Playing Tips!

STREET CHEAT then press HELP.

STREET FIGHTER II

(US Gold)

This cheat requires a second disk drive, but allows you to control one of the big four baddies...

Don't insert disk 2 in your second drive when loading. Play the solo game and, when you fight the baddie you want to be, eg Vega, let yourself be killed. Now select two-player mode and select E Honda for player 2. As long as player 1 doesn't select Ryu, he'll control the relevant big baddie (eg Vega) in the contest.

In a two-player game, to allow both players to select the same character pause the game and type 7KIDS. In one-player mode, move the cursor over Blanka but don't press fire. Type PATIENCE (slowly) and select your fighter as normal. You can now replenish your energy by hitting F10. Alternatively, choose a one-player game and, on the character selection screen, put your cursor over Blanka — but don't press fire! Instead type in the letters of PATIENCE, holding each down for a couple of seconds. The border will flash yellow to indicate success. During the game you can press F10 to restore your character's energy to full.

Playing Tips!

Playing Guide; Guile

Learned to fight while training for an American elite special forces team. Uses a blend of karate and street fighting.

Special Moves

Sonic Boom: wall of energy created by swinging his arms.

Overhead Flash Kick: powerful defence against aerial attacks.

Vs Ryu/Ken

Computer Ryu can easily be defeated by dropping him with over-shoulder throw, then finishing him off with more throws and punches.

The more aggressive Ken is trickier. Stay back and pick him off as he tries all his flashy kicks. Jump to avoid fireball attacks and wait for a chance to throw him.

Vs E Honda

With good timing you can throw the fat guy all over the place. The only danger is his thousand slaps attack.

Vs Chun Li

Stop her from getting close by using sonic booms and strong kicks. Only go for the killing throws when she's lost much energy.

Vs Blanka

Quick throws are best. If he tries his electric defence, zap him with a sonic boom!

Vs Zangief

Playing Tips!

Get in close, keep throwing him, not giving him a chance to counter. If you mistime an attack, fall back and blast him with sonic booms until you can get close again.

Vs Dhalsim

The bendy fella relies on long-range attacks, so get in close and do some fast throws and punches.

Vs Balrog

Wait for an opening, then use throw and punches. Block any attacks, though — one good hit and you're dead.

Vs Vega

Your only chance is to stay airborne, using long kick jumps and the mid-air throw.

Vs Sagat

Use flash kicks and long leg sweeps. Don't trade punches, but throw him if you get the chance.

Vs M Bison

Wait for him to approach, then attack quickly with sonic booms and flash kicks.

Chun Li

Compensates for her lack of strength with quickness and agility. Very good in the air.

Special Moves

One Hundred Kicks: ultrafast repetitive kicking.

Spinning Bird Kick: spectacular overhead kick, upside down with legs spinning!

Vs Ryu/Ken

Playing Tips!

Easy against computer, hard against a good player. Stay in the air and don't get too close — use one hundred kicks if they come you.

Vs E Honda

Fatty defends well against flying kicks, so try quickly bouncing either side of him and throwing when you get the chance.

Vs Blanka

A toughie. Watch out for his rolling ground attacks and jumping flip kicks. Wait till he electrifies himself, then foot-stomp on him (you won't get fried).

Vs Zangief

Use spinning bird kicks and throw him when he's dazed. Don't let him get hold of you.

Vs Guile

Tricky, as he equals you in aerial power. Use hit-and-run tactics and bounce around to confuse him.

Vs Dhalsim

Keep on the attack — don't give him any time to counter. Try some mid-air strong kicks.

Vs Balrog

When he comes close, jump up and strong-kick on the way down. Once he's on his back, follow him across the screen with medium punches before throwing him.

Vs Vega

Can beat you in the air with his flying leg attack. Try using solid defensive tactics and the occasional spinning bird kick.

Vs Sagat

Playing Tips!

Wait till he gets close, then go for an aerial attack. Watch out for his tiger uppercuts.

Vs M Bison

Lure him into an attack, then hit him in mid air. When you get the chance, throw and kick him like mad.

Ryu/Ken

These karate kids have essentially the same range of moves, so tactics are identical.

Special Moves

Psycho Fireball: easy to perform and very damaging.

Hurricane Kick: this spinning kick's a great way to get quickly across the screen.

Dragon Punch: hard to execute, but virtually unstoppable.

Vs E Honda

Keep him at a distance using fireballs. If he jumps towards you, do a leg sweep. Don't try flying kicks.

Vs Chun Li

Don't attack or use fireballs. Against computer, use strong uppercuts as she jumps at you. Versus a player, wait till she jumps, move underneath her, and short-kick or throw her.

