

SECOND SCANDINAVIAN SUMMER MEETING OF BIOCHEMISTRY, PHARMACOLOGY AND PHYSIOLOGY

August 27-29, 1959, Turku, Finland

IN THE course of this meeting, there were papers read on the following topics: the Biochemistry of Subcellular Particles; the Biochemistry of Connective Tissues; the Mechanisms of Glucuronide and Sulphate Conjugation; and the Central Control of the Autonomous Nervous System.

On the following pages there appears a second and final selection of papers from this symposium, the first of which appeared in *Biochemical Pharmacology* Volume 5 Number 4.
