

Notice

We were distressed to hear of the recent death of Professor Kurt Irgolic, a frequent contributor to this Journal and a member of the Editorial Board since the inception of *Applied Organometallic Chemistry* in 1987. Kurt died accidentally in the mountains whilst on a field trip in the course of his research work. We plan to produce a special memorial issue of this Journal in Kurt's honour, but in the meantime we extend our sympathy and condolences to Kurt's wife Gerlinda and his daughter Bridget. Kurt Irgolic is a co-author of a paper in the present issue.
