

Subject index

Volume 70 (2006)

- Amantadine**; Influenza A virus; Oseltamivir; Drug resistance **70**, 121
- Antibody**; HIV; Early diagnosis; Native antigens; Neutralization test **70**, 21
- Anti-HBV compounds**; HBV; HBs (surface) protein; HBc (core) protein **70**, 85
- Antitherpetic drug**; Herpes simplex virus; Thymidine kinase; TK-deficiency; Drug-resistance; Nucleoside uptake; Nucleoside anabolism **70**, 93
- Antiviral**; Hepatitis C virus; Protease; Inhibitor; Resistance **70**, 28
- Antivirals**; Viral infections; Epidemic influenza; Respiratory viruses **70**, 1
- Arsenic**; Interferon-alpha; HTLV-1; Squirrel monkeys; Treatment; Proviral load; Flower cells **70**, 132
- Bird nest**; Influenza; Sialic acid **70**, 140
- Capravirine**; Nonnucleoside reverse transcriptase inhibitor; HIV; Resistance **70**, 66
- Conserved RNA sequences**; G-quartet; Facilitated uptake; Ribonuclease H; 2'-O-Methyl-RNA oligonucleotides; Phosphorothioate **70**, 60
- Drug resistance**; Influenza A virus; Oseltamivir; Amantadine **70**, 121
- Drug-resistance**; Herpes simplex virus; Thymidine kinase; TK-deficiency; Antitherpetic drug; Nucleoside uptake; Nucleoside anabolism **70**, 93
- Early diagnosis**; HIV; Antibody; Native antigens; Neutralization test **70**, 21
- Enterovirus 71**; Ozone; Virus inactivation **70**, 147
- Epidemic influenza**; Viral infections; Respiratory viruses; Antivirals **70**, 1
- Facilitated uptake**; Conserved RNA sequences; G-quartet; Ribonuclease H; 2'-O-Methyl-RNA oligonucleotides; Phosphorothioate **70**, 60
- Flower cells**; Arsenic; Interferon-alpha; HTLV-1; Squirrel monkeys; Treatment; Proviral load **70**, 132
- Gag mutation**; Human immunodeficiency virus type 1; Nelfinavir-resistant **70**, 51
- gB**; HSV-1; Yatein; ICP4; α -Trans-induction factor **70**, 112
- G-quartet**; Conserved RNA sequences; Facilitated uptake; Ribonuclease H; 2'-O-Methyl-RNA oligonucleotides; Phosphorothioate **70**, 60
- HBc (core) protein**; HBV; HBs (surface) protein; Anti-HBV compounds **70**, 85
- HBs (surface) protein**; HBV; HBc (core) protein; Anti-HBV compounds **70**, 85
- HBV**; HBs (surface) protein; HBc (core) protein; Anti-HBV compounds **70**, 85
- Hepatitis C virus**; Protease; Inhibitor; Resistance; Antiviral **70**, 28
- Herpes simplex virus**; Thymidine kinase; TK-deficiency; Drug-resistance; Antitherpetic drug; Nucleoside uptake; Nucleoside anabolism **70**, 93
- High-throughput screen (HTS)**; West Nile virus; Small molecule inhibitor **70**, 39
- HIV**; Capravirine; Nonnucleoside reverse transcriptase inhibitor; Resistance **70**, 66
- HIV**; Early diagnosis; Antibody; Native antigens; Neutralization test **70**, 21
- HIV-1 resistance**; Protease inhibitors; P-1946 **70**, 17
- HSV-1**; Yatein; gB; ICP4; α -Trans-induction factor **70**, 112
- HTLV-1**; Arsenic; Interferon-alpha; Squirrel monkeys; Treatment; Proviral load; Flower cells **70**, 132
- Human immunodeficiency virus type 1**; Nelfinavir-resistant; Gag mutation **70**, 51
- ICP4**; HSV-1; Yatein; gB; α -Trans-induction factor **70**, 112
- Influenza A virus**; Oseltamivir; Amantadine; Drug resistance **70**, 121
- Influenza**; Bird nest; Sialic acid **70**, 140
- Influenza**; Pneumonia; Interleukin-12; Innate response **70**, 75
- Inhibitor**; Hepatitis C virus; Protease; Resistance; Antiviral **70**, 28
- Innate response**; Influenza; Pneumonia; Interleukin-12 **70**, 75
- Interferon-alpha**; Arsenic; HTLV-1; Squirrel monkeys; Treatment; Proviral load; Flower cells **70**, 132
- Interleukin-12**; Influenza; Pneumonia; Innate response **70**, 75

