

ANNOUNCEMENT

THE editors of *BIOCHEMICAL PHARMACOLOGY* feel that a useful purpose would be served by publishing short critical reviews of recent meetings and symposia on subjects of interest to readers of the Journal. These reports should be prepared by someone who has attended the meeting, and should be submitted immediately after the meeting is finished so that they can appear within three months of the actual time of the meeting. The Publishers are prepared to pay a small fee for the preparation of such a report. The Editors would appreciate it if their attention were drawn to suitable meetings and symposia, and if suggestions were made as to who might be qualified and prepared to make such a report. In the first instance all communications should be addressed to the relevant Regional Editor.