Vs Blanka

Easy to throw. Just keep out of range from his long sweeps and punches. If he goes electric, fireball him!

Playing Tips!

Vs Zangief

A cinch. Against computer, jump up and down using strong roundhouse kicks in the air.

Vs Guile

Against computer, immediately walk right and throw him. Don't jump-kick — his flash kick's better. Don't get too far away or he'll use his sonic boom.

Vs Dhalsim

Keep your distance and use fireballs on his extending limbs. If he tries a spinning drill, hit him with a fireball. If he does a fire or flame attack, leap over him and attack from behind.

Vs Balrog

Dead easy. Immediately go for a long hurricane kick to daze him. Throw or dragon-punch, then do a couple of short sweeps for a perfect victory!

Vs Vega

Time your fireballs so he lands on them. Stay back and try to run down the clock. When he jumps off the fence, dragon-punch him.

Vs Sagat

Duck at the start and use strong leg sweeps. If he tries a tiger uppercut, move beneath him and strong-leg-sweep as he lands.

Vs M Bison

Block his attacks, and counter when you see an opening. Dragon punches, hurricane kicks, and short kicks are best — not fireballs.

Playing Tips!

Edmond Honda

The gigantic Sumo wrestler is remarkably quick for his size. Virtually unbeatable in a ground battle.

Special Moves

Thousand Hand Slap: ultrafast slapping is a good defence.

Super Head Butt: most effective at short range.

Vs Ryu/Ken

Use the overhead chop on their flying attacks. Move in and smash them with strong punches and kicks.

Vs Chun Li

Defend against aerial attacks with overhead chop. Attack when she's on the ground — you superior strength will tell.

Vs Blanka

Give him plenty of slaps and chops. When he approaches, punch and kick him till he's dazed.

Vs Zangief

Wait for your chance and thousand-slap him to death. Go for the occasional throw, but don't get too close.

Vs Guile

He's very quick, so keep your defence up. Surprise him with the occasional flying head butt.

Vs Dhalsim

Try to jump in close — he's a swine at long range, but once in a corner he's a pushover.

Vs Balrog

Playing Tips!

Just thousand-slap him to death — the thicke'll keep walking into them!

Vs Vega

The cowardly swine usually keeps his distance. When he does get close, kick him. Run the clock down if necessary.

Vs Sagat

Get in close or his energy waves'll kill you. Lay into him with everything you've got, and don't stop.

Vs M Bison

Be patient: wait for him to come to you. Block his attacks and counter with slapping.

Dhalsim

Through meditation, he can contort his body and extend his limbs for long-range attacks.

Special Moves

Yoga Fire: a ball of energy that fries anything in its path.

Yoga Flame: devastating fire-breath attack — must be all those curries he eats!

Vs Ryu/Ken

Punch them from long range, then jump in with a flying drill. Slide underneath fireballs.

Vs E Honda

Yoga flames and fire work well — fatty has difficulty jumping over them. Or try sliding attacks.

Vs Chun Li

Block her aerial attacks. Use the slide attack

Playing Tips!

when she's on the ground.

Vs Blanka

He's fast, so watch him. Use fire whenever he turns into a ball or electrifies. Give him some nuggies.

Vs Zangief

Comes towards you. Use fire and flame to keep him at a safe distance.

Vs Guile

Don't stick your arms and legs out, or they'll be flash-kicked. Try getting him in a headlock and giving him plenty of nuggies.

Vs Balrog

Punch him in the guts to keep him at bay, before going for some drill attacks. Finish him off with fire/flame.

Vs Vega

Hard to match in the air. Wait to catch him off guard with some yoga flame.

Vs Sagat

Duck under his energy waves and punch him in the knee. If he gets too close, throw and then flame him.

Vs M Bison

Nasty. Kick him when he's close, and keep blocking. Counter when his guard's down.

Blanka

The Brazilian monster is one of the best all-round fighters.

Playing Tips!

Special Moves

Electricity: channels 1,000 volts through his body, shocking any opponent who dares to touch!

Rolling Attack: rolls himself into a human cannonball to bowl over enemies.

Vs Ryu/Ken

If they try leaping kicks, defend with electricity. Get in close and daze them with strong punches and kicks, before going for a bite!

Vs E Honda

Use your superior reach. Don't jump in the air; use leg sweeps to knock him down. Counter thousand slaps with electricity, and do a rolling attack if you get him in a corner.

Vs Chun Li

There's only one way to defend against her stunning aerial attacks: electrify yourself to frazzle her!

