

Keyword Index to Volume 11

- 2-(2'-pyridyl)imidazole, 175
accumulation, 101
ACTH, 183
aequorin, 277
albumin, 81
ALG-2, 375
aluminium ion, 107
aluminum ion, 63
Anabaena doliolum, 55
annexin, 399
antibacterial activity, 1, 27
antibiotics, 1
anticoagulation, 399
antiviral activity, 89
apoptosis, 375
asbestos, 41
ascorbate, 199
ascorbate, 81

B16 melanoma cell, 107
bacterial tests, 175
biooxidation, 125
biosorption, 69, 145
bleomycin, 199
BM-40, 277
brain, 265

Ca²⁺ pumps, 319
Ca²⁺ signaling, 297
Ca²⁺, 383
Ca²⁺-binding protein, 297
Ca²⁺-binding S100 proteins, 383
Ca²⁺/calmodulin-dependent protein kinase IV, 331
cadherins, 359
cadmium, 183, 235
calbindin, 277
calcineurin, 277, 375
calcium, 113, 331, 345, 359, 375, 399
calmodulin, 213, 277, 297, 331, 359
calpain, 277
carboxymycobactin, 13
catalase, 153
ceruloplasmin, 81
children, 189
chimera, 277
chromium(VI), 175
cisplatin, 259
Clarius batrachus, 95
classification, 277
cobalt-binding, 33
cobalt-resistant, 33
cobaltoprotein, 33
congruence, 277
conjugates, 1

copper, 49, 81, 229
copper deficiency, 207
copper(II) 3,5-diisopropylsalicylate, 21
CREB, 331, 345
Cu²⁺, 383
Cytochrome c oxidase, 207
cytoskeleton, 359, 399
cytotoxicity, 259

DAP-Kinase, 375
dendrogram, 277
diacylglycerol, 277
domain, 277
Drosophila, 359

E. coli B, 27
EF-hand, 277, 297, 383
EGF-domains, 359
electron spin resonance, 81
enterobacteria, 131
episodic secretion, 183
EPR, 21
Escherichia coli, 223
eukaryote, 277
evolution, 277
exochelin, 13
exocytosis, 399

feathers, 139
ferrioxamines, 131
ferritin, 265
fluorescence spectroscopy, 213
FoxA receptor, 131

gadolinium, 113
gene duplication, 277
gene expression, 345
gene fusion, 277
glutathione, 153
glutathione peroxidase, 153
glycerol kinase, 63
gold bioleaching, 145
gram-negative bacteria, 243
growth promotion, 1

haematology, 95
heart, 207
heat and cold shocks, 55
homologous structures, 159
homology, 277
human serum albumin, 21
hydrogen peroxide, 41

Keyword Index

- inositol, 243
integrins, 359
intracellular Ca^{2+} homeostasis, 319
ion channel, 399
iron, 13, 41, 81
iron and manganese superoxide dismutases, 159
iron chelation, 203
iron ions, 199
iron overload disease, 203
iron precipitation, 125
iron transport, 131
- lactic acid, 95
lactoferrin, 89
lanthanoid, 107
lead, 189
light chain of myosin, 277
lipid peroxidation, 153
liver, 49, 265
- magnetic resonance imaging contrast media, 113
manganese, 49
membrane, 399
mercury, 139
metabolic rates of selenium, 223
metal ion complexes, 89
metal ion requirement, 253
metal ion specificity, 159
metal ions, 213
metal(loids), 101
metal-microbe interactions, 69
metal-resistant, 33
metals, 49, 259
metals bioremediation, 69, 145
Methylosinus trichosporium OB3b, 229
mitochondria, 207
morphology, 107
muscles, 139
mutagenicity, 175
mycobacteria, 243
Mycobacterium smegmatis, 13
mycobactin, 13
- N*-acetylmannosamine kinase, 253
N-acetylneuraminic acid biosynthesis, 253
N. crassa, 33
 $\text{Na}^+/\text{Ca}^{2+}$ exchangers, 319
NMR, 21, 63, 213
- outer membrane penetration, 1
ovarian cancer, 259
oxidation-reduction, 41
- parameters, 27
particulate methane monooxygenase, 229
parvalbumin, 277
- pheasant, 139
phospholipase C, 277
phospholipids, 399
phytochelatins, 55
plasma, 265
polypyridines, 175
precious metals, 69
programmed cell death (PCD), 375
prolactin, 235
proliferation, 107
protein structure, 297, 383
pulsatile secretion, 235
pyridoxal isonicotinoyl hydrazone, 203
pyruvic acid, 95
- rat, 207
rate equation, 125
recoverin, 277
- S100, 277
secretion, 399
selenium, 223
siderophore analog, 243
siderophores, 1, 131
signal transduction, 297
silver ion, 27
sorcini, 277
spermine, 63
superoxide dismutase, 153
synthesis, 243
- T lymphocyte, 331
Thiobacillus ferrooxidans, 125
thiourea, 145
TIBC, 265
toxicity, 101, 189
transferrin, 81, 199
transmetallation, 113
TRH, 235
tricatecholate, 243
troponin C, 277
- UDP-*N*-acetylglucosamine 2-epimerase, 253
UV-B radiation, 55
- vacuolar H^+ -ATPase, 101
vacuole, 101
vanadium, 95
- X-rays, 55
- yeast, 63
- zinc, 49
 Zn^{2+} , 383
