; Atherogenesis; Atherosclerosis; Latency **43**, 135

Chronic infection; HIV-1; Acridone; PKC; Transcription **43**, 189

Condylomata acuminata; Aldara™; Cytokine; Human papilloma virus; Imiquimod; Interferon **43**, 55

Cytokine; Aldara™; Condylomata acuminata; Human papilloma virus; Imiquimod; Interferon **43**, 55

Cytomegalovirus; Atherogenesis; Atherosclerosis; chronic infection; Latency **43**, 135

28-DeacetylSENDANIN; Herpes simplex virus-1; Fruit of *Melia azedarach* **43**, 103

D-FEAU; Mitochondrial function; Hepatitis B; Hepatotoxicity **43**, 201

Drug susceptibility assays; Antiviral drugs; Flow cytometry **43**, 1

EBV; Antivirals; HBV; HCMV; HHV-6; HIV-1; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

Essential oil; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

Flow cytometry; Antiviral drugs; Drug susceptibility assays **43**, 1

Fruit of *Melia azedarach*; Herpes simplex virus-1; 28-DeacetylSENDANIN **43**, 103

Ganciclovir; MCMV; Methylenecyclopropane analogues; Phosphoroalaninate prodrugs; Oral therapy; Pathogenesis; Mice **43**, 175

Giant cells; Human herpesvirus 7 (HHV-7); CD4 expression; Apoptosis **43**, 23

Glycoproteins of HSV-1; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

Glycosylation; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

Glycosylation inhibitors; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

HBV; Antivirals; EBV; HCMV; HHV-6; HIV-1; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

HCMV; Antivirals; EBV; HBV; HHV-6; HIV-1; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

Hepatitis B; D-FEAU; Mitochondrial function; Hepatotoxicity **43**, 201

Hepatitis C; IFN- α ; TBARS **43**, 113

Hepatotoxicity; D-FEAU; Mitochondrial function; Hepatitis B **43**, 201

Herpes; Resveratrol; Cell infection; Virus **43**, 145

Herpes simplex virus 1; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

Herpes simplex virus; Antiviral; *Rozites caperata*; Protein **43**, 67

Herpes simplex virus; Carrageenans; Antiviral activity; Adsorption inhibitor; Virucidal activity; Sulfated polysaccharide **43**, 93

Herpes simplex virus-1; Fruit of *Melia azedarach*; 28-DeacetylSENDANIN **43**, 103

HHV-6; Antivirals; EBV; HBV; HCMV; HIV-1; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

HIV-1; Acridone; PKC; Transcription; Chronic infection **43**, 189

HIV-1; Antivirals; EBV; HBV; HCMV; HHV-6; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

HSV-1; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

HSV-2; Antivirals; EBV; HBV; HCMV; HHV-6; HIV-1; HSV-1; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

HSV-1; Antivirals; EBV; HBV; HCMV; HHV-6; HIV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

Human herpesvirus 7 (HHV-7); CD4 expression; Giant cells; Apoptosis **43**, 23

Human immunodeficiency virus; N-9; C31G; SDS; Vaginal microbicide; MAGI assay **43**, 157

Human papilloma virus; Aldara™; Cytokine; Condylomata acuminata; Imiquimod; Interferon **43**, 55

IFN- α ; Hepatitis C; TBARS **43**, 113

Imiquimod; Aldara™; Cytokine; Condylomata acuminata; Human papilloma virus; Interferon **43**, 55

Inhibition of HIV-1 production; Zinc; Cadmium; Mercury **43**, 123

Interferon; Aldara™; Cytokine; Condylomata acuminata; Human papilloma virus; Imiquimod **43**, 55

Isoborneol; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

Latency; Cytomegalovirus; Atherogenesis; Atherosclerosis; chronic infection **43**, 135

MAGI assay; Human immunodeficiency virus; N-9; C31G; SDS; Vaginal microbicide **43**, 157

MCMV; Antivirals; EBV; HBV; HCMV; HHV-6; HIV-1; HSV-1; HSV-2; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

