Publishers Note

With this note I would like to inform the authors and readers of *Antiviral Research* of an important editorial development.

As you may know, Erik de Clercq has stepped down as Editor-in-Chief of the journal at the end of 2011, after more than thirty dedicated years. Erik has been responsible for establishing *Antiviral Research* as a major international journal of high quality, with a growing impact factor. I would like to take this opportunity to thank him for the tremendous work he has done for the journal over the years and wish him the very best with all of his future endeavors.

I am delighted to announce that Mike Bray (National Institutes of Health, USA) will succeed Erik de Clercq in his role as Editor-in-Chief. He will be supported by an international Editorial Team of five outstanding Associate Editors, who are all renowned experts in the field of antiviral research: José Esté (Fundació IrsiCiixa, Barcelona), Subhash Vasudevan (Duke-National University of Singapore), Dale Barnard (Utah State University), Mark Prichard (University of Alabama) and Hui-Ling Yen (University of Hong Kong).

I am extremely proud to introduce this new Editorial Team and I trust that they can count upon your continued support as valued authors and readers.

Yours sincerely,

Alina Helsloot
Publisher *Antiviral Research*
