

Papers to be published in future issues

- U. BARDI, GIULIA BORETTI and A. DI MARCO: Inhibition of oxidative phosphorylation by aminosidine and other antibiotics in rat liver mitochondria.
- D. L. SMITH and E. D. HARRIS, JR.: The reduction of triphenyltetrazolium by hypertrophied tissues.
- A. BEN and R. SINGER-ALTBEEKER: The influence of thiamine and related compounds on the iris of the frog.
- R. G. WIEGAND and J. E. PERRY: Effect of L-DOPA and N-methyl-2-propynylamine on DOPA, dopamine, norepinephrine, epinephrine and serotonin levels in mouse brain
- J. F. HENDERSON and I. G. JUNGA: Effects of purine antagonists on the metabolism of other purine antagonists.
- S. H. NGAI, S. GINSBURG and R. L. KATZ: Action of thiamine and its analogues on neuromuscular transmission in the cat.
- I. ENANDER, A. SUNDWALL and Bo SÖRBO: Metabolic studies on N-methylpyridinium-2-aldoxime—I. The conversion to thiocyanate.
- I. ENANDER, A. SUNDWALL and Bo SÖRBO: Metabolic studies on N-methylpyridinium-2-aldoxime—II. The conversion to N-methylpyridinium-2-nitrile.
- W. D. WOSILAIT: The reduction of cytochrome *c* by reduced vitamin K₁.
- A. M. ROTHSCHILD, I. VUGMAN and M. ROCHA E SILVA: Metabolic studies on the release of histamine by compound 48/80 in the rat diaphragm.
- L. LEVY and G. E. CRONHEIM: Blood levels and clearing activity of a synthetic heparinoid.
- J. A. FOUTS, R. L. DIXON and R. W. SHULTICE: The metabolism of drugs by regenerating liver.
- C. VAN DER MEER and P. W. VALKENBURG: The pharmacology of KCN as a prophylactic against radiation.
- T. ZSOLNAI: Versuche zur Entdeckung neuer Fungistatika—III. 8-Hydroxy-chinolin-Derivate, Nitroso-Verbindungen und Oxyme.
