

Subject index

Volume 56 (2002)

Acyclovir; Herpes simplex virus type 1; Cidofovir; Thymidine kinase; Mutation **56**, 253

Acyclovir; Herpesvirus; Docosanol; Drug–drug interactions **56**, 153

Acyclovir; SDS; Electrical coupling **56**, 143

Adenovirus; Antiviral drugs; Cidofovir; Drug resistance **56**, 73

Adoptive transfer; Hepatitis B; Rat kidney transplantation **56**, 29

Antioxidant; Apoptosis; Influenza virus; Reactive oxygen species; Fetal membrane **56**, 207

Antiretroviral drugs; Polymorphisms; Cytotoxic T-lymphocyte (CTL) **56**, 129

Antiviral agents; Transient kinetics; Nucleoside inhibitors; Molecular modeling **56**, 189

Antiviral drugs; Adenovirus; Cidofovir; Drug resistance **56**, 73

Antiviral effect; Hepatitis C virus; Hypervariable region 1; Immunoglobulin; Recombinant Fab **56**, 51

Antiviral; Tat-mediated transactivation; Polyamide nucleotide analog; Trans-activation response region; Reverse transcription; HIV-1 replication **56**, 13

Apoptosis; Influenza virus; Reactive oxygen species; Antioxidant; Fetal membrane **56**, 207

AZT; Murine AIDS; Macrophages; DDI; GSH-loaded erythrocytes **56**, 263

Benzimidazole ribonucleoside; HCMV; 1263W94; Drug interactions **56**, 61

Bone marrow toxicity; Ribonucleotide reductase; Murine AIDS; Hydroxyurea; Didox; Trimidox **56**, 167

Breakthrough virus; Fluoroquinoline; Transcription inhibitor; Tat; Chronic infection **56**, 85

Chronic infection; Fluoroquinoline; Transcription inhibitor; Tat; Breakthrough virus **56**, 85

Cidofovir; Antiviral drugs; Adenovirus; Drug resistance **56**, 73

Cidofovir; Herpes simplex virus type 1; Acyclovir; Thymidine kinase; Mutation **56**, 253

Cytokines; Influenza; Medicinal herb; Interleukin-12 **56**, 183

Cytotoxic T-lymphocyte (CTL); Polymorphisms; Antiretroviral drugs **56**, 129

DDI; Murine AIDS; Macrophages; AZT; GSH-loaded erythrocytes **56**, 263

Dengue virus; Liver cells; Heparin **56**, 93

Didox; Ribonucleotide reductase; Murine AIDS; Bone marrow toxicity; Hydroxyurea; Trimidox **56**, 167

DNA polymerase; Herpesviruses; Evolution; HCMV **56**, 1

Docosanol; Herpesvirus; Acyclovir; Drug–drug interactions **56**, 153

Drug–drug interactions; Herpesvirus; Docosanol; Acyclovir **56**, 153

Drug interactions; Benzimidazole ribonucleoside; HCMV; 1263W94 **56**, 61

Drug resistance; Antiviral drugs; Adenovirus; Cidofovir **56**, 73

- Electrical coupling;** Acyclovir; SDS 56, 143
- Epstein–Barr virus (EBV);** Syk tyrosine kinase; Phosphatidylinositol 3-kinase 56, 219
- Evolution;** Herpesviruses; HCMV; DNA polymerase 56, 1
- Fetal membrane;** Apoptosis; Influenza virus; Reactive oxygen species; Antioxidant 56, 207
- Fluoroquinolone;** Transcription inhibitor; Tat; Breakthrough virus; Chronic infection 56, 85
- Foscarnet-resistance;** Synadenol; Synguanol; Ganciclovir-resistance; HCMV drug-susceptibility; HCMV UL97 phosphotransferase 56, 273
- Ganciclovir-resistance;** Synadenol; Synguanol; Foscarnet-resistance; HCMV drug-susceptibility; HCMV UL97 phosphotransferase 56, 273
- Glycosphingolipids;** HIV-1; V3-peptides; Viral entry; HIV-therapeutics 56, 233
- GSH-loaded erythrocytes;** Murine AIDS; Macrophages; AZT; DDI 56, 263
- HCMV;** Benzimidazole ribonucleoside; 1263W94; Drug interactions 56, 61
- HCMV drug-susceptibility;** Synadenol; Synguanol; Ganciclovir-resistance; Foscarnet-resistance; HCMV UL97 phosphotransferase 56, 273
- HCMV;** Herpesviruses; Evolution; DNA polymerase 56, 1
- HCMV UL97 phosphotransferase;** Synadenol; Synguanol; Ganciclovir-resistance; Foscarnet-resistance; HCMV drug-susceptibility 56, 273
- Heparin;** Dengue virus; Liver cells 56, 93
- Hepatitis B;** Adoptive transfer; Rat kidney transplantation 56, 29
- Hepatitis C virus;** Hypervariable region 1; Immunoglobulin; Recombinant Fab; Antiviral effect 56, 51
- Herpes simplex virus type 1;** Acyclovir; Cidofovir; Thymidine kinase; Mutation 56, 253
- Herpesvirus;** Docosanol; Acyclovir; Drug–drug interactions 56, 153
- Herpesviruses;** Evolution; HCMV; DNA polymerase 56, 1
- HIV dynamics;** Pharmacokinetics; Pharmacodynamics 56, 115
- HIV-1 replication;** Tat-mediated transactivation; Polyamide nucleotide analog; Trans-activation response region; Antiviral; Reverse transcription 56, 13
- HIV-therapeutics;** HIV-1; V3-peptides; Viral entry; Glycosphingolipids 56, 233
- HIV-1;** V3-peptides; Viral entry; Glycosphingolipids; HIV-therapeutics 56, 233
- Hot water extract;** *Spirulina*; Inhibition; HSV-2 56, 279
- HSV-2;** Interferon; HSV-1; Real time PCR 56, 39
- HSV-1;** Interferon; HSV-2; Real time PCR 56, 39
- HSV-2;** *Spirulina*; Inhibition; Hot water extract 56, 279
- Hydroxyurea;** Ribonucleotide reductase; Murine AIDS; Bone marrow toxicity; Didox; Trimidox 56, 167
- Hypervariable region 1;** Hepatitis C virus; Immunoglobulin; Recombinant Fab; Antiviral effect 56, 51
- Immunoglobulin;** Hepatitis C virus; Hypervariable region 1; Recombinant Fab; Antiviral effect 56, 51
- Influenza;** Cytokines; Medicinal herb; Interleukin-12 56, 183
- Influenza virus;** Apoptosis; Reactive oxygen species; Antioxidant; Fetal membrane 56, 207
- Inhibition;** Rhinovirus; Polymerase; Screening; Zinc 56, 99
- Inhibition;** *Spirulina*; HSV-2; Hot water extract 56, 279
- Interferon;** HSV-1; HSV-2; Real time PCR 56, 39
- Interleukin-12;** Influenza; Cytokines; Medicinal herb 56, 183
- Liver cells;** Dengue virus; Heparin 56, 93
- Macrophages;** Murine AIDS; AZT; DDI; GSH-loaded erythrocytes 56, 263
- Medicinal herb;** Influenza; Cytokines; Interleukin-12 56, 183
- Molecular modeling;** Antiviral agents; Transient kinetics; Nucleoside inhibitors 56, 189
- Murine AIDS;** Macrophages; AZT; DDI; GSH-loaded erythrocytes 56, 263
- Murine AIDS;** Ribonucleotide reductase; Bone marrow toxicity; Hydroxyurea; Didox; Trimidox 56, 167