Vs Zangief

Don't trade blows — use leaping kicks and strong punches to keep him away.

Vs Guile

Don't attack from the air — his flash kick's too dangerous. Use plenty of leg sweeps. If he jumps at you, use electricity.

Vs Dhalsim

Use flying kicks to counter his drill attacks. Jump over yoga fire and kick him, then bite to finish.

Vs Balrog

Immediately move left, blocking his attacks. When you see an opening, try a rolling attack. Follow up with a bite.

Playing Tips!

Vs Vega

Keep your distance and go for long-range kicks. When he leaps off the fence, electrify him.

Vs Sagat

Dodge his missile attacks and go for his weak legs. Try a double knee lift when in close.

Vs M. Bison

When he tries a torch attack, electrify yourself. Don't even think about a rolling attack. Use strong punch and kick combinations.

Zangief

The tallest fighter has no missile attacks, but compensates with sheer brute force.

Special Moves

Spinning Clothesline: during this whirly move, he's immune from missile attacks.

Spinning Pile Driver: spins the opponent head-first into the ground!

Vs Ryu/Ken

Defend against fireballs and hurricane kicks with a spinning clothesline. Use the spinning pile driver to crush 'em.

Vs E Honda

Use body slams to get him moving backwards, then use spinning pile driver. Counter flying head butts with a spinning clothesline.

Vs Chun Li

You can't match her agility, so wait for her to attack, then do a spinning clothesline. Throw her

Playing Tips!

if you get the chance.

Vs Blanka

Spinning pile drivers are very effective. Or try some roundhouse leg sweeps and leaping kicks.

Vs Guile

Don't take him on in the air. Use knee dives and strong leg sweeps after he flash-kicks. Repel sonic booms with the spinning clothesline.

Vs Dhalsim

Use spinning clothesline to defend against his drill attack. Use leg sweeps to stop his bendy attacks. Get in close to finish him off.

Vs Balrog

Dodge his punch, then double-kick and throw. Time your spinning pile driver to grab his arm and squash his skull.

Vs Vega

Defend like mad, and keep him at bay with leaping kicks and leg sweeps. If he gets too close, do one of your devastating throws.

Vs Sagat

It's hard to avoid his fireballs, so get in close and use leg sweeps to knock him down. Follow up with a powerful throw.

Vs M Bison

Blocking his combinations is the key to success. Use leg sweeps to keep him at bay, and get him with a pile driver when he falls.

VIZ (Virgin/Tronix)

Sorry about this — we don't use swear words in the mag, but there's nothing we can do about this one. Use your imagination and substitute the correct letters for the asterisks...

VOYAGER

(Hit Squad)

On the options screen, type **WHEN THE SWEET SHOWERS OF APRIL FALL** and a cheat menu should appear.

WARZONE

(Core)

It's rough, it's tough, it's... a bog-standard *Nar*/Warriors clone! You've seen this game a thousand times before, but what the hell? It's still a good blast.

On the title screen press F1, F2, and F3 for infy lives.

Playing Tips!

WINGS OF FURY

(Domark)

If those Japs are still knocking you out of the sky, these cheats are more ideologically sound than dropping an atom bomb.

ZOOL

Gremlin

On the intro sequence (after copy protection), type GOLDFISH (the screen should briefly flash blue), then press F1-F6 to select the world you want to start on. During play, press numbers;

- 1 — gives Zool a shield
- 2 — skips to next stage
- 3 — skips to next world
- 4 — ends Zool's current life.

SWEET WORLD

1.1

Zool's flying sword attack can destroy some Lollipops to gain extra bonuses. The first wall to the right of the second restart point can be punched through to gain a super bonus. Just above the second restart point there's a vertically moving platform — jump on it to gain access to an extra life.

Playing Tips!

1.2

Try to complete this level as easily as possible — if you pick up a shield, move as fast as you can towards the exit. Watch out for large drops with spikes at the bottom.

1.3

You'll encounter three boxes with Hit written on them. Hit the first and third boxes to gain bonuses.

There are two possible ways to defeat this level. You may take on the end-of-level baddie, in which case the best tactic is to stand at the left of the screen, leaping up to avoid his bombs whilst shooting him rapidly.

The alternative is to let the timer run down to 50, then punch the first right-hand wall at the start of the level. You can reach a secret room containing bonuses, extra time, two extra lives and an exit to complete the world.

MUSIC WORLD

2.1

The small remote controls are the restart points. Use Zoo's flying sword attack to destroy the speakers and gain extra bonuses. Jump up into the bell and you can use it as a shield — press fire to break out.