MCMV; Methylenecyclopropane analogues; Phosphoroalaninate prodrugs; Ganciclovir; Oral therapy; Pathogenesis; Mice **43**, 175

Mercury; Zinc; Cadmium; Inhibition of HIV-1 production **43**, 123

Methylenecyclopropane analogues; Antivirals; EBV; HBV;

HCMV; HHV-6; HIV-1; HSV-1; HSV-2; MCMV; Phenyl phosphoralaninates; Prodrugs; VZV **43**, 37

Methylenecyclopropane analogues; MCMV; Phosphoroalaninate prodrugs; Ganciclovir; Oral therapy; Pathogenesis; Mice **43**, 175

Mice; MCMV; Methylenecyclopropane analogues; Phosphoroalaninate prodrugs; Ganciclovir; Oral therapy; Pathogenesis **43**, 175

Mitochondrial function; D-FEAU; Hepatitis B; Hepatotoxicity **43**, 201

Monoterpenes; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; *Salvia fruticosa*; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

N-9; Human immunodeficiency virus; C31G; SDS; Vaginal microbicide; MAGI assay **43**, 157

Oral therapy; MCMV; Methylenecyclopropane analogues; Phosphoroalaninate prodrugs; Ganciclovir; Pathogenesis; Mice **43**, 175

Pathogenesis; MCMV; Methylenecyclopropane analogues; Phosphoroalaninate prodrugs; Ganciclovir; Oral therapy; Mice **43**, 175

Phenyl phosphoralaninates; Antivirals; EBV; HBV; HCMV; HHV-6; HIV-1; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Prodrugs; VZV **43**, 37

Phosphoroalaninate prodrugs; MCMV; Methylenecyclopropane analogues; Ganciclovir; Oral therapy; Pathogenesis; Mice **43**, 175

PKC; HIV-1; Acridone; Transcription; Chronic infection **43**, 189

Prodrugs; Antivirals; EBV; HBV; HCMV; HHV-6; HIV-1; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; VZV **43**, 37

Protein; Antiviral; *Rozites caperata*; Herpes simplex virus **43**, 67

Resveratrol; Herpes; Cell infection; Virus **43**, 145

***Rozites caperata*;** Antiviral; Protein; Herpes simplex virus **43**, 67

Salvia fruticosa; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; Specific inhibitors of viral glycosylation; Transformed Vero cells **43**, 79

SDS; Human immunodeficiency virus; N-9; C31G; Vaginal microbicide; MAGI assay **43**, 157

Specific inhibitors of viral glycosylation; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Transformed Vero cells **43**, 79

Sulfated polysaccharide; Herpes simplex virus; Carrageenans; Antiviral activity; Adsorption inhibitor; Virucidal activity **43**, 93

TBARS; Hepatitis C; IFN- α **43**, 113

Transcription; HIV-1; Acridone; PKC; Chronic infection **43**, 189

Transformed Vero cells; Anti-herpes simplex virus agents; Antiviral agents; Borneol; Essential oil; Glycoproteins of HSV-1; Glycosylation; Glycosylation inhibitors; Herpes simplex virus 1; HSV-1; Isoborneol; Monoterpenes; *Salvia fruticosa*; Specific inhibitors of viral glycosylation **43**, 79

Vaginal microbicide; Human immunodeficiency virus; N-9; C31G; SDS; MAGI assay **43**, 157

Virucidal activity; Herpes simplex virus; Carrageenans; Antiviral activity; Adsorption inhibitor; Sulfated polysaccharide **43**, 93

Virus; Resveratrol; Herpes; Cell infection **43**, 145

VZV; Antivirals; EBV; HBV; HCMV; HHV-6; HIV-1; HSV-1; HSV-2; MCMV; Methylenecyclopropane analogues; Phenyl phosphoralaninates; Prodrugs **43**, 37

Zinc; Cadmium; Mercury; Inhibition of HIV-1 production **43**, 123