- Mutation**; Herpes simplex virus type 1; Acyclovir; Cidofovir; Thymidine kinase **56**, 253
- Nucleoside inhibitors**; Antiviral agents; Transient kinetics; Molecular modeling **56**, 189
- Pharmacodynamics**; HIV dynamics; Pharmacokinetics **56**, 115
- Pharmacokinetics**; HIV dynamics; Pharmacodynamics **56**, 115
- Phosphatidylinositol 3-kinase**; Epstein–Barr virus (EBV); Syk tyrosine kinase **56**, 219
- Polyamide nucleotide analog**; Tat-mediated transactivation; Trans-activation response region; Antiviral; Reverse transcription; HIV-1 replication **56**, 13
- Polymerase**; Rhinovirus; Inhibition; Screening; Zinc **56**, 99
- Polymorphisms**; Cytotoxic T-lymphocyte (CTL); Antiretroviral drugs **56**, 129
- Rat kidney transplantation**; Adoptive transfer; Hepatitis B **56**, 29
- Reactive oxygen species**; Apoptosis; Influenza virus; Antioxidant; Fetal membrane **56**, 207
- Real time PCR**; Interferon; HSV-1; HSV-2 **56**, 39
- Recombinant Fab**; Hepatitis C virus; Hypervariable region 1; Immunoglobulin; Antiviral effect **56**, 51
- Reverse transcription**; Tat-mediated transactivation; Polyamide nucleotide analog; Trans-activation response region; Antiviral; HIV-1 replication **56**, 13
- Rhinovirus**; Polymerase; Inhibition; Screening; Zinc **56**, 99
- Ribonucleotide reductase**; Murine AIDS; Bone marrow toxicity; Hydroxyurea; Didox; Trimidox **56**, 167
- Screening**; Rhinovirus; Polymerase; Inhibition; Zinc **56**, 99
- SDS**; Acyclovir; Electrical coupling **56**, 143
- Spirulina**; Inhibition; HSV-2; Hot water extract **56**, 279
- Syk tyrosine kinase**; Epstein–Barr virus (EBV); Phosphatidylinositol 3-kinase **56**, 219
- Synadenol**; Synguanol; Ganciclovir-resistance; Foscarnet-resistance; HCMV drug-susceptibility; HCMV UL97 phosphotransferase **56**, 273
- Synguanol**; Synadenol; Ganciclovir-resistance; Foscarnet-resistance; HCMV drug-susceptibility; HCMV UL97 phosphotransferase **56**, 273
- Tat**; Fluoroquinoline; Transcription inhibitor; Breakthrough virus; Chronic infection **56**, 85
- Tat-mediated transactivation**; Polyamide nucleotide analog; Trans-activation response region; Antiviral; Reverse transcription; HIV-1 replication **56**, 13
- Thymidine kinase**; Herpes simplex virus type 1; Acyclovir; Cidofovir; Mutation **56**, 253
- Trans-activation response region**; Tat-mediated transactivation; Polyamide nucleotide analog; Antiviral; Reverse transcription; HIV-1 replication **56**, 13
- Transcription inhibitor**; Fluoroquinoline; Tat; Breakthrough virus; Chronic infection **56**, 85
- Transient kinetics**; Antiviral agents; Nucleoside inhibitors; Molecular modeling **56**, 189
- Trimidox**; Ribonucleotide reductase; Murine AIDS; Bone marrow toxicity; Hydroxyurea; Didox **56**, 167
- Viral entry**; HIV-1; V3-peptides; Glycosphingolipids; HIV-therapeutics **56**, 233
- V3-peptides**; HIV-1; Viral entry; Glycosphingolipids; HIV-therapeutics **56**, 233
- 1263W94**; Benzimidazole ribonucleoside; HCMV; Drug interactions **56**, 61
- Zinc**; Rhinovirus; Polymerase; Inhibition; Screening **56**, 99
