

Aims and Scope

A journal for research on the prevention and treatment of viral diseases

Antiviral Research publishes research reports, short communications, review articles and commentaries on the control of viral infections in humans and animals. Its scope encompasses:

- antiviral drugs, antibodies and host-response modifiers, including their synthesis, *in vitro* and *in vivo* testing and mechanisms of action;
- new or improved vaccines against viral infections of humans and animals;
- assessments of drug and vaccine safety;
- evolution of drug- or vaccine-resistant viruses and the development of effective countermeasures;
- identification and validation of new drug targets;
- laboratory animal models of viral diseases;
- pathogenesis of viral diseases and mechanisms of viral evasion of host immune responses.

Antiviral Research is an official publication of the International Society for Antiviral Research (<http://www.isar-icar.com>).