Hidden Level 1: Directly above the first restart point (about a screen above) is an invisible entrance to the first bonus shoot-'em-up.

Playing Tips!

Hidden Level 2: The first piano doesn't appear to do anything. However, play the *Close Encounters* tune (Grey, White, Black, Red, Green) and you enter another bonus shoot-'em-up.

2.2

On the first piano, play Brown, Yellow, Red, Orange and Green notes to create a large note over the piano. Jump onto this to reach a hidden bonus room, containing a new set of notes. Play these (Brown, Orange, Green and Dark Blue) on the same piano for an extra life.

At the next piano (near the end of the level) play Red, Yellow, Light Blue, Dark Blue. Another large note appears — jump on it to be carried up to the exit.

2.3

Try to keep going as fast as possible as you don't have much time. On long runs use Zoo's sliding attack to kill baddies. To kill the big guitar monster, shoot it while its eye's open. You must stay near the left edge of the screen, dodging the lightning bolts and destroying the fruit.

FRUIT WORLD

3.1

Watch out for the bananas which act as restart points. You can gain extra bonuses by crouching down and pulling radishes from the ground, and also by cutting the tops off some carrots. Stand

Playing Tips!

still and keep destroying falling grapes to replenish health.

Try and work your way along the top of the level, as near the end you'll find an extra life. If you find the exit but do not have enough bonuses, work your way back and look for a slightly different route.

3.2

Punch through the first right-hand wall to gain lots of bonus points. Bounce on the can lids to reach extra bonuses and gain an extra life. You'll come across a hole filled with bonuses in a 'V' shape: punch through the left-hand wall for extra bonuses.

3.3

Punch through the first low right-hand wall to gain bonuses. Punch the next big left-hand wall (by a tree) for even more bonuses. Continue on until find a series of fruit cans: bouncing on the lid propels you up to gain an extra life.

To kill the boss monster, first shoot the (indestructible) alarm clock to wake the banana up. Try to stay at the left of the screen while shooting the banana.

If you die while fighting the banana, you can get back to him from the last restart point by just running right and shooting rapidly. Remember, even with the banana destroyed, the alarm clock is still dangerous.

Playing Tips!

TOOL WORLD

4.1

The blocks of wood with nails in them are the restart points. The darker shades of wood invariably lead to lots of bonus points.

Hidden Level: Go right from the start of the level until you come to the first wooden platform. Take Zool to the top and jump left from the far left edge of the wood to enter the third shoot-'em-up level.

4.2

It's very hard to gain enough bonuses on this level, so try not to miss any.

4.3

One of the hardest levels in the game, the best bet is to search the early part of the level for as many bonuses as possible — they get much scarcer further on.

When you meet the boss monster, go for his eyes as quickly as possible — his drill takes out the ground beneath Zool. If you've got enough energy it's worth sacrificing a couple of hits to get several attacks in on the drill.

TOY WORLD

5.1

The restart points are the easily recognisable HIT signs! Watch out for low fast-moving clouds and the tanks which fire at you. Remember you can only stand on the red and green blocks, not the blue or orange.

Playing Tips!

Hidden Level: Travel right from the start until you come to the giant bonus panda. Jump onto the left-hand blue column and jump left: you should hit the hidden entrance to access the fourth and final shoot-'em-up level.

5.2

Just be careful, use the restart points, and you should find it quite easy.

5.3

Be very careful about dropping down any gaps — they may well be spiked. When you arrive at an area containing several similar-looking holes, drop down the sixth hole to progress.

To kill the robot boss, shoot at his head but watch out for when he opens his chest to shoot back.

FAIR WORLD

6.1

The restart points are similar to those in World One. Let the hammer monster hit the base of the bell machine — if you've positioned Zool correctly he'll be flung upwards.

6.2

If you come to a dead end, hang around a while and a balloon should arrive to carry Zool onwards. Also, if you can't see where to jump next, take the biggest jump you can — there may well be an off-screen platform.

6.3

If you see bonuses you can't reach, look around

Playing Tips!

for a balloon to lift you up.

To complete the Zool arcade machine, start it up and keep jumping on the red button. When an obstacle appears, walk onto the white button (to jump over it), then carry on jumping on the red button. When you complete the machine, you gain three extra lives.

To destroy the final boss (the evil clown), stand on the first platform, duck down and shoot him in his large central eye.

Z-OUT

(Rainbow Arts)

Hold down Q during play and press any key from 1–7 to access that level. Alternatively press 1–3 on the numeric keypad to skip to that stage on the level you're on.
