Methods for Determining Metal Ion Environments in Proteins.

By Dennis W. Darnall and Ralph G. Wilkins. Elsevier North-Holland, New York, 1980, 324 pages, \$29.50.

Natural Sulfur Compounds: Novel Biochemical and Structural Aspects.

Edited by Dorian Cavallini, Gerald E. Gaull, and Vincenzo Zappia. Plenum Press, New York, 1980, 552 pages, \$49.50.

Dehydrogenases Requiring Nicotinamide Coenzymes.

Edited by Jonathan Jeffery. Birkhauser Boston, Inc., 1980, 284 pages, \$36.

Structure and Bonding, Volume 41: Molecular Structure and Sensory Physiology.

Edited by Peter Hemmerich. Springer-Verlag, New York, 1980, 146 pages, \$36.80.

Enzyme Engineering: Future Directions.

Edited by Lemuel B. Wingard, Jr., Ilia V. Berezin, and Anatole A. Klyosov. Plenum Press, New York, 1980, 521 pages, \$59.50.
