

Editor's note

As Editor of Applied Organometallic Chemistry I would like to express our appreciation to our colleague Professor Helmut Bonnemann of the Max Planck institute for Kohlenforschung in Muelheim, Germany for taking on the task of editing this special issue. I am sure that readers will agree that the collection of papers presented here is a useful and tangible record of the work area discussed and presented at last year's FEChem meeting in Zurich. AOC is privileged to publish material from these meetings, including the previous one held in Lisbon and we thank the organizers of these FEChem meetings for being able to do so. In particular we express our appreciation to Helmut for all his work in gathering the manuscripts published here, having them reviewed and assisting authors with the numerous queries involved.

Thank you Helmut, and many congratulations on your 65th birthday!

Peter Craig
Editor-in-Chief