- L protein**; RNA interference; siRNA; Subacute sclerosing panencephalitis; Measles virus **70, 105**
- Measles virus**; RNA interference; siRNA; Subacute sclerosing panencephalitis; L protein **70, 105**
- Native antigens**; HIV; Early diagnosis; Antibody; Neutralization test **70, 21**
- Nelfinavir-resistant**; Human immunodeficiency virus type 1; Gag mutation **70, 51**
- Neutralization test**; HIV; Early diagnosis; Antibody; Native antigens **70, 21**
- Nonnucleoside reverse transcriptase inhibitor**; Capravirine; HIV; Resistance **70, 66**
- Nucleoside anabolism**; Herpes simplex virus; Thymidine kinase; TK-deficiency; Drug-resistance; Antiherpetic drug; Nucleoside uptake **70, 93**
- Nucleoside uptake**; Herpes simplex virus; Thymidine kinase; TK-deficiency; Drug-resistance; Antiherpetic drug; Nucleoside anabolism **70, 93**
- 2'-O-Methyl-RNA oligonucleotides**; Conserved RNA sequences; G-quartet; Facilitated uptake; Ribonuclease H; Phosphorothioate **70, 60**
- Oseltamivir**; Influenza A virus; Amantadine; Drug resistance **70, 121**
- Ozone**; Enterovirus 71; Virus inactivation **70, 147**
- P-1946**; Protease inhibitors; HIV-1 resistance **70, 17**
- Phosphorothioate**; Conserved RNA sequences; G-quartet; Facilitated uptake; Ribonuclease H; 2'-O-Methyl-RNA oligonucleotides **70, 60**
- Pneumonia**; Influenza; Interleukin-12; Innate response **70, 75**
- Protease**; Hepatitis C virus; Inhibitor; Resistance; Antiviral **70, 28**
- Protease inhibitors**; P-1946; HIV-1 resistance **70, 17**
- Proviral load**; Arsenic; Interferon-alpha; HTLV-1; Squirrel monkeys; Treatment; Flower cells **70, 132**
- Resistance**; Capravirine; Nonnucleoside reverse transcriptase inhibitor; HIV **70, 66**
- Resistance**; Hepatitis C virus; Protease; Inhibitor; Antiviral **70, 28**
- Respiratory viruses**; Viral infections; Epidemic influenza; Antivirals **70, 1**
- Ribonuclease H**; Conserved RNA sequences; G-quartet; Facilitated uptake; 2'-O-Methyl-RNA oligonucleotides; Phosphorothioate **70, 60**
- RNA interference**; siRNA; Subacute sclerosing panencephalitis; Measles virus; L protein **70, 105**
- Sialic acid**; Influenza; Bird nest **70, 140**
- siRNA**; RNA interference; Subacute sclerosing panencephalitis; Measles virus; L protein **70, 105**
- Small molecule inhibitor**; High-throughput screen (HTS); West Nile virus **70, 39**
- Squirrel monkeys**; Arsenic; Interferon-alpha; HTLV-1; Treatment; Proviral load; Flower cells **70, 132**
- Subacute sclerosing panencephalitis**; RNA interference; siRNA; Measles virus; L protein **70, 105**
- Thymidine kinase**; Herpes simplex virus; TK-deficiency; Drug-resistance; Antiherpetic drug; Nucleoside uptake; Nucleoside anabolism **70, 93**
- TK-deficiency**; Herpes simplex virus; Thymidine kinase; Drug-resistance; Antiherpetic drug; Nucleoside uptake; Nucleoside anabolism **70, 93**
- α -Trans-induction factor**; HSV-1; Yatein; gB; ICP4 **70, 112**
- Treatment**; Arsenic; Interferon-alpha; HTLV-1; Squirrel monkeys; Proviral load; Flower cells **70, 132**
- Viral infections**; Epidemic influenza; Respiratory viruses; Antivirals **70, 1**
- Virus inactivation**; Enterovirus 71; Ozone **70, 147**
- West Nile virus**; High-throughput screen (HTS); Small molecule inhibitor **70, 39**
- Yatein**; HSV-1; gB; ICP4; α -Trans-induction factor **70, 112**
